NOTES TO THE INTERIM FINANCIAL REPORT – 2nd QUARTER ENDED 30 JUNE 2011

(I) Compliance with Financial Reporting Standard (“FRS”) 134: Interim Financial Reporting

(a) **Accounting Policies and Methods of Computation**

The interim financial report is unaudited and has been prepared in accordance with Financial Reporting Standard (“FRS”) 134: “Interim Financial Reporting” and paragraph 9.22 of Bursa Malaysia Securities Berhad (“Bursa Securities”) Listing Requirements. The financial information for the current half year ended 30 June 2011 have been reviewed by the Company’s auditor in accordance with the International Standards on Review Engagements (“ISRE”) 2410 – Review of Interim Financial Information Performed by the Independent Auditor of the Entity.

The interim financial report should be read in conjunction with the audited financial statements of the Group for the financial year ended 31 December 2010. The accounting policies and methods of computation adopted for the interim financial statements are consistent with those adopted for the annual audited financial statements for the financial year ended 31 December 2010 except for the adoption of new FRSs, amendments and IC Interpretations that are mandatory for the Group for the financial year beginning 1 January 2011.

The adoption of these new FRSs, amendments and IC interpretations do not have a material impact on the interim financial information of the Group except for the adoption of the FRSs as set out below:

Revised FRS 3 “Business Combinations”

The revised standard continues to apply the acquisition method to business combinations but with some significant changes compared with FRS 3. For example, all payments to purchase a business are recorded at fair value at the acquisition date, with contingent payments classified as debt subsequently remeasured through the profit or loss. There is a choice on an acquisition-by-acquisition basis to measure the non-controlling interest in the acquiree either at fair value or at the non-controlling interest’s proportionate share of the acquiree’s net assets. All acquisition-related costs are expensed. The Group has adopted this revised standard prospectively to all business combinations from 1 January 2011.

Revised FRS 127 “Consolidated and separate financial statements”

The revised standard requires the effects of all transactions with non-controlling interest to be recorded in equity if there is no change in control and these transactions will no longer result in goodwill or gains and losses. All earnings and losses of the subsidiary are attributed to the parent and the non-controlling interests, even if the attribution of losses to the non-controlling interests results in a debit balance in the shareholders’ equity. Profit or loss attributable to non-controlling interests for prior years is not restated. The standard also specifies the accounting when control is lost. Any remaining interest in the entity is remeasured to fair value, and a gain or loss is recognised in profit or loss. The Group has adopted this revised standard prospectively to transactions with non-controlling interests from 1 January 2011.

Amendments to FRS 7 “Financial Instruments: Disclosures”

The amendment promotes enhanced disclosures on fair value measurement of financial instruments via the introduction of the concept of the fair value hierarchy. There is no financial impact on the results of the Group as these changes only affect disclosures.

IC Interpretation 4 “Determining whether an arrangement contains a lease”

The interpretation requires the Group to identify any arrangement that does not take the legal form of a lease, but conveys a right to use an asset in return for a payment or series of payments. This interpretation provides guidance for determining whether such arrangements are, or contain, leases. The assessment is based on the substance of the arrangement and requires assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset and the arrangement conveys a right to use the asset. If the arrangement contains a lease, the requirements of FRS 117 “Leases” should be applied to the lease element of the arrangement. The adoption of this interpretation does not have any impact to the Group.

IC Interpretation 12 “Service concession arrangements”

The interpretation applies to contractual arrangements whereby a private sector operator participates in the development, financing, operation and maintenance of infrastructure for public sector services. Depending on the contractual terms, this interpretation requires the operator to recognise a financial asset if it has an unconditional contractual right to receive cash or an intangible asset if it receives a right (license) to charge users of the public service. Some contractual terms may give rise to both a financial asset and an intangible asset.

Genting Power China Limited (“GPCL”), an indirect wholly owned subsidiary of the Company, has applied the provision of this interpretation on its power plant located in Meizhou Wan, in the Fujian Province of China. Consequently, GPCL has now recognised its right on the power plant as an intangible asset as compared to its previous recognition of the power plant as property, plant and equipment and leasehold land use rights. The intangible asset is amortised over its period of the concession of 21.5 years. The application of this interpretation has been accounted for retrospectively in accordance with FRS 108 “Accounting Policies, Changes in Accounting Estimates and Errors” and certain comparative balances have been restated.

