For the Period Ended 30 September 2015

A5) Unusual Items due to their nature, size or incidence

There was no item affecting assets, liabilities, net income or cash flows that were unusual because of their nature, size or incidence for the current quarter and financial period under review.

A6) Changes in prior estimates of amounts which materially affect the current interim period

During the current financial quarter, the Company's subsidiary, CCM Duopharma Biotech Berhad Group (CCMD Group) conducted operational review of the following:-

- a) Useful life of existing Oral Solid Dosage (OSD) plant (K1) in Klang.

CCMD Group will be building a new state of the art OSD plant (to be named as K3) to replace K1. Construction of K3 is expected to commence in first half of 2016 and it will take around 3 years to complete. Upon completion of K3 with newly enhanced GMP features, the operation of K1 will be relocated to K3. In view of above firm plan, K1 will have a finite useful life of approximately 5 years, and hence necessitate the need to accelerate depreciating current net book value with effect from 01/01/2015. The effect of accelerated depreciation, recognized in cost of sales, in current quarter/period to date and future financial years is as follows:-

	YTD Sept 2015	FY2015	FY 2016	FY 2017	FY 2018	FY2019
Increase in depreciation expense (RM '000)	1,207	1,609	1,609	1,609	1,609	1,609

- b) Provision for slow moving stock from 12 months to expiry date to 6 months to expiry date.

The review was necessary in view of implementation of new stability guidelines which imposes stringent requirements for extrapolations of proposed shelf life based on stability data. Revised requirement on storage conditions will result in newly registered products and also existing registered products to carry shelf life of less than 3 years. The effect of the revised provision of slow moving stock is a gain of an estimated amount of RM4.9 million which was recognised in cost of sales for the current quarter under review.

Save as disclosed above, there were no material changes in prior year estimates which would materially affect the current interim period.

A7) Issuances, cancellations, repurchases, resale and repayments of debt and equity securities

There was no issuance, cancellation, repurchase, resale and repayment of debt and equity securities during the period under review save for repayment of term loan of RM130 million matured on 30 April 2015.

The number of Treasury Shares held as at end of the current period under review was 2,998,000.

A12) Effect of changes in the composition of the Group

On 30 June 2015, the Company completed the disposals of entire equity interest, owned directly or indirectly, in its subsidiaries namely, CCM Pharmaceuticals SdnBhd, Innovax SdnBhd, CCM Pharma SdnBhd, Upha Pharmaceutical Manufacturing (M) SdnBhd, CCM Pharmaceuticals (S) Pte Ltd and CCM International (Philippines) Inc to its other subsidiaries namely CCM Duopharma Biotech Berhad (CCMD) and Duopharma Manufacturing Sdn Bhd. The transfer of shares created one flagship holding company, CCMD, for the Pharmaceutical Division; and is not expected to have any material financial impact to the Group.

Save as disclosed, there were no changes in the composition of the Group for the period under review.

A13) Changes in contingent liabilities or contingent assets since the last annual balance sheet date

During financial year 2014, PT CCM Indonesia ("PTCCMI"), a subsidiary of the Company appealed against tax auditor's assessment with respect to year of assessment 2011. The contingent liability involved in the tax appeal amounted to IDR36,100,000,000 (equivalent to approximately RM9.7 million). The hearing of the appeals was concluded on 29th July 2015 and the matter is now pending decision from the Indonesian Tax Court.

Save as disclosed, there are no changes in contingent liabilities or assets as at end of the current interim financial period.

For the Period Ended 30 September 2015

Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

B1) Review of Performance

Commentary for Individual Quarter ended 30 September 2015

For the current quarter ended 30 September 2015, the Group recorded revenue of RM271.4 million, higher by 2.9% compared to the corresponding quarter last year. The Group's profit before tax for the current quarter under review increased to RM9.9 million from RM0.5 million recorded in the same quarter last year.

Pharmaceuticals Division's revenue for the quarter was RM81.4 million, increased by 3% compared to the same quarter last year observed mainly in the over-the-counter (OTC) market. The Division recorded profit before tax of RM14.3 million, an increase of 82.5% as compared to the corresponding quarter last year. The increase was mainly due to improved margin on both its OTC and ethical segments, coupled with the positive net impact on changes on estimates amounting to RM4.5 million as stated in Note A6.

Chemicals Division recorded revenue of RM77.1 million during the quarter under review. This was 7.6% higher compared to the same quarter last year primarily attributed to higher selling prices of its products. The Division recorded a higher profit before tax of RM5.2 million, an increase of 47.8% as compared to the corresponding quarter last year, primarily due to improved margin in its products, and savings from its operational efficiency initiatives.

