Domestic income tax is calculated at the Malaysian statutory rate of 24% of the estimated assessable profit. Taxation for other jurisdictions is calculated at the rates prevailing in the respective jurisdictions.

The effective tax rate (excluding the results of associate and joint venture which is equity accounted net of tax) was lower than the statutory tax rate mainly due to certain income not being taxable for tax purposes.

Basic earnings per share amounts are calculated by dividing profit for the period, net of tax attributable to owners by the number of ordinary shares outstanding during the period.

The Group continues to focus on its long-stated strategic plan to broaden its income base by channeling substantial resources to further expand the Metering business. The Metering business contributes substantially to the Group's profit, and now exports to over 40 countries around the world.

The Group's order book, currently standing at just over RM5 billion, will continue to provide earnings visibility over the next few years. The Group is also continuing to explore opportunities in the Regional railway space, leveraging on the expertise it has cultivated through its participation as the rail systems specialist in past domestic MRT and LRT projects. The Group's extensive network with global rail specialists stands it in good stead for projects that require international collaborations through joint ventures or other forms of strategic alliances.