The table below shows the effects of the adoption of IC Interpretation 12 to the Group:

The adoption of this interpretation does not have any impact to the earnings per share of the Group in the current and corresponding prior periods.

(b) **Seasonal or Cyclical Factors**

On an overall basis, the business operations of the Group's Leisure & Hospitality Division and Plantation Division are subject to seasonal fluctuations. The results of the Leisure & Hospitality Division are affected by major festive seasons and holidays. Fresh fruit bunches ("FFB") production is seasonal in nature. Production of FFB normally peaks in the second half of the year but this cropping pattern can be affected by changes in weather conditions. More detailed commentary is set out in Notes 1 and 2 in Part II of this interim financial report.

(c) **Unusual items Affecting Assets, Liabilities, Equity, Net Income or Cash Flow**

There were no unusual items affecting the assets, liabilities, equity, net income or cash flows of the Group for the current half year ended 30 June 2011.

(d) **Material Changes in Estimates**

There have been no significant changes made in estimates of amounts reported in prior financial years.

(e) **Changes in Debt and Equity Securities**

- i) The Company issued 638,000 new ordinary shares of 10 sen each, for cash, arising from the exercise of options granted under the Genting Executive Share Option Scheme ("ESOS") at an exercise price of RM2.616 and RM2.868 per ordinary share for the current half year ended 30 June 2011.
- ii) During the current half year ended 30 June 2011, the Company had repurchased a total of 20,000 ordinary shares of 10 sen each of its issued share capital from the open market for a total consideration of RM0.2 million. The repurchased transactions were financed by internally generated funds. The repurchased shares are held as treasury shares in accordance with the requirements of Section 67A (as amended) of the Companies Act, 1965.

Other than the above, there were no other issuance, cancellation, repurchase, resale and repayment of debt securities of the Group and equity securities of the Company for the current half year ended 30 June 2011.

(f) **Dividends Paid**

No dividend has been paid during the current quarter ended 30 June 2011.

(g) **Segment Information**

The segments are reported in a manner that is consistent with the internal reporting provided to the chief operating decision maker whereby the Group's business is considered from both a geographic and industry perspective. The performance of the operating segments is based on a measure of adjusted earnings before interest, tax, depreciation and amortisation ("EBITDA"). This measurement basis also excludes the effects of non-recurring items from the operating segments, such as net fair value gains and losses, gain or loss on disposal of financial assets, impairment losses, pre-opening, development expenses, property related termination costs and construction profit as well as assets written off, gain or loss on disposal of assets and share-based payment expenses.

* This represents the contract revenue and costs for the construction and development of the facility at the Aqueduct Racetrack in the City of New York, United States of America ("Resorts World New York"). Genting Malaysia Berhad ("GENM") Group, which is 49.4% owned by the Company, had accounted for the construction and development of the facility in accordance with FRS 111 "Construction Contracts". The contract revenue and costs of approximately RM627.7 million and RM599.3 million respectively, have been recorded in the consolidated income statement during the current half year ended 30 June 2011. The construction profit of RM28.4 million arising from the construction and development of the facility is recognised based on the percentage of completion method.

(h) **Valuation of Property, Plant and Equipment**

Property, plant and equipment, which are stated at revalued amounts, have been brought forward without amendment from the previous annual financial statements.

(i) **Material Events Subsequent to the end of the financial period**

There were no material events subsequent to the end of the current half year ended 30 June 2011 that have not been reflected in this interim financial report.

(j) **Changes in the Composition of the Group**

On 20 April 2011, Mastika Lagenda Sdn Bhd ("MLSB"), an indirect 97.7% owned subsidiary of the Company, acquired an additional 15% equity interest in Genting Sanyen Power Sdn Bhd ("GSP") from BG Overseas Holdings Limited for a cash consideration of RM183.75 million. Consequently, MLSB's shareholding in GSP increased from 60% as at 1 January 2011 to 75% as at 20 April 2011.

Other than the above, there were no other material changes in the composition of the Group for the current half year ended 30 June 2011.

(k) **Changes in Contingent Liabilities or Contingent Assets**

Other than the disclosure of the material litigation made in Note 12 in Part II of this interim financial report, there were no other significant changes in the contingent liabilities or contingent assets since the last financial year ended 31 December 2010.