Fertilizers Division recorded revenue of RM115.0 million during the quarter under review. This was 2.2% lower compared to the same quarter last year primarily affected by lower demand for compound fertilizers amidst low crude palm oil prices. This has put pressures on plantation houses to cut costs and delay procurement of fertilizers. Lower revenue coupled with higher raw material costs due to weakening of Ringgit against US Dollar, resulted in the division's loss before tax for the quarter under review of RM7.6 million.

Commentary for Cumulative Quarters ended 30 September 2015

For the nine months period ended 30 September 2015, the Group recorded revenue of RM775.1 million. This was lower by RM73.4 million or 8.7% as compared to the corresponding period last year. Lower sales were recorded mainly by Fertilizers Division. Despite the lower sales, the Group recorded a profit before tax of RM23.6 million for the period under review equivalent to an increase of 78.7% from RM13.2 million in the same period last year, contributed by improvement in financial performances of the Pharmaceuticals and Chemicals Divisions.

Pharmaceuticals Division recorded revenue of RM245.4 million for the period under review, an increase of 6.3% as compared to the same period last year. Profit before tax increased by RM9.9 million (or 43.8%) from RM22.7 million in the same period 2014 to RM32.7 million in the current period. The higher profit recorded in the current period was primarily attributable to overall improvement in gross margins in both Ethical and OTC segments, further assisted by higher revenue recorded in the period, and the positive net impact of RM3.7 million on changes in estimates as stated in Note A6.

CHEMICAL COMPANY OF MALAYSIA BERHAD (5136-T)

(Incorporated in Malaysia)

For the Period Ended 30 September 2015

B1) Review of Performance (continued)

Chemicals Division recorded revenue of RM217.5 million during the period under review, representing an increase of 1.1% as compared to the corresponding period last year. The higher revenue recorded during the period was primarily due to higher selling prices of its products cushioning the impact of lower sales volume from its regional businesses. Division's profit before tax improved by 54.7% to RM18.4 million for the period under review, from RM11.9 million in the corresponding period last year. The increase in profit was largely attributable to higher selling prices of its products and savings from its operational efficiency initiatives.

The Fertilizers Division recorded revenue of RM304.9 million during the period under review. This was 23.9% lower compared to the same period last year, contributed by the lower volume of compound and straight fertilisers sold during the period. This was attributed by low crude palm oil prices during the period, putting pressures on those industries to cut costs and delay procurement of fertilizers. The Division suffered a loss before tax of RM14.3 million compared to a loss of RM12.1 million in the corresponding period last year. The major contributors to the loss position recorded during the period under review were the lower revenue, rising raw material costs and weakening of Ringgit against US Dollar.

B2) Material changes in the Quarterly Results compared to the results of the Preceding Quarter

The Group's revenue for the current quarter of RM271.4 million was higher by RM37.8 million (or 16.2%) as compared to the immediate preceding quarter revenue of RM233.6 million. This was primarily driven by higher sales of fertilizers in the current quarter mainly due to increase in off take in the plantation sector. The Group recorded profit before tax of RM9.9 million during the quarter compared to a profit of RM3.4 million in the preceding quarter.

B3) Prospects

The demand for pharmaceuticals products is expected to remain relatively stable throughout the financial year. The prospects for the Pharmaceuticals Division remain positive as it consolidates its position in the local and regional markets, continuation of focus in Biotherapeutics, niche therapeutic areas and Halal leadership in the pharmaceuticals space.

For Chemicals Division, the chloralkali and polymer coating businesses continue to perform positively although the markets remain competitive. The Division is implementing continuous improvement program to extract operational savings and striving to increase its trading margin for the current financial year, while expanding its customer base within the region.

The demand of fertilizers is expected to remain challenging in view of expectation of crude palm oil (CPO) prices remaining low and plantation houses implementing cost savings measures. The proposed closure of fertilizers plant in Shah Alam and the retrenchment exercise to be conducted (as announced to Bursa Malaysia on 1 September 2015), is expected to have a negative impact to the Group's financial performance in the current year.

Albeit a challenging business environment amidst volatility of currencies and low commodity prices, the Group remains steadfast in improving production efficiency and cost effectiveness across all of its business divisions. The Group will continue to capitalise on growth prospects across all its business operations while maintaining focus on operational efficiency, in its commitment to deliver sustainable earnings moving forward.
