UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE THIRD QUARTER ENDED 31 JANUARY 2019

NOTES TO THE INTERIM FINANCIAL STATEMENTS

A. EXPLANATORY NOTES PURSUANT TO MALAYSIAN FINANCIAL REPORTING STANDARD ("MFRS") 134: INTERIM FINANCIAL REPORTING AND BURSA LISTING REQUIREMENTS

A1. Basis of Preparation

The interim financial statements are unaudited and have been prepared in compliance with the requirements of MFRS 134: *Interim Financial Reporting* and paragraph 9.22 of the Listing Requirements of Bursa Malaysia Securities Berhad.

The interim financial statements should be read in conjunction with the annual audited financial statements of the Group for the year ended 30 April 2018. These explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the financial year ended 30 April 2018.

A2. Changes in Accounting Policies

The interim financial statements for the current quarter ended 31 January 2019 are the third set of financial statements prepared in accordance with the Malaysian Financial Reporting Standards ("MFRS Framework"). The date of transition to the MFRS Framework was on 1 May 2017.

The Group has consistently applied the same accounting policies in its opening MFRS consolidated statement of financial position as at 1 May 2017 and throughout all comparable interim periods presented, as if these policies had always been in effect. The effect of the transition from Financial Reporting Standards ("FRS") to MFRS Framework and the adoption of new MFRSs, amendments to standards and IC Interpretations are as disclosed as below:

(a) Optional Exemption to Use Fair Value or Revaluation as Deemed Cost

As provided in MFRS 1, first-time adopter can elect optional exemptions from full retrospective application of MFRSs. The Group has elected to apply the optional exemption to use the revaluation of property, plant and equipment as at 1 May 2017 (date of transition to the MFRS Framework) as deemed cost. Any surplus arising from revaluation and the deferred tax provided for revaluation surplus at the date of transition are transferred to retained earnings.

(b) Bearer Plants

Amendments to MFRS 116 *Property, Plant and Equipment* and MFRS 141 *Agriculture: Bearer Plants* introduce a new category of biological assets, i.e. bearer plants. A bearer plant is a living plant that is used in the production and supply of agricultural produce, is expected to bear produce for more than one period, and has remote likelihood of being sold as agricultural produce, except for incidental scrap sales. Bearer plants are accounted for under the amendments to MFRS 116 as an item of property, plant and equipment.

NOTES TO THE INTERIM FINANCIAL STATEMENTS - CONT'D

A2. Changes in Accounting Policies - Cont'd

(b) Bearer Plants - Cont'd

Prior to the change in accounting policy, the Group adopted the capital maintenance model on its bearer plants (i.e. oil palm trees) where all new planting expenditure (also termed as biological assets) incurred from the stage of land clearing up to the stage of maturity was capitalised and not depreciated. Valuations were performed with sufficient regularity to ensure that the carrying amount does not differ materially from the fair value of the bearer plants at the reporting date.

Replanting expenditure consists of expenses incurred from land clearing to the point of harvesting and was recognised in the profit or loss in the period that it is incurred.

Upon adoption of the amendments to MFRS 116 and MFRS 141, bearer plants are classified as an item of property, plant and equipment and are accounted for in the same way as self-constructed items of property, plant and equipment. New planting and replanting expenditure is capitalised at cost and amortised/depreciated on a straight-line basis over its useful lives from the date of maturity. The bearer plants are subsequently measured at cost less accumulated depreciation and accumulated impairment loss, if any.

The change in accounting policy has been applied retrospectively and comparatives were restated. These changes have resulted in additional amortisation/depreciation charged to profit or loss in the current and previous financial years. The replanting expenditure that was charged to profit or loss in the previous financial years is reversed and capitalised under property, plant and equipment. Any surplus arising from revaluation and the deferred tax provided for revaluation surplus at the date of transition are reversed accordingly. The corresponding tax impacts have been accounted for.

(c) Biological Assets

Prior to the adoption of the Amendments to MFRS 116 *Property Plant and Equipment* and MFRS 141 *Agriculture: Bearer Plants*, biological assets growing on bearer plants (i.e. Fresh Fruit Bunches prior to havest) were not recognised. With the adoption of the Amendments to MFRS 116 and MFRS 141, the biological assets within the scope of MFRS 141 are measured at fair value less costs to sell, with fair value changes recognised in profit or loss.

(d) Classification of Costs Relating to the Fulfilment of the Delivery Goods

Adoption of MFRS 15 *Revenue from Contracts with Customers* is not expected to have any impact on the Group's revenue and profit or loss. However, the costs relating to the fulfilment of the delivery goods previously classified as selling and distribution expenses will be reclassified as cost of sales under MFRS 15.

A3. Seasonal or Cyclical of Operations

The production of oil palm fresh fruits bunches ("FFB") is influenced by weather conditions.

Even though the FFB production from Indonesian operations has increased by 38%, the FFB production of the Group for the nine months ended 31 January 2019 was 11% or 33,248 tonnes lower than that of the corresponding period in the preceding year mainly due to lower FFB production contributed by Malaysian operations.

For Malaysian operations, the FFB production for the nine months ended 31 January 2019 was 15% or 40,911 tonnes lower than that of the corresponding period in the preceding year mainly due to low FFB yield from Peninsular Malaysia as well as Meridian Estates in Sabah which were affected by the delayed impact of extended wet weather from January 2017 to March 2018.

For Indonesian operations, the FFB production for the nine months ended 31 January 2019 was 38% or 7,663 tonnes higher than that of the corresponding period in the preceding year mainly due to improved yield in the mature area as well as the additional of 424 hectares coming into maturity.

Comments on the business segments are as follows:

Plantation

Malaysian operations

Plantation profit of RM0.52 million in the current quarter was 96% lower compared with RM13.00 million in the corresponding quarter of the preceding year. Excluding the impact on adoption of MFRS Framework, the plantation profit would be RM5.50 million which was 73% lower than RM20.15 million in the corresponding quarter of the preceding year.

Lower plantation profit in the current quarter was mainly due to lower average prices of CPO of RM1,892/tonne (preceding year: RM2,561/tonne) and PK of RM1,392/tonne (preceding year: RM2,522/tonne) as well as the impact of 2,184 hectares of young matured palms in Sabah with high unit cost of production.

In addition, lower plantation profit also due to lower FFB yield of 4.61 tonne/ha (preceding year: 5.01 tonne/ha), arising from low FFB yield from Peninsular Malaysia as well as Meridian Estates in Sabah.

Indonesian operations

Plantation losses of RM4.05 million and RM2.76 million were recorded for both current quarter and corresponding quarter of the preceding year. Excluding the impact on adoption of MFRS Framework, the plantation losses would be RM2.44 million and RM1.40 million respectively.

Even though the FFB production for the current quarter was higher by 74% or 4,604 tonnes, plantation loss was recorded for the current quarter mainly due to high unit cost of production for the young matured area of 3,384 hectares (consist of 65% of total matured area) as well as low FFB selling price (44% lower compared with that in the corresponding quarter of the preceding year).

Plantation loss in the corresponding quarter of the preceding year was mainly due to high unit cost of production for the young matured area of 2,961 hectares (consist of 62% of total matured area).

Comments on the business segments are as follows:

Plantation

Malaysian operations

Plantation loss of RM12.30 million was recorded in the current period compared with a profit of RM35.46 million in the corresponding period of the preceding year. Excluding the impact on adoption of MFRS Framework, Malaysian operations would have shown a profit of RM0.96 million which was 98% lower compared with RM50.41 million in the corresponding period of the preceding year.

Low plantation profit in the current period was mainly due to lower FFB yield of 10.96 tonne/ha (preceding year: 13.27 tonne/ha), arising from low FFB yield from Peninsular Malaysia as well as Meridian Estates in Sabah which was affected by the delayed impact of extended wet weather from January 2017 to March 2018. As a result, the FFB production was lower by 15% or 40,911 tonnes.

In addition, the lower average prices of CPO of RM2,104/tonne (preceding year: RM2,672/tonne) and PK of RM1,576/tonne (preceding year: RM2,378/tonne) as well as the impact of 2,184 hectares of young matured palms in Sabah with high unit cost of production have contributed to the low plantation profit.

Indonesian operations

Plantation losses of RM12.49 million and RM7.48 million were recorded for both current period and corresponding period of the preceding year. Excluding the impact on adoption of MFRS Framework, the plantation losses would be RM8.13 million and RM3.43 million respectively.

Even though the FFB production for the current period was higher by 38% or 7,663 tonnes, plantation loss was recorded for the current period mainly due to high unit cost of production for the young matured area of 3,384 hectares (consist of 65% of total matured area) as well as low FFB selling price (30% lower compared with that in the corresponding period of the preceding year).

In addition, pretax profit in the current quarter was also due to net foreign exchange gain RM8.30 million compared with net foreign exchange loss of RM6.25 million in the preceding quarter.

B2. Comparison with Preceding Quarter's Results - Cont'd

Comments on the business segments are as follows:

Plantation

Malaysian operations

Malaysian operations recorded a plantation profit of RM0.52 million compared with a loss of RM1.61 million in the preceding quarter. Excluding the impact on adoption of MFRS Framework, the plantation profit in the current quarter would be RM5.50 million which was 302% higher compared with profit of RM1.37 million in the preceding quarter.

