The consolidated statement of changes in equity should be read in conjunction with the accompanying explanatory notes attached to the financial statements.

Part A - Explanatory Notes Pursuant to MFRS 134

1. Basis of Preparation

The interim financial statements of the Group for the financial year ended 30 June 2020 are prepared in accordance with Malaysian Financial Reporting Standards ("MFRS"), including MFRS 16: Leases.

The interim financial statements have been prepared on a historical cost basis, except for investment properties, certain investments and biological assets that have been measured at their fair values.

The interim financial statements are unaudited and have been prepared in accordance with the requirements of MFRS 134: Interim Financial Reporting and paragraph 9.22 of the Listing Requirements of Bursa Malaysia Securities Berhad.

2. Significant accounting policies

Changes in accounting policies

The accounting policies and methods of computation adopted by the Group in these interim financial statements are consistent with those adopted in the audited financial statement for the financial year ended 30 June 2019 except for the adoption of the amended FRSs and annual improvements which are relevant to the Group's operations with effect from 1 July 2019 as set out below:

Amendments to MFRS 9: Prepayment Features with Negative Compensation

MFRS 16: Leases

Amendments to MFRS 119: Plan Amendment, Curtailment or Settlement

Amendments to MFRS 128: Long-term Interests in Associates and Joint Ventures

IC Interpretation 23 Uncertainty over Income Tax Treatments

Annual Improvements to MFRS Standards 2015–2017 Cycle: Amendments to MFRS 3, MFRS 11,

MFRS 112 and MFRS 123

The initial application of the MFRSs, Amendments to MFRSs and IC Interpretations, which will be applied prospectively or which requires extended disclosures, is not expected to have any significant financial impact to the financial statements of the Group upon their first adoption except for the following:

MFRS 16: Leases

MFRS 16 has replaced MFRS 117 Leases, IC Interpretation 4 Determining whether an Arrangement contains a Lease, IC Interpretation 115 Operating Lease-Incentives and IC Interpretation 127 Evaluating the Substance of Transactions Involving the Legal Form of a Lease. MFRS 16 sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to account for all leases under a single, on-balance sheet model similar to the accounting for finance leases under MFRS 117.

Lessor accounting under MFRS 16 is substantially the same as the accounting under MFRS 117. Lessors will continue to classify all leases using the same classification principle as in MFRS 117 and distinguish between two types of leases: operating and finance leases. MFRS 16 also requires lessees and lessors to make more extensive disclosures than under MFRS 117.

Part A - Explanatory Notes Pursuant to MFRS 134

2. Significant accounting policies (cont'd)

Changes in accounting policies (cont'd)

The Group adopted the MFRS 16 using the modified retrospective method of adoption, under which the cumulative effect of initial recognition is recognised in retained earnings. The Group measured its right-of-use assets equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the statement of financial position immediately before the date of initial application (i.e. 1 July 2019). The Group does not restate the comparative information, which continues to be reported under MFRS 117.

The effect of adoption of MFRS 16 to the Group as at 1 July 2019 is as follows

Consolidated Statement of Financial Position	Increase/ (decrease)
	RM'000
Assets Right-of-use asset	3,230
Liabilities Lease liabilities	3,230

Significant accounting policies

The standard requires the Group to recognise a right-of-use asset and a lease liability on the lease commencement date.

The right-of-use asset is initially measured at cost, and subsequently at cost less accumulated depreciation and impairment losses, and adjusted for certain remeasurement of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate as the discount rate. The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payment made. In addition, the carrying amount of lease liability is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

3. Auditors' Report on Preceding Annual Financial Statements

The auditors' report on the financial statements for the year ended 30 June 2019 was not qualified.

5. Unusual Items due to their Nature, Size or Incidence

There were no unusual items affecting assets, liabilities, equity, net income, or cash flows during the financial year ended 30 June 2020.

6. Changes in Estimates

There were no changes in estimates that have had a material effect in the current quarter and year-to-date results.

7. Comments about Seasonal or Cyclical Factors

The revenue and earnings are impacted by the production of fresh fruit bunches and volatility of the selling price of crude palm oil. The production of fresh fruit bunches is influenced by weather conditions, production cycle and age of oil palms.

Part A - Explanatory Notes Pursuant to MFRS 134

8. Cash Dividends Paid

In respect of the financial year ended 30 June 2019, as reported in the directors' report of that year, the following cash dividends were paid during the financial year ended 30 June 2020:

15. Fair Value Hierarchy

The Group uses the following hierarchy for determining the fair value of all assets and liabilities carried at fair value:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

	Level 1 RM'000	Level 2 RM'000	Level 3 RM'000	Total RM'000

There have been no transfers between Level 1, Level 2 and Level 3 fair value measurements during the current financial period and the comparative period. There were no changes in the purpose of any financial asset that subsequently resulted in a different classification of that asset.

Part B - Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

16. Performance Review

The Group's revenue of RM5.91 million and RM14.09 million for the current quarter and current financial year respectively were higher than the revenue reported for last year's corresponding quarter of RM4.52 million and last financial year of RM12.24 million. The increases in revenue for the current quarter and year were mainly due to increases in tonnage harvested and average price of fresh fruit bunches ("FFB") when compared to last year's corresponding quarter and a year ago.

