# B. ADDITIONAL INFORMATION REQUIRED BY BURSA MALAYSIA LISTING REQUIREMENTS

#### B1. Review of performance

During the quarter under review, the Group turned into gross loss of approximately RM12.2 million compared to gross profit of approximately RM13.8 million in the preceding year corresponding quarter. This is mainly due to lower average coke price, sales volume and contribution from by-products couple with higher average coal price during the quarter under review.

By going into details, the Group recorded a consolidated revenue of RM199.8 million compared to the corresponding quarter in the preceding year of RM238.8 million. Such reduction in revenue can be primarily attributed to an 18% lower sales volume compared to that achieved in the corresponding quarter of 2018. This was brought about by the ongoing sporadic local government directive to curb production of heavy industries during certain periods over the quarter under review in an attempt to address and manage the pollution level affecting the area/region.

By virtue of the abovementioned across the board production curb on heavy industries, the average selling price of metallurgical coke was somewhat affected which saw an approximate 2% decline to RMB1,858 per tonne in the current quarter from RMB1,889 per tonne recorded in the preceding year corresponding quarter. Coupled with significantly lower contribution margin from its by-products by approximately 31% during the current quarter, the Group ended up registering an overall reduction in its total consolidated revenue in the current quarter under review of approximately 16%, compared to the preceding year corresponding quarter.

Moving in tandem with the reduction in sales volume, the Group's cost of sales saw a decrease of approximately 6% from about RM225.1 million in the previous year corresponding quarter reduced to about RM212.0 million in the current quarter under review. This was despite the fact that the average coal price saw an increase of approximately 5% from RMB1,263 per tonne in the previous year corresponding quarter to RMB1,331 per tonne in the current quarter under review.

Other income included sales of scraps and penalties/fines imposed on staff and employees who violated the company's prescribed rules and standard operating procedures during the quarter under review.

Operating expenses incurred by the Group were much higher at approximately RM15.1 million in the current quarter under review compared to approximately RM7.3 million in the same quarter last year. This was mainly due to the additional expenses incurred relation to the dry quenching facility in the current quarter under review. Other operating expense included staff salary, depreciation, minor repair and maintenance, electricity charges, etc.

After taking into consideration of the operating expenses incurred, the Group recorded a net loss of approximately RM27.3 million in the current quarter under review compared to a net profit of approximately RM6.7 million in the preceding year corresponding quarter.

Notes to the quarterly report - 30 September 2019

#### B2. Variation of results against preceding quarter

The consolidated revenue registered by the Group during the quarter under review was lower at approximately RM199.8 million compared to RM235.1 million recorded during the immediate preceding quarter ended 30 June 2019. This was primarily attributed to lower average coke price and sales volume. We saw a reduction of coke price from approximately RMB1,886 per tonne during the last quarter ended 30 June 2019 to approximately RMB1,858 per tonne in the current quarter under review. The sales volume also decreased by approximately 7% in comparison between the two quarters in question.

The cost of sales recorded by the Group during the quarter under review was approximately RM212.0 million as compared to RM239.8 million during the immediate preceding quarter ended 30 June 2019. The reduction was attributed to lower sales volume and average coal price. The average coal price was lower at approximately RMB1,331 per tonne during the quarter under review compared to approximately RMB1,371 per tonne during the immediate preceding quarter. Couple with much lower contribution margin from the by-products, the Group registered a bigger gross loss of approximately RM12.2 million in the current quarter under review compared to approximately RM4.8 million in the immediate preceding quarter ended 30 June 2019.

The Group recorded much higher operating expenses of approximately RM15.1 million during the quarter under review compared to RM2.9 million in the immediate preceding quarter ended 30 June 2019. The much higher operating expenses was mainly attributed to the payment of land use tax, property tax, environment protection tax incurred as well as the additional expenses incurred relation to the dry quenching facility during the quarter under review.

After taking into consideration of the other income and operating expenses, the Group recorded a net loss of approximately RM27.3 million during the quarter under review as compared to approximately RM7.5 in the immediate preceding quarter ended 30 June 2019.

#### B3. Current year prospects

As the result of the trade war with the United States, China's growth dropped last quarter to its lowest level in nearly three decades. The gross domestic product only grew by 6% in the third quarter, the weakest quarterly growth rate since 1992, which evidenced the continued slide in the China's economy from 6.2% recorded in the second quarter of 2019.

The Chinese statistical authority had admitted that the economy would continue to face "severe and complex external environment". In view of such circumstances, , it is generally expected that the Chinese government would step up stimulus measures to avert any drastic and/or abrupt economic slowdown by way of inducing more investment in infrastructure projects, an initiative which will be implemented vis-à-vis its continued aspiration to encourage a shift towards consumption and technology to drive the economy, moving forward.

Notwithstanding the continued downward pressures besetting the steel and coke industry stemming from the abovementioned continued slowdown in China's economy, the Group

(Company No.: 732227-T)

Notes to the quarterly report – 30 September 2019

shall continue to be vigilant to relevant consequential circumstances that may have perceivable effect on the metallurgical coke business.

Due to the lack of visibility of the coke business, the Group has to venture into and continue looking for new potential business ventures to give different revenue stream to complement the existing coke business moving forward. The Group is hopeful that the pursued new business ventures will complement well and fit into its business expansion in the coming months.

#### B4. Variation on forecast profit / Profit guarantee

The Group did not issue any profit forecast nor profit guarantee during the current financial period to date.

### B5. Current year taxation

No taxation was provided during the quarter under review.

A reconciliation of income tax expense applicable to profit before taxation at the statutory income tax rate to income tax expense at the effective income tax rate of the Group is as follows:
