PART B. NOTES PER BURSA MALAYSIA SECURITIES BERHAD LISTING REQUIREMENTS

1. Performance review

Contract Manufacturing segment

Current quarter

The contract manufacturing segment posted a 22% increase in revenue from RM6.71 million for the preceding year's corresponding quarter to RM8.19 million for the current quarter. Stocking-up of inventories by customers due to uncertainties in the run-up to the last General Elections led to a spike in production and sales. Profit before tax likewise rose to RM0.9 million, reversing the previous year's quarter loss before tax of RM173,000.

Year to date

The contract manufacturing segment posted a 19.37% increase in revenue from RM26.70 million for the 12 months ended 30th June 2017 to RM31.87 million for the 12 months ended 30th June 2018, mainly due to increase in overseas orders. The segment reported an increase in profit before tax from RM1.25 million for the preceding year to date to RM2.14 million for the current year to date, also contributed by an increase in domestic sales of 15% over the same period, driven by strong market demand for new and revamped consumer products.

Power & Telecommunication Cables Manufacturing segment (associate company)

Current quarter

The cables manufacturing segment under associate company, Fujikura Federal Cables Sdn Bhd, reported a loss after tax for the current quarter, of which the Group's share was RM1.6 million compared to a loss of RM2.1 million for the corresponding quarter of the preceding year. Revenue was down by 30% from that for the previous year resulting in a drop in gross profit which was offset by a reduction in operating expenses thereby accounting for the smaller after-tax loss reported.

Year to date

Revenue for the current year fell 17% following the completion of several overseas projects previously secured. In addition, the cables business faced severe price competition from domestic players as well as continued high raw material costs which ate into the profitability of its operations. The combination of lower sales and margins resulted in the segment suffering its share of the post-tax net loss of RM6.4 million as against a similar loss of RM2.8 million for the previous year.

Property Development segment (joint venture company)

Current quarter

Property development activities which the Group undertakes through its 50% joint venture company, 368 Segambut Sdn Bhd ("368S"), contributed a share of its profit amounting to RM1.57 million for the quarter under review as compared to a loss of RM0.64 million for the corresponding quarter in the previous year. The profit contribution arose from revenue on its units sold as well as the realization of the share of the Group's gain in its previous disposal of the related land to the joint venture company.

1. **Performance review (con'd)**

Year to date

Profit from property development for the current year to total RM0.98 million being the share of results of 368S plus the recognition of the Group's related deferred income against a share of its loss in 368S of RM0.79 million for the previous year. The joint venture generated revenue amounting to RM35.7 million as it recorded its maiden sales for the year, with a take-up rate of some 40% of Phase One of the project launched.

Others

Current quarter

Profit before tax has decreased from RM1.07 million in the corresponding quarter of the preceding year to RM0.95 million in the current quarter mainly due to lower interest income earned compare with proceeding year quarter.

Year to date

Profit before tax has declined from RM3.93 million for the preceding year to RM3.44 million for the current year mainly due to the lower interest income earned after the dividend paid out in October 2016 and also the retrenchment expenses incur on July 2017.

2. Comparison with preceding quarter's result

The quarter reported a net profit before tax of RM1.86 million as compared to a loss before tax of RM3.73 million. Apart from higher sales, the improvement in financial performance was attributed to a positive contribution from the property development segment and lower losses suffered by the cables division which incurred increased expenses arising from a staff separation scheme in the preceding quarter.

3. Commentary of Prospects

In view of the expected lower growth of the national economy in the coming months, and uncertainties in the overseas markets, the Group foresees a challenging year ahead. Nevertheless, efforts will be continued to ensure that its products will remain competitively priced and material costs controlled through a broadened network of suppliers consistent with the maintenance of product quality and innovation.

The external environment for the cables industry is fraught with unpredictability in international trade relation which, coupled with stiff competition in the domestic market, may signify a trying year ahead for the business. Nevertheless, through various measures undertaken, including cost rationalization and product innovation, the segment is anticipated to be in better stead to withstand the challenges in the coming year.

The property development segment whose performance will reflect that of the prevailing general property market is expected to contribute significantly to the Group's profitability with further growth in revenue from sales as well as progress construction of its units launched and possibly to be launched in the near future.

4. Variance on profit forecast