For the current quarter, the Group reported an after-tax profit of RM10.02 million while last year's corresponding quarter was an after-tax loss of RM2.16 million. The positive variance of RM12.17 million was due to :-

- 1) Revenue achieved for the current quarter was higher than last year's corresponding quarter.
- 2) Foreign exchange gain of RM1.32 million was reported for the current quarter while last year's corresponding quarter was a loss of RM944,000.
- 3) The fair value of its investments through profit or loss was a gain of RM4.86 million for the current quarter while it was a loss of RM202,000 during last year's corresponding quarter.
- 4) Share of the financial results of associates was a profit of RM5.76 million for the current quarter which was significantly higher than last year's corresponding quarter's profit of RM518,000.

However, subcontract costs of RM3.26 million for the current quarter was higher than last year's corresponding quarter's RM1.58 million due to the increase used of fertilizers on newly matured plants.

The revaluation of the Group's investment property was a loss of RM4.43 million while last year's corresponding quarter's was a profit of RM941,000.

The Group ended the current financial year with an after-tax loss of RM8.46 million which was higher than last year's after-tax loss of RM6.66 million despite higher revenue recorded for the current financial year. This was attributed by the following:-

- 1) Subcontract costs for the current financial year was RM10.02 million which was significantly higher than last year's RM3.92 million. This was due to additional application of fertilizers on the newly matured plants.
- 2) Foreign exchange difference for the current financial year was a loss of RM4.39 million while last year was a gain of RM106,000.
- 3) The revaluation of the Group's investment property was a loss of RM4.43 million for the current financial year while it was a profit of RM941,000 a year ago.

Part B - Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

16. Performance Review (cont'd)

However, revenue achieved for the current financial year was higher than a year ago. In addition, the revaluation on its investments through profit or loss for the current financial year was a gain of RM3.72 million while last year's was a loss of RM709,000.

Share of the financial results of associates' for the current financial year was a loss of RM1.76 million. This was lower than the loss of RM5.01 million reported a year ago.

For the current quarter and financial year, the income tax credit was derived from the reversal of temporary difference of deferred tax RM1.9 million while last year's corresponding quarter's and financial year's was an additional deferred tax provision of RM3.92 million.

For the current quarter, the Group posted a total other comprehensive income of RM14.72 million which was higher than last year's corresponding quarter's income of RM12.08 million. This was mainly due to the fair value gain of RM12.77 million arising from the revaluation of the Group's investments at FVTOCI for the current quarter was higher than last year's corresponding quarter's gain of RM8.80 million. Share of other comprehensive income of associates for the current quarter was RM3.47 million while there was none for last year's corresponding quarter. However, foreign currency translation for the current quarter was a loss of RM1.52 million while last year's corresponding quarter was a gain of RM3.28 million.

For the current financial year, the Group posted a total other comprehensive loss of RM23.85 million which was higher than last year's loss of RM12.42 million. This was mainly due to the fair value loss of RM36.77 million arising from the revaluation on its investments at FVTOCI for the current financial year was higher than last financial year's loss of RM18.93 million. However, foreign currency translation for the current financial year was a gain of RM9.25 million and this was higher than last financial year's gain of RM6.51 million. Share of other comprehensive income of associates for the current financial year was RM3.67 million while there was none for last year.

17. Comment on Material Change in Profit Before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter

Part B - Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

17. Comment on Material Change in Profit Before Taxation for the Current Quarter as Compared with the Immediate Preceding Quarter (cont'd)

For the quarter under review, the Group's revenue of RM5.91 million was higher than the immediate preceding quarter's of RM2.54 million. This was mainly contributed by the receipt of dividend income of RM2.74 million while there was none during the immediate preceding quarter. Crop sales of RM2.66 million for the current quarter was higher than immediate preceding quarter's of RM1.95 million on account of higher tonnage harvested and higher FFB prices.

The Group reported a pre-tax profit of RM8.12 million for the current quarter while the immediate preceding quarter reported a loss of RM21.30 million. This was mainly due to :-

- 1) Revenue achieved for the current quarter was higher than the immediate preceding quarter.
- 2) The foreign exchange difference was a gain of RM1.32 million for the current quarter while it was a loss of RM6.27 million for the immediate preceding quarter.
- 3) The fair value on its investments through profit or loss for the current quarter was a gain of RM4.86 million while it was a loss of RM4.10 million for the immediate preceding quarter.
- 4) Share of associates' financial results was a profit of RM5.76 million for the current quarter while it was a loss of RM9.43 million for the immediate preceding quarter.

However, revaluation of its investment property for the current quarter was a loss of RM4.43 million while there was none during the immediate preceding quarter.

18. Commentary on Prospects

For the financial year ending 30 June 2021, the Group expects FFB production to be higher than the financial year ended 30 June 2020.

Although the Group expects FFB production for the financial year ending 30 June 2021 to be higher than the financial year ended 30 June 2020, FFB prices and global demand remain challenging.

Plantation operations may be impacted by adverse weather conditions, supply of labour and pest attacks.

The Group's results are also dependent on dividend income receivable from its investments, market valuation of its publicly listed investments and the effect of currency fluctuations.

The results of the associated companies may be affected by the market valuations of its investments and currency fluctuations.

19. Profit Forecast or Profit Guarantee

There is no profit forecast or profit guarantee.