Even though the average prices of CPO of RM1,892/tonne (preceding quarter: RM2,156/tonne) and PK of RM1,392/tonne (preceding quarter: RM1,699/tonne) were lower compared with that in the preceding quarter, higher plantation profit in the current quarter was mainly due to higher FFB yield of 4.61 tonne/ha (preceding quarter: 3.55 tonne/ha) as well as lower unit cost of production incurred.

Indonesian operations

Plantation losses of RM4.05 million and RM4.29 million were recorded in the current and preceding quarters. Excluding the impact on adoption of MFRS Framework, the plantation losses would be RM2.44 million and RM3.05 million respectively.

Plantation losses for both current and preceding quarters were mainly due to high unit cost of production for the young matured area of 3,384 hectares (consist of 65% of total matured area) as well as low FFB selling price.

Investment Holding

Investment profit of RM6.82 million in the current quarter was mainly due to net foreign exchange gain of RM8.30 million which more than offset the interest expenses of RM1.99 million.

Investment loss of RM7.43 million in the preceding quarter was mainly due to net foreign exchange loss of RM6.25 million as well as interest expenses of RM1.75 million.

B3. Current Year Prospects

The Group has recorded a loss in the first nine months of financial year ending 30 April 2019 ("FY 2019") mainly due to low CPO and PK prices, low FFB yield caused by adverse wet weather as well as net foreign exchange loss of RM3.06 million. However, the Group's FFB production has started to improve in the second half of FY 2019.

In addition, the adoption of Malaysian Financial Reporting Standards ("MFRS Framework") effective FY 2019 requires the value of bearer plants (previously known as biological assets) to be amortised and additional depreciation of long term leasehold land to be provided. Total impact on adoption of MFRS Framework for the first nine months of FY 2019 was RM17.60 million.

Assuming CPO prices remain at the current level, the Group expects the fourth quarter of the financial year to remain challenging.

B4. Variance of Actual Profit from Profit Forecast or Profit Guarantee

B7. Status of Corporate Proposals

(a) Proposed Acquisition by United Malacca Berhad ("UMB") of 60% Effective Equity Interest in PT Wana Rindang Lestari ("WRL") ("Proposed Acquisition")

On 17 October 2017, UMB announced to Bursa Malaysia Securities Berhad ("Bursa") that it had entered into a conditional sale and purchase agreement ("CSPA") with vendor Dalvey Star Limited ("Dalvey"), Clifton Cove Pte Ltd ("Clifton"), PT Bintang Gemilang Permai ("BGP") and PT Wana Rindang Lestari ("WRL") for the proposed acquisition by UMB of one (1) ordinary share of USD1.00 representing a 100% equity interest in Clifton (the latter would hold an effective equity interest of 60% in WRL) for a total cash consideration of USD7,190,400 or approximately RM30,332,702.

WRL, a private limited liability company incorporated in Indonesia, has obtained a business licence "Izin Usaha Pemanfaatan Hasil Hutan Kayu Pada Hutan Tanaman Industri" ("HTI Licence") on 4 June 2014 from the Minister of Forestry, Indonesia over an area measuring approximately 59,920 hectares in the Regencies of Tojo Una-Una and Morowali, Province of Central Sulawesi.

Pursuant to the CSPA and prior to the completion of the Proposed Acquisition, BGP and WRL undertook an internal corporate restructuring of equity ownership structures in BGP and WRL ("Internal Restructuring"). Completed in January 2018, the Internal Restructuring resulted in Clifton holding a 65% equity interest in BGP which in turn holds 92.32% equity interest in WRL while the remaining stakes in both BGP and WRL are held by PT Sinar Kemilau Cemerlang ("SKC"). Following this Internal Restructuring, UMB acquired a 100% equity interest in Clifton which effectively holds a 60% equity interest in WRL.

Based on findings in the legal due diligence exercise on Clifton, a loan of USD425,000 from Dalvey to Clifton ("Loan") was incurred after the date of the CSPA during the Internal Restructuring without the prior knowledge of UMB. Because UMB indicated a preference to acquire a debt-free Clifton, Dalvey and Clifton have converted the Loan into new shares in Clifton prior to the completion of the Proposed Acquisition. The conversion of the Loan resulted in UMB to acquire the existing 1 (one) ordinary share and the newly issued 425,000 ordinary shares in Clifton (collectively, representing 100% equity interest in Clifton) while the total cash consideration of USD7,190,400 or approximately RM30,332,702 for the Proposed Acquisition remains the same.

The Post-Completion Obligations were fulfilled on 26 February 2019, i.e. within 6 months of the Completion Date.
