B. ADDITIONAL INFORMATION REQUIRED BY BURSA MALAYSIA LISTING REQUIREMENTS

B1. Review of Performance

No revenue was recorded for the current quarter under review as some of Group's coking ovens (ovens #1, #2 and #3) were being subjected to a leasing arrangement whilst the remaining ovens (ovens #4 and #5) were still not in operation.

The lease income received from the abovementioned leasing arrangement has been captured under Other Income for the current quarter under review.

The leasing arrangement has enabled the Group to transfer all major relevant production and operating costs attributed to the operations of those ovens which are subjected to the said lease in the current quarter under review. As compared to the same quarter last year, as a result of the temporarily suspension of operation with subsequent staggered resumption of production, the operating expenses incurred by the Group was approximately RM12.7 million in the previous year corresponding quarter compared to approximately RM12.4 million incurred during the current quarter under review. Relevant fixed manufacturing costs during the suspension period such as depreciation, repair and maintenance, electricity and etc. were reclassified as operating expenses in the relevant quarters accordingly.

As a result thereof, the Group recorded a net loss before tax of RM10.2 million in the current quarter under review compared to that of approximately RM18.8 million in the preceding year corresponding quarter.

B2. Variation of results against preceding quarter

As mentioned above, there were no revenue recorded for the current quarter under review following the strategic move by the Group to lease out some of its coke ovens for a period of one year commencing 1 February 2016. There were no gross profit or loss during the quarter under review as well as the immediate preceding quarter ended 30 June 2016.

After taking into consideration of the other income and operating expenses, the Group recorded a net loss for the period of RM10.2 million for the current quarter compared to that of approximately RM9.6 million in the immediate preceding quarter ended 30 June 2016. As mentioned, the operating expenses recorded in both quarters were attributed to office staff salary, depreciation, minor repair and maintenance, electricity and etc.

B3. Current year prospects

China economy continued to have growth at 6.7% for the three consecutive quarters in 2016 so far. Although prima-facie such growth rate appears to indicate that China economy is slowly stabilizing, it is believed that such engine of growth were still heavily dependent on intermittent government spending and that private sector investment and exports still appear to remain weak.

Given the seemingly still volatile economy and lack of visibility on when the steel and coke industry will turn the corner, it is perceivably fortunate for the Group to have no

external borrowings. Additionally, the Group has also taken proactive steps to mitigate the anticipated losses for the benefit of the shareholders, which among others include the leasing out of some of the Group's coke ovens to generate a fixed stream of income.

Barring any unforeseen circumstances, the Board is optimistic that the Group will be able to get through such tough and challenging time ahead.

The Group did not issue any profit forecast nor profit guarantee during the current financial period to date.
