B. ADDITIONAL INFORMATION REQUIRED BY BURSA MALAYSIA LISTING REQUIREMENTS

B1. Review of Performance

For the first quarter ended 31 March 2007, the Group recorded a consolidated revenue of approximately RM185.4 million and consolidated profit before taxation of approximately RM22.3 million. These were attributed to the continued robust and positive pricing of the metallurgical coke and the by-products enjoyed by the Group in the current quarter. The price of metallurgical coke has increased by approximately 7% during the current quarter and that of coal gas by approximately 20%.

As a result of the increase in the pricing of metallurgical coke and the by-products as mentioned above (and after taking into consideration the increase in coal prices by approximately 5%), the Group enjoyed an improvement in gross margin of approximately 19% in the current quarter from an average of approximately 18% in the preceding year (which is believed to be already one of the highest in the industry).

B2. Variation of results against preceding quarter

The Group's consolidated revenue increased by RM10.2 million to RM185.4 million for the current reporting quarter from RM175.1 million reported in the preceding year corresponding quarter due to the increase in the price of metallurgical coke and byproducts.

Correspondingly, the gross profit has increased by approximately 9% to RM35.3 million during the current quarter from RM32.4 million in the preceding year corresponding quarter. Despite experiencing an increase in the coal price, such increase was at a relatively smaller magnitude compared to the increase in the price of metallurgical coke and by-products.

Notwithstanding the improvement in the Group's consolidated revenue, its consolidated profit after taxation reduced to RM17.7 million in the current quarter from RM28.6 million in the preceding year corresponding quarter. This was mainly attributable to the "one-off" restructuring expenses (arising from the implementation of the Antah's Restructuring Scheme and IPO of Hua-An) of approximately RM8.87 million which had been charged to the current quarter's Income Statement as well as taxation charge of approximately RM4.6 million in the current quarter which was exempted in the preceding year.

Should the Group's consolidated profit before taxation be adjusted to exclude the effects of the "one-off" restructuring expenses as mentioned above (in order to enable a better comparison with the performance of the Group for the preceding year corresponding quarter), the Group's proforma consolidated profit before taxation for the current quarter shall be approximately RM31.2 million, thus representing an improvement of approximately 9% from the consolidated profit before taxation of RM28.6 million for the preceding year corresponding quarter.

Notes on the quarterly report - 31 March 2007

B3. Current year prospects

The Group will continue to focus on its core activities and barring any unforeseen circumstances, the Directors are optimistic of achieving its targeted results for the current financial year.

The Group is expected to continue to enjoy greater demand-over-supply for its metallurgical coke and by-products due to the continued buoyant steel industry, particularly that in China PRC. This will have a direct positive impact on the Group's results for the current financial year.

Further, the Group has also commissioned a Coal Washing Facility in May 2007 and it is expected to contribute positively towards the profitability of the Group by way of reducing its cost of raw materials as well as generating additional revenue from the additional byproducts (middlings and coal slime) produced from this process.
