#### 13. Performance Review

The Group registered revenue of RM2.83 million for the current quarter and RM9.24 million for the period ended 31 March 2011, an increase of about 38% as compared to the corresponding quarter and period-to-date of last year. These were due to higher crop sales arising from higher FFB prices and higher dividend income partially offset by lower interest income.

The Group also recorded after-tax profit of RM4.21 million and RM15.3 million for the current quarter and period-to-date respectively as compared to the after-tax loss of RM453,000 and after-tax profit of RM4.92 million reported for last year's corresponding quarter and period-to-date respectively. These were primarily attributable to higher revenue as well as positive turn around in the foreign exchange positions from unrealised losses of RM3.45 million and RM1.58 million suffered during last year's corresponding quarter and period-to-date to unrealised gains of RM1.47 million and RM8 million for the current quarter and period ended 31 March 2011. Share of associates' financial profit of RM1.72 million and RM3.2 million for the current quarter and period-to-date.

## 14. Comment on Material Change in Profit Before Taxation for the Current Quarter as Compare with the Immediate Preceding Quarter

For the quarter under review, the Group's revenue of RM2.83 million was lower than the immediate preceding quarter of RM4.06 million, mainly due to lower crop sales as tonnage harvested was lower by about 26% partially offset by the increase of 18% in FFB prices. No dividend income was received during the current quarter as compared to the immediate preceding quarter's receipt of RM857,000.

Despite the decrease in revenue and unrealised foreign exchange gain by 30% and 32% respectively, the Group's pre-tax profit of RM4.6 million for the current quarter was lower than the immediate preceding quarter's pre-tax profit by only RM131,000 or 3%. These shortfalls were partially compensated by higher share of associates' profit of RM1.72 million as compared to the immediate preceding quarter's of RM52,000.

#### 15. Commentary on Prospects

The plantation is expected to perform satisfactorily as the average FFB prices have strengthened substantially since the end of the previous financial year. They are expected to remain stable for the rest of the financial year ending 30 June 2011.

The results of the associated companies may be further affected by the market valuation of their investments and currency fluctuations.

Part B - Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

#### 16. Profit Forecast or Profit Guarantee

There is no profit forecast or profit guarantee.

#### 17. Income Tax Expense

	Individua	l Quarter	Year-To-Date		
	3 month	s ended	9 months	s ended	
	31.03.11 RM'000	31.03.10 RM'000	31.03.11 RM'000	31.03.10 RM'000

Malaysian income tax	389	175	1,090	497

The effective tax rate for last year's corresponding quarter was higher as certain expenses were not deductible for tax purposes.
