# NOTES TO THE INTERIM FINANCIAL REPORT – 4<sup>TH</sup> QUARTER ENDED 31 DECEMBER 2009

#### (I) Compliance with Financial Reporting Standard ("FRS") 134: Interim Financial Reporting

#### (a) Accounting Policies and Methods of Computation

The interim financial report has been prepared in accordance with Financial Reporting Standard ("FRS") 134: "Interim Financial Reporting" and paragraph 9.22 of Bursa Malaysia Securities Berhad ("Bursa Securities") Listing Requirements. The figures for the cumulative period have been audited.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the financial year ended 31 December 2008. The accounting policies and methods of computation adopted for the interim financial statements are consistent with those adopted for the annual audited financial statements for the financial year ended 31 December 2008.

#### (b) Seasonal or Cyclical Factors

On an overall basis, the business operations of the Group's Leisure & Hospitality Division and Plantation Division are subject to seasonal fluctuations. The results of the Leisure & Hospitality Division are affected by major festive seasons and holidays. Fresh fruit bunches ("FFB") production is seasonal in nature. Production of FFB normally peaks in the second half of the year but this cropping pattern can be affected by changes in weather conditions. More detailed commentary is set out in Notes 1 and 2 in Part II of this interim financial report.

# (c) Unusual items Affecting Assets, Liabilities, Equity, Net Income or Cash Flow

Included in the Group's interim financial report for the current financial year ended 31 December 2009 are impairment losses in respect of the following:

- i) In August 2009, Walker Digital Gaming, LLC ("WDG") restructured its business operations. Arising from this, Genting Malaysia Berhad ("GENM") (formerly known as Resorts World Bhd and is 48.7% owned by the Company) reviewed its long term investment in WDG for potential impairment. Consequently, an impairment loss of RM48.6 million, which is the excess of the carrying value over the recoverable amount, has been charged by GENM to the Income Statement;
- ii) GENM Group had accounted for its investment in Genting Hong Kong Limited (formerly known as Star Cruises Limited) ("Genting HK") as an "available-for-sale financial asset" ("AFS") in compliance with FRS 139, which is measured at its fair value based on Genting HK's quoted share prices. Any gain or loss arising from a change in the fair value of the AFS has been recognised directly in equity, through the statement of changes in equity.

Pursuant to paragraph 61 of FRS 139, a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is objective evidence of impairment. Consequently, a fair value loss of RM30.4 million representing the decline in Genting HK's share price to USD0.08 per share as at 31 March 2009 from the GENM Group's carrying value of USD0.085 per share as at 31 December 2008 was recognised in the income statement.

Subsequently, Genting HK's share price rose to USD0.26 per share as at 31 December 2009. The Group's share of this fair value gain of RM432.0 million in the investment in Genting HK was recognised directly in equity through the statement of changes in equity.

iii) exploration costs of RM75.7 million, which represented the capitalised costs of one of the Group's oil and gas projects. As the Group has decided not to proceed with further exploration work, these capitalised costs are charged out to the Income Statement and recognised as impairment loss.

Other than the above, there were no other unusual items affecting the assets, liabilities, equity, net income or cash flows of the Group for the current quarter and current financial year ended 31 December 2009.

#### Quarter ended 31 December 2009 compared with quarter ended 31 December 2008

The Group registered a revenue of RM2,320.1 million in the current quarter compared with RM2,390.2 million in the previous year's corresponding quarter, a decrease of 3%. Plantation, Property and Power divisions recorded higher revenue whilst the other business divisions recorded lower revenue.

The higher revenue from the Plantation Division arose from the higher palm products prices and higher FFB production.

Revenue from the Power Division increased in the current quarter mainly attributable to the higher generation of electricity by the Meizhou Wan power plant.

Revenue from Resorts World Genting ("RWG") and the GENS Group's UK casino operations declined in the current quarter compared with the previous year's corresponding quarter. Despite the higher volume of business recorded by RWG, the weaker luck factor in the premium players business in the current quarter led to a decline in the revenue. The UK casinos recorded lower business volume and lower win % which resulted in a lower revenue generated in the current quarter. This decrease was further exacerbated by the weakening of the Sterling Pound against the Ringgit Malaysia.