(l) **Capital Commitments**

Quarter ended 30 June 2011 compared with quarter ended 30 June 2010

The Group registered total segment revenue of RM4,099.7 million in the current quarter compared with RM4,085.1 million in the previous year's corresponding quarter. The profit before tax was RM1,548.5 million, which represented a decrease of 3% compared with RM1,593.2 million in the previous year's corresponding quarter.

The decrease in revenue in the Leisure & Hospitality Division was attributed mainly to the unfavourable win percentage in the premium players business of the Singapore Integrated Resort ("Singapore IR"). Consequently, the adjusted earnings before interest, tax, depreciation and amortisation ("EBITDA") of the Singapore IR was lower than that of the previous year's corresponding quarter. Strong growth was however recorded in Universal Studios Singapore ("USS") and the hotels.

Revenue from the leisure and hospitality business in Malaysia increased in the current quarter due to higher hold percentage in the premium players business. The adjusted EBITDA likewise increased compared with the previous year's corresponding quarter. Despite an increase in the business volume of the casino operations in UK, the lower hold percentage has resulted in a negative adjusted EBITDA in the current quarter.

Higher revenue and higher adjusted EBITDA from the Power Division was mainly due to higher dispatch by the Meizhou Wan power plant as well as the higher tariff rate for 2011.

The increase in the Plantation Division's revenue and adjusted EBITDA in the current quarter was principally due to higher palm products prices and higher FFB production.

The share of results in jointly controlled entities and associates increased in the current quarter mainly due to the higher profits generated by the Indian power plants.

The profit before tax for the current quarter included:

- gain on disposal of available-for-sale financial assets by GENS of RM112.3 million;
- construction profit of RM15.0 million generated from the progressive development of the facility at Resorts World New York; and
- property related termination costs of RM39.4 million incurred on the purchase of the properties in the City of Miami, Florida, United States of America.

Half year ended 30 June 2011 compared with half year ended 30 June 2010

Total segment revenue increased by 21% during the current half year, from RM7,198.8 million in 2010 to RM8,724.3 million in 2011. The Group's profit before tax increased to RM3,439.1 million, an increase of 92% compared with RM1,793.2 million in 2010. The increase in revenue and adjusted EBITDA came mainly from the Leisure & Hospitality, Power and Plantation divisions.

Revenue from the Singapore IR increased compared with revenue in the first half of 2010 due to a first full half year of operations. The higher revenue contributed to the higher adjusted EBITDA in the current half year. The revenue and adjusted EBITDA of the leisure and hospitality business in Malaysia increased in the current half year due to higher hold percentage in the premium players business.

The increase in revenue of the Power Division arose mainly from the Meizhou Wan power plant as a result of higher dispatch in the current half year. The current half year revenue had also included a compensation from the Fujian provincial government in respect of an increase in tariff rate. The increase in the adjusted EBITDA was attributable to the higher revenue in the current half year.

The Plantation Division's revenue and adjusted EBITDA in the current half year increased due mainly to higher palm products prices and higher FFB production.

There was no revenue from the Oil & Gas Division following the disposal of Genting Oil & Gas (China) Limited ("GOGCL") on 10 December 2010. GOGCL was involved in oil & gas development and production. The loss incurred during the current half year arose mainly from general and administrative expenses.

The Group's profit before tax for the current half year included:

- gain on disposal of available-for-sale financial assets by GENS of RM112.3 million;
- construction profit of RM28.4 million generated from the progressive development of the facility at Resorts World New York; and
- property related termination costs of RM39.4 million.

The previous half year's profit before tax had included the following one-off items:

- net impairment loss of RM1,303.8 million; and
- net gain on dilution of RM436.3 million from the dilution of the Company's shareholding in GENS when the remaining Second Convertible Bonds were fully converted into new ordinary shares of GENS during the previous year's half year.

2. Material Changes in Profit Before Taxation for the Current Quarter as compared with the immediate Preceding Quarter

The Group registered a profit before tax of RM1,548.5 million in the current quarter compared with RM1,890.6 million in the preceding quarter, a decrease of 18%. Other than the Plantation Division, the adjusted EBITDA of the other divisions was lower in the current quarter.

The win percentage in the premium players business from the Singapore IR for the current quarter was significantly lower than the theoretical win and that of the preceding quarter thus resulting in a lower adjusted EBITDA in the current quarter. However, there was strong growth in the volume and earnings from the Singapore IR's non-gaming segment in the current quarter, with USS drawing 40% more visitors compared with the preceding quarter.

