1. ACCOUNTING POLICIES (CONTINUED)

The Group and the Company are exempted from disclosing the possible impact, if any, to the financial statements upon the initial application of FRS 139.

The adoption of revised FRS 124 give rise to additional disclosures but did not result in significant changes in accounting policies of the Group. The principal changes in accounting polices and effects resulting from the adoption of FRS 117: Leases are discussed below.

FRS 117 - Leases

Prior to 1 January 2007, leasehold land and building was classified as aircraft, property, plant and equipment and was stated at cost less accumulated depreciation and impairment losses. The adoption of the revised FRS 117 has resulted in a change in the accounting policy relating to the classification of leases of land and buildings.

Leases of land and buildings are classified as operating or finance leases in the same way as leases of other assets and the land and buildings elements of a lease of land and buildings are considered separately for the purpose of lease classification. Leasehold land held for own use is now classified as operating lease and where necessary, the minimum lease payments or the up-front payments made are allocated between the land and the buildings elements in proportion to the relative fair values for leasehold interests in the land element and buildings element of the lease at the inception of the lease. The up-front payment represents prepaid lease payments and are amortised on a straight-line basis over the lease term.

The Group has applied the change in accounting policy in respect of leasehold land in accordance with the transitional provisions of FRS 117. The reclassification of leasehold land from aircraft, property, plant and equipment to prepaid land lease payments has been accounted for retrospectively in the balance sheets. As at 31 December 2006, the total unamortised amounts of leasehold land amounting to RM91.8 million are retained as the carrying amount of prepaid land lease payments and are amortised on a straight-line basis over their remaining lease terms. However, the adoption of the revised FRS 117 has no financial effect on the income statements.

The effects on the balance sheet as at 31 December 2007 and restatement of comparatives are as follows:

Effects on balance sheets as at 31 December 2007:

Aircraft, property, plant and equipment			RM'000 (17,613)
Prepaid lease payments on land		:=	17,613

^{*} The restated figure is prior to reclassification to conform with current year's presentation in Note 17 of Part A.

1. REVIEW OF PERFORMANCE

The Group recorded a higher operating profit of RM260.8 million for the fourth quarter ended 31 December 2007 (Quarter ended 2006: RM148.6 million) due to higher operating revenue and improved yields. Cost incurred/residual value sharing on sale of aircraft by Penerbangan Malaysia Berhad and gains on sale of properties are reclassified under profit from operations since the quarter ended 30 September 2007. The previous quarter's presentation has been restated to conform with the current quarter's presentation.

2. COMPARISON WITH PRECEDING QUARTER'S RESULTS

Operating revenue for the quarter increased to RM4,009.6 million from RM3,780.7 million in the preceding quarter. Operating profit for the quarter decreased from RM376.4 million to RM260.8 million and profit after tax for the quarter decreased from RM364.6 million to RM242.3 million, against preceeding quarter. In addition, preceeding quarter results recorded RM220.6 million residual value sharing on sale of aircraft by Penerbangan Malaysia Berhad and RM51.7 million gains on sale of properties.

3. CURRENT YEAR PROSPECTS

The outlook for the aviation industry in 2008 will be more difficult than 2007 in view of the high and volatile of oil price, slower global economic growth, possible US recession, environmental concerns, greater liberalisation as well as excess capacity. Thus, IATA has forecasted a slow down in international passenger growth in 2008 to 5.4% whereas freight will be slightly higher at 5% compared to last year.

For the next quarter, demand is projected to be weaker due to the low season in Europe, US, North Asia and Middle East except for the Chinese markets during the Lunar New Year. Competition in Malaysian markets is keener with increased frequencies and capacity being offered by our competitors on both domestic and Asean routes. In addition, key long haul trunk routes will also face intense competition with additional A380s being delivered during the year.

In order to meet the new challenges this year and beyond, MAS has introduced the new Business Transformation Plan ("BTP 2") which serves as a continuation to the Business Turnaround Plan ("BTP 1") implemented in 2006 and lays out the strategies it will take and is currently taking in becoming a Five Star Value Carrier ("FSVC"), an airline that provides 5-star products and services at affordable prices.

In line with the MAS BTP 2, management will continue to intensify efforts to generate and sustain its profitability. Project Delta has been introduced to radically cut costs in the Operations and Engineering & Maintenance areas without in anyway compromising on safety and security standards. In addition, further structural cost savings are expected through initiatives in the procurement, distribution and electronic-ticketing areas. With these initiatives, MAS will be in a better position to offer competitive fares, reinforce improvements in revenue and yield management to sustain the improvements seen in 2006 and 2007. More importantly, MAS will strive to maintain its highest quality of products and services to retain its 5-Star airline ranking and continue to be the airline of choice for its customers.

The Board of Directors is of the opinion that MAS' result for the year 2007 has exceeded the scorecard for 2007 (Definition: 'targets', 'exceeding' and 'outstanding' set at 'RM50 million - RM99 million', 'RM100 million - RM299 million' and 'RM300+ million' respectively).

For 2008, the company's aspiration in BTP 2 is to achieve RM400 - RM550 million (target), RM551 - RM650 million (exceeding) and RM651 - RM1000+ million (outstanding).

PART C - ADDITIONAL INFORMATION

1. ECONOMIC PROFIT

- (a) As prescribed by the GLC Transformation Programme, the reporting of economic profit ("EP") is made every quarter. EP is an indicative measure of value creation by the business in a specific period. It reflects how much return a business has generated after operating expenses and capital costs.
- (b) The EP of the Group for the quarter and year ended 31 December 2007 is RM268.6 million (2006: RM91.4 million) and RM453.8 million (2006: Economic Loss of RM394.7 million) respectively. The improvement in the EP is consistent with the improvement in the Group's results as a result of the BTP initiatives undertaken since 2006.

Although the EP may have some usefulness in terms of giving an indication of the return after deducting the cost of the resources it employs, it should not be used in isolation as an indicator of a company's performance nor is it a predictor of future performance. The EP results on their own may also give misleading results or trends.