Despite the higher average oil price in the current quarter, the revenue from the Oil & Gas Division decreased compared with that in the previous year's corresponding quarter due to the lower share of oil entitlement in China.

The Group recorded a profit before tax of RM585.7 million in the current quarter compared with a loss of RM108.9 million in the previous year's corresponding quarter. The loss had been due mainly to the GENM Group's impairment loss of RM781.5 million on its investment in Genting HK.

The higher Plantation Division profit is mainly attributable to the higher revenue.

Both the Kuala Langat and Meizhou Wan power plants contributed to a higher profit of the Power Division in the current quarter. The loss suffered by the Power Division in the previous year's corresponding quarter was due mainly to the one-off contribution in lieu of windfall profit levy by the Kuala Langat power plant and the reduced generation of electricity and higher cost of coal supply for the Meizhou Wan power plant.

The lower profit recorded by RWG and the UK casinos in the current quarter resulted from the lower revenue generated. In addition, the increase in pre-opening costs incurred for Resorts World Sentosa contributed to the lower profit of the Leisure & Hospitality Division in the current quarter.

The lower revenue and higher costs resulted in a lower profit from the Oil & Gas Division in the current quarter.

Included in the share of results of jointly controlled entities and associates for the current quarter is a reversal of the share of loss of GENS's jointly controlled entity as a result of an improvement in property values in London, UK.

# Financial year ended 31 December 2009 compared with previous financial year ended 31 December 2008

Group's revenue for the current financial year ended 31 December 2009 was RM8,893.6 million, a decrease of 2% compared with the previous financial year ended 31 December 2008. All business divisions recorded a decrease in revenue with the exception of the Power Division.

Higher revenue was recorded by RWG due to the higher volume of business. However, the luck factor in the premium players business was weaker in the current financial year. The UK casinos generated lower revenue as a result of lower business volume and lower win % due to poor luck factor. The decrease was further exacerbated by the weakening of the Sterling Pound against the Ringgit Malaysia.

Revenue from the Plantation Division declined in the current financial year due to lower palm products prices and lower FFB production.

The lower revenue from the Property Division was due to softer property market conditions.

The higher share of oil entitlement in China which was offset by lower average oil prices in the current financial year resulted in a lower revenue from the Oil & Gas Division.

The higher revenue from the Power Division arose mainly from the Meizhou Wan power plant which had a higher generation of electricity in the current financial year.

The Group's profit before tax for the current financial year was RM2,528.4 million, an increase of 46% compared with the previous financial year. The previous financial year's profit had been impacted by impairment losses of RM1,178.0 million. Impairment losses for the current financial year amounted to RM157.0 million. All business divisions recorded lower profit compared with the previous financial year other than the Power Division.

Profit from RWG decreased compared with previous financial year despite the higher revenue. This was due to weaker luck factor in the premium players business. UK casinos showed an improvement in profit due largely to stringent cost control and significantly lower operating overheads. The profit of the Leisure & Hospitality Division has also been impacted by the significant increase in pre-operating expenses incurred by Resorts World Sentosa, mainly in relation to staff costs as the integrated resort begins to accelerate its recruitment, training, sales and marketing programs prior to its launch.

The lower profit from the Plantation Division was mainly due to lower revenue.

Lower profit from the Oil & Gas Division was due to lower revenue and higher costs incurred.

The higher profit from the Power Division was due mainly to the improved performance of the Meizhou Wan power plant which arose primarily from higher revenue and lower coal prices. In addition, the one-off contribution in lieu of the annual windfall profit levy had also impacted the Power Division's profit in the previous financial year.

The share of results in jointly controlled entities is lower in the current financial year. The share of results in associates in the current financial year is also lower due mainly to a lower share of profit from the Indian power plants and an associate which had one-off income in the previous financial year.

## Material Changes in Profit Before Taxation for the Current Quarter as compared with the immediate Preceding Quarter

The Group registered a profit before tax of RM585.7 million in the current quarter compared with a profit before tax of RM805.5 million in the preceding quarter, a decrease of 27%.

RWG recorded a lower profit in the current quarter due mainly to weaker luck factor in the premium players business. The UK casinos also recorded lower profit despite a higher business volume. This was due to lower luck factor in the current quarter.