The UK casinos reported a loss in the current quarter compared with an adjusted EBITDA in the preceding quarter due to lower hold percentage despite the increase in the business volume in the current quarter.

The lower adjusted EBITDA from the Power Division was due to the lower dispatch in the current quarter by the Meizhou Wan power plant. In addition, the preceding quarter's adjusted EBITDA had included the compensation from the Fujian provincial government in respect of an increase in tariff rate for the Meizhou Wan power plant.

The Plantation Division's adjusted EBITDA was higher than the preceding quarter mainly due to higher FFB production although palm products prices were lower.

The current quarter's profit before tax included:

- gain on disposal of available-for-sale financial assets by GENS of RM112.3 million; and
- property related termination costs of RM39.4 million.

3. Prospects

The performance of the Group for the remaining period of the current financial year may be impacted as follows:

- (a) The GENM Group is cautious on the outlook of the leisure and hospitality industry as the global economy is showing signs of increasing uncertainties. Global growth prospects for the remaining period of the year are expected to be challenging. In Malaysia, the GENM Group continues to face intense regional competitive pressures. Whilst it is encouraged by its recent performance, the GENM Group remains focused on expanding measures to address regional competition, besides pursuing on-going yield management strategies and increasing efforts to capture the growth in the premium players business;
- (b) The Singapore IR's growth is most encouraging not only from a short term perspective but more importantly, it continues to establish the Singapore IR as the premier resort destination for the affluent in Asia. RWS continues to build on the Singapore IR's appeal with new attractions. The Maritime Experiential Museum will open in October 2011, followed by the world-wide debut of Transformers – a major blockbuster attraction in USS in December 2011.

At the end of this year, RWS will add more luxury rooms at the Singapore IR's high end West Zone. There will be larger suites and magnificent luxurious villas. Each of these villas has its own swimming pool, access to a beautifully landscaped environment and views of the spectacular sunset over the Straits. These accommodation, when fully completed by first quarter of 2012, will be highly complementary to RWS's vision to be the playground for the rich and famous in Asia;

- (c) In the United Kingdom ("UK"), the operating environment continues to be challenging as the pace of UK's economic recovery remains uncertain. Amidst this economic backdrop, the GENM Group continues to focus its efforts on leveraging the GENM Group's established business links with Asia and revitalisation of its provincial casinos, while maintaining momentum in its premium players and provincial businesses;
- (d) In the United States, Resorts World New York is expected to mark its debut in the 4th quarter of 2011. This resort will provide an additional leisure attraction to the city of New York, given its close proximity to the city centre and ease of accessibility;
- (e) The performance of the Power Division may be affected by higher coal prices which will however be mitigated by an increase in tariff rate for the Meizhou Wan power plant which has been agreed with the provincial government and expected higher summer generation hours; and
- (f) The performance of Genting Plantations Berhad Group is expected to be better than that of the previous financial year.

4. Variance of Actual Profit from Forecast Profit

The Group did not issue any profit forecast or profit guarantee for the year.

5. Taxation

The breakdown of tax charges for the current quarter and half year ended 30 June 2011 are set out below:

	Current quarter RM'000	Current financial year-to-date RM'000
Current taxation		
Malaysian income tax charge	228,166	444,112
Foreign income tax charge	53,714	76,914
	<u>281,880</u>	<u>521,026</u>
Deferred tax charge	51,475	246,189
	<u>333,355</u>	<u>767,215</u>
Prior period taxation		
Income tax under provided	1,594	1,889
Deferred tax under provided	15,882	26,326
	<u>350,831</u>	<u>795,430</u>

The effective tax rate of the Group before adjustments in respect of prior period taxation for the current quarter and half year ended 30 June 2011 is lower than the statutory income tax rate mainly due to income subjected to different tax jurisdictions and income not subjected to tax, partially offset by expenses not deductible for tax purposes.

6. Profit on Sale of Unquoted Investments and/or Properties

The results for the current quarter do not include any profit or loss on sale of unquoted investments and properties which are not in the ordinary course of business of the Group.

7. Quoted Securities other than Securities in Existing Subsidiaries and Associates

- (a) The dealings in quoted securities for the current quarter and half year ended 30 June 2011 are as follows:
