#### **Malaysian Financial Reporting Standards (MFRS Framework)**

On 19 November 2011, the Malaysian Accounting Standards Board (MASB) issued a new MASB approved accounting framework, the Malaysian Financial Reporting Standards (MFRS Framework).

The MFRS Framework is to be applied by all Entities Other Than Private Entities for annual periods beginning on or after 1 January 2012, with the exception of entities that are within the scope of MFRS 141 Agriculture (MFRS 141) and IC Interpretation 15 Agreements for Construction of Real Estate (IC 15), including its parent, significant investor and venturer (herein called 'Transitioning Entities').

Transitioning Entities will be allowed to defer adoption of the new MFRS Framework and may in the alternative, apply Financial Reporting Standards ("FRS") as its financial reporting framework until the MFRS is mandatory for annual periods beginning on or after 1 January 2017.

The Group falls within the scope definition of Transitioning Entities and accordingly, will be required to prepare financial statements using the MFRS Framework in its first MFRS financial statements when the MFRS Framework is mandated by MASB. In presenting its first MFRS financial statements, the Group will be required to restate the comparative financial statements to amounts reflecting the application of MFRS Framework. The majority of the adjustments required on transition will be made, retrospectively against opening retained earnings.

#### 16. Performance Review

The Group's revenue of RM5.93 million and RM11.17 million for the current quarter and year-to-date respectively were lower than the revenue reported for last year's corresponding quarter of RM7.68 million and year-to-date of RM13.75 million despite higher interest income. Crop sales were down by about 30% and 15% for the current quarter and year-to-date respectively. These were due to lower tonnage harvested arising from the heavy rainfalls impeding the harvesting activities. The average price of fresh fruit bunches ("FFB") was also down by about 10% as compared to the average FFB price a year ago. Dividend income were also significantly lower.

For the current quarter, the Group reported an after-tax profit of RM685,000 which was significantly lower than last year's corresponding quarter's RM6.64 million. This was due to:-

- 1) Lower revenue achieved.
- 2) The unrealised foreign exchange loss of RM2.39 million suffered during the current quarter was higher than last year's corresponding quarter's RM443,000.
- 3) Share of profit of associates for the current quarter was only RM108,000. This was significantly lower than then profit of RM3.31 million reported for the corresponding quarter of a year ago.

The Group's after-tax profit for the 6 months to-date was RM6.04 million which was lower than last year's corresponding period-to-date's profit of RM12.91 million, mainly due to:-

- 1) Lower revenue achieved.
- 2) The foreign exchange difference for current period-to-date was a loss of RM3.89 million which was a negative turnaround from the gain of RM597,000 achieved 12 months ago.

# 17. Comment on Material Change in Profit Before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter

For the quarter under review, the Group's revenue of RM5.93 million was higher than the immediate preceding quarter of RM5.25 million despite lower crop sales. This was mainly due to higher dividend income of RM2.41 million was received as compared to the receipt of RM1.21 million during the immediate preceding quarter ended 30 September 2014. Interest income was also slightly higher.

The Group reported a pre-tax profit of RM1.18 million for the current quarter. This was significantly lower than the immediate preceding quarter's RM5.69 million despite higher revenue was achieved. This was mainly due to:-

- 1) The foreign exchange loss of RM2.39 million for the current quarter was higher than the immediate preceding quarter's loss of RM1.5 million.
- 2) Share of the associates' profit for the current quarter was RM108,000 while the immediate preceding quarter's was RM5.42 million.

#### 18. Commentary on Prospects

For the rest of the financial year, it will be a challenging time for the Group. The oil palm estates have to attend to extensive repairs to main and infield roads, and focus in reducing harvesting intervals which were affected and extended during the monsoon season respectively. FFB prices are expected to remain stable as FFB output in Malaysia declined in December and January due to the severe flood disrupted the harvesting activities. However, the yield is expected to low due to climatic changes.

The results of the associated companies may be further affected by the market valuation of their investments and currency fluctuations.
