### B. Explanatory Notes Pursuant to Appendix 9B of the Listing Requirements of Bursa Malaysia Securities Berhad

#### 1. Performance Review

Revenue for the financial period ended 31 March 2020 of RM339.5 million was 10.2% lower than last year. The decrease was attributable to reduction in selling prices for industrial paper and paper packaging products coupled with reduction in sales volume for industrial paper and paper packaging products.

However, profit before tax of RM24.2 million improved by 14.1% for financial period ended 31 March 2020 compared to 2019. This was mainly due to the lower cost of sales of industrial paper and paper packaging products in the first quarter of 2020 compared to previous year same quarter. In addition, there was a reduction in the finance costs by 22% in first quarter of 2020 compared to previous year same period due to the significant reduction in bank borrowings as of 31 March 2020 compared to 31 March 2019 and the downward revision in Overnight Policy Rate from 3.25% in March 2019 to 2.50% in March 2020.

#### **Manufacturing Division**

Revenue of the Manufacturing Division for the financial period ended 31 March 2020 of RM310.3 million was reduced by 9.8% compared to previous year corresponding period. This was mainly due to reduction in sales volume by appropriately 5% for industrial paper and paper packaging products compared to the previous year same period. Sales activities were affected by the implementation of MCO in mid of March 2020 to control the spread of COVID-19.

However, profit margin for the financial period ended 31 March 2020 of 9.3% has improved from 7.1% in the previous year corresponding period. This was attributable to the drop in cost of recovered paper and paper which form a substantial part of the raw materials for paper mills and paper packaging products.

#### **Trading Division**

Revenue of the Trading Division for the financial period ended 31 March 2020 decreased by 14.3% with reduction in segment profit by more than 50% compared to previous year corresponding period. The deterioration in revenue and profit was mainly due to reduction in selling prices and sales volume of recovered paper in the Trading Division.

#### 2. Comparison with Preceding Quarter

Revenue for the first quarter in 2020 of RM339.5 million decreased by 20.9% compared to the preceding last quarter in 2019 of RM429.2 million. This was mainly due to the year-end peak season for school bookshop operations under the Trading Division and reduction in sales volume from the Manufacturing Division during the MCO period.

However, there was an improvement in profit before tax of RM24.2 million reported in the first quarter of 2020 by 31.8% against the preceding quarter of RM18.3 million. It was mainly attributable to the lower paper costs under Manufacturing Division and partially offset by lower profitability from the recovered paper and school bookstore operations under the Trading Division in the current quarter.

#### 3. Commentary on Prospects

Malaysia's economic prospects for 2020 is being severely affected by the COVID-19 pandemic. Strict measures to contain the spread of the pandemic, both globally and domestically, will weigh considerably on both external demand and domestic growth.

Consequently, the Malaysia Government has introduced several Economic Stimulus Packages which provides the necessary aids to various corporates from different industries and individuals. With the recent announcement of the Recovery Movement Control Order on 10 June 2020, more businesses and social activities have resumed in line with the improving COVID-19 situation in the country. In view of these positive elements, economic activities are expected to gradually pick up in the second half of 2020 with further improvement expected in 2021.

Given the ongoing COVID-19 pandemic and the uncertainties in global economic environment, numerous measures have been put in place to address the prolonged challenges on the Group's prospect for the financial year ending 31 December 2020. The Group is committed to be more agile with greater focus on cost control and to ensure sufficient liquidity during this period.