The lower profit from the Oil & Gas Division was due to higher costs incurred in the current quarter.

The Plantation Division recorded a higher profit mainly due to higher FFB production although palm products prices were slightly lower in the current quarter.

The higher profit from the Power Division was due mainly to higher generation of electricity in the current quarter by the Meizhou Wan power plant.

The higher profit in the preceding quarter was also attributable to writeback of allowance for diminution in value of investments. This was offset by impairment losses of RM126.6 million charged out in the preceding quarter. The current quarter's profit included a reversal of the share of loss of GENS's jointly controlled entity.

#### 3. Prospects

The performance of the Group for the 2010 financial year may be impacted as follows:

- (a) prospects for the leisure and hospitality industry in 2010 are expected to improve as the regional tourism market will continue to grow with new attractions, affordable air travel and rising affluence. Whilst the industry becomes more competitive, the GENM Group will continue to develop and implement innovative strategies to increase visitations to Resorts World Genting;
- (b) the general UK economy has been poor and the economic forecasts indicate a slow and weak recovery. The economic slowdown has had a material impact on disposable income for some time and the GENS management expects the situation to continue. As a result, the trading revenue of the UK casino operations have been and can be expected to continue to be adversely affected. Against the current economic climate, the GENS management has implemented a series of cost cutting measures in 2008 and 2009 resulting in a lower cost structure to mitigate the impact of the revenue reduction and will continue to remain vigilant on measures for improvement;
- (c) the performance of Meizhou Wan power plant could continue to be affected by lower than expected tariff increases which are being negotiated, and a spike in coal prices in recent months. The contribution from the Group's Indian power investments is expected to improve with the partial commissioning of a new 366 MW gas fired power plant in Andhra Pradesh, India on 1 December 2009. The plant is expected to operate on a combined cycle basis from mid-2010; and
- (d) RWSPL's opening of its first four hotels, casino and Universal Studios in Singapore.

#### 4. Variance of Actual Profit from Forecast Profit

## Interest Rate Swap ("IRS") and Hedging Transactions

ii) On 10 March 2008, the Group had drawndown a loan amounting to SGD104.925 million which was subjected to floating interest rate based on SGD Swap Offer Rate ("SGD SOR"). Of this loan, a total of SGD31.058 million has been repaid.

iii) As at 5 February 2010, the Group had made a final loan drawndown amounting to a total of SGD4.0 billion which were subjected to floating interest rate based on SGD SOR.

The Group has entered into IRS agreements to hedge 75% of the total loan approved as follows:

Transaction Date	Effective Date of Commencement	Maturity Dates	Outstanding Contract Amounts SGD'000
20 March 2008	30 September 2008	06/02/2010 to 31/12/2011	1,500,000
02 June 2008	30 September 2008	06/02/2010 to 31/12/2011	200,000
09 June 2008	30 September 2008	06/02/2010 to 31/12/2011	500,000
15 July 2008	30 September 2008	06/02/2010 to 31/12/2011	300,000

Total			3,000,000

The above IRS agreements effectively fix the interest rate payable on that tranche of the loan from the respective effective dates of commencement of contracts and up to their respective maturity dates as set out above.

iv) The Group has a revolving credit loan balance of GBP35 million for the current financial period which was subjected to floating interest rate based on LIBOR together with the IRS agreements as follows:

Transaction Date	Effective Date of Commencement	Maturity Dates	Outstanding Contract Amounts GBP'000
09 April 2008	11 April 2008	04/05/2010	70,000

The net result of the above IRS agreement effectively fixes the interest rate payable on the loan from the effective date of commencement of contract and up to the maturity date as set out above.

The fair value of the outstanding interest rate swap contracts of the Group which has not been recognised at the balance sheet date was an unfavourable net position of RM217.8 million.

These instruments are executed with creditworthy financial institutions and the Directors are of the view that the possibility of non-performance by these financial institutions is remote on the basis of their financial strength.

The Group uses derivative financial instruments including interest rate swap and currency swap agreements in order to limit the Group's exposure in relation to its underlying debt instruments resulting from adverse fluctuations in interest rates or foreign currency exchange rates and to diversify sources of funding. The related interest differentials under the swap agreements are recognised over the terms of the agreements in interest expense.
