NOTES TO THE QUARTERLY REPORT - 31 MARCH 2010

A1. Basis of preparation (contd.)

(a) FRS 8: Operating Segments

The Group applied this standard from financial periods beginning on 1 January 2010. As this is a disclosure standard, there is no impact on the financial position or results of the Group. This new standard requires a 'management approach', under which segment information is presented on the same basis as that used for internal reporting purposes.

(b) FRS 101: Presentation of Financial Statements

Arising from adoption of revised FRS101 which separates owner and non-owner changes in equity, the consolidated statement of changes in equity will now include only details of transactions with owners. All non-owner changes in equity are presented as a single line labelled as total comprehensive income. The Group has adopted the format of consolidated statement of comprehensive income by presenting all items of income and expense recognised in the income statement, together with all other items of recognised income and expense in one single statement. The adoption of this standard does not have any impact on the financial position and results of the Group.

(c) FRS 139: Financial Instruments: Recognition and Measurement

The Group adopted FRS139 on 1 January 2010 which has resulted in changes to accounting policies related to classification, recognition and measurement of its financial assets and liabilities as discussed below:

(i) Initial recognition and measurement

A financial instrument is recognised in the financial statements when, and only when, the Group becomes a party to the contractual provisions of the instruments. A financial instrument is recognised initially at its fair value. In the case of a financial instrument not categorised as fair value through profit or loss, the financial instrument is initially recognised at its fair value plus transaction costs that are directly attributable to acquisition or issue of the financial instrument.

An embedded derivative is recognised separately from the host contract and accounted for as a derivative if, and only if, it is not closely related to the economic characteristics and risks of the host contract and the host contract is not categorised as fair value through profit or loss. In the event that the embedded derivative is recognised separately, the host contract is accounted for in accordance with the policy applicable to the nature of the host contract.

(ii) Financial assets

Financial assets at fair value through profit or loss:

Prior to the adoption of FRS139, financial assets such as investments were accounted for at cost adjusted for amortisation of premium and accretion of discount less impairment or at lower of cost and market values, determined on an aggregate basis. With the adoption of FRS 139, the Group's short term investments are now categorised and measured as fair value through profit or loss and measured at their fair values with the gains and losses recognised in profit or loss.

NOTES TO THE QUARTERLY REPORT – 31 MARCH 2010

A1. Basis of preparation (contd.)

(c) FRS 139: Financial Instruments: Recognition and Measurement (contd.)

(ii) Financial assets (contd.)

Loans and receivables:

Prior to adoption of FRS 139, loans and receivables were stated at cost less allowance for doubtful debts. Under FRS139, an impairment loss is recognised for trade and other receivables and is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate. Gains and losses arising from the amortisation process, impairment, or derecognition of this financial assets are recognised in income statement.

(iii) Financial liabilities

The Group's financial liabilities include borrowings and trade and other payables. All financial liabilities are subsequently measured at amortised cost using the effective interest method.

In accordance with the provision of the standard, the changes are applied prospectively and the comparatives as at 31 December 2009 are not restated. Instead, the opening balances of the financial assets and financial liabilities at 1 January 2010 are restated in accordance with the transitional provisions for first-time adoption of FRS139 as follows:

Group	Before adjustment RM'000	FRS 139 adjustment RM'000	After adjustment RM'000
Trade and other receivables	244,944	(3,520)	241,424
Short term investments	101,917	1,231	103,148
Investment in associates*	283,964	537	284,501

Minority interests	(182,478)	1,246	(181,232)
Revenue reserve	(476,747)	(374)	(477,121)

^{*} Arising from the Group's share of an associate's adjustments on adoption of FRS 139.

In addition, these changes in accounting policies have the effect of increasing the profit before tax for the current quarter by RM1.59 million.

A2. Seasonal or cyclical factors

The business operations of the Group are generally non-cyclical or seasonal. Ordinarily, however, there is a lower level of activity, particularly for the Construction and Construction Material Divisions, during the 1st quarter of the year.

NOTES TO THE QUARTERLY REPORT - 31 MARCH 2010

Part B – Explanatory notes pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

B1. Review of performance

The Group's continuing operations reported a pre-tax profit of RM21.35 million for the three months ended 31 March 2010, compared to a pre-tax profit of RM9.67 million for the three months ended 31 March 2009.

The higher profit for the current period under review was due to higher profit reported by Manufacturing and Construction Materials Divisions coupled with better results of the associated companies and lower net interest expense reported by the Company as a result of higher interest income from higher cash reserves following receipt of disposal proceeds from investment in marketable securities and lower interest expense on lower amounts of borrowings.

The results of other Divisions were comparable to previous corresponding period.

B2. Material changes in profit before taxation for the quarter

The Group's pre-tax profit from continuing operations for the current quarter under review of RM21.35 million was 65% lower than the pre-tax profit of RM60.90 million in the preceding quarter.

Generally, the first quarter of the year tends to be slower due to wet weather and higher number of public holidays. The significantly high pre-tax profit in the preceding quarter was mainly attributable to the recovery of costs amounting to RM19.77 million for a major completed project by the Construction Division and the gain on disposal of Sarawak Energy Berhad shares amounted to RM16.29 million by the Company.

B3. Prospects for the year ending 31 December 2010

Whilst the operating environment faced by the Group will remain challenging, the Board expects that the prospects for the year for our continuing operations to remain satisfactory.

B4. Profit forecast or profit guarantee

Not applicable as there was no profit forecast nor profit guarantee issued.

NOTES TO THE QUARTERLY REPORT – 31 MARCH 2010

B5. Income tax expense

The effective tax rate for the current quarter year and prior year's quarter ended 31 March 2009 were higher than the statutory tax rate principally mainly due to the losses of certain subsidiaries which cannot be set off against taxable profits made by other subsidiaries and certain expenses which are not deductible for tax purposes.
