Errors

A. FRS (Financial Reporting Standards) 134 - Paragraph 16

A1. Accounting policies

The interim financial statements of the Group have been prepared in accordance with the requirements of FRS 134 - Interim Financial Reporting and Chapter 9, Part K of the Listing Requirements of Bursa Malaysia Securities Berhad ("BMSB").

The accounting policies and methods of computation used in the preparation of the interim financial statements are consistent with those used in the preparation of the annual financial statements for the financial year ended 31 December 2005, except for the adoption of the following new and revised Financial Reporting Standards ("FRS") that are effective for financial periods beginning on or after 1 January 2006 :-

FRS 3	Business Combinations
FRS 5	Non-current Assets Held for Sale and Discontinued Operations
FRS 101	Presentation of Financial Statements
FRS 102	Inventories
FRS 108	Accounting Policies, Changes in Accounting Estimates and Err
FRS 110	Events after the Balance Sheet Date
FRS 116	Property, Plant and Equipment
FRS 121	The Effects of Changes in Foreign Exchange Rates
EDG 107	

- FRS 127 Consolidated and Separate Financial Statements
- FRS 128 Investments in Associates
- FRS 131 Interests in Joint Ventures
- **FRS 132** Financial Instruments: Disclosure and Presentation
- FRS 133 Earnings Per Share
- FRS 136 Impairment of Assets
- FRS 138 Intangible Assets
- FRS 140 **Investment Property**

The adoption of the above FRS does not have significant financial impact on the Group except for FRS 3, FRS 5 and FRS 101 disclosed as follows:

(a) FRS 3 : Business Combinations

The adoption of the new FRS 3 have resulted in a change in the accounting policy relating to Goodwill and Negative Goodwill on consolidation and Premium or Discount on acquisition of Associated companies.

Goodwill on consolidation

Previously Goodwill on consolidation of a subsidiary company is capitalised and amortised on a straight line basis over its estimated useful life or 25 years whichever is shorter. With the adoption of FRS 3, goodwill will now be carried at cost less impairment losses. Goodwill will be tested for impairment annually, or more frequently if events or changes in circumstances indicate that it might be impaired. Impairment loss is recognised in the income statement and subsequent reversal is not allowed.

Negative Goodwill on consolidation

Negative Goodwill on consolidation is previously either taken to income statement as or when they arise or retained in balance sheet and credited to income statement over a suitable period, depending on the particular circumstances which gave rise to it. With the adoption of FRS 3, Negative Goodwill is now taken to income statement as and when they arise.

Premium and Discount in Associated companies

Previously Premium & Discount on acquisition of associated companies are retained as part of investment cost. With the adoption of FRS 3, Premium will be carried at cost subject to yearly impairment test while Discount is taken to income statement on acquisition.

The above changes in accounting policy have been accounted for prospectively and in accordance with the transitional provisions of FRS 3, the Group has taken Negative Goodwill on consolidation and Discount in associated companies as at 31 December 2005 to retained profits as follows :-

	As previously		As
	reported	Effect	restated
Balance Sheets	RM'000	RM'000	RM'000
Investment in associates	633,826	(27,141)	606,685
Retained profit brought forward	2,713,438	50,279	2,763,717
Minority interests	803,656	397	804,053
Negative Goodwill on consolidation	23,535	(23,535)	-

The Group has ceased amortisation of its Goodwill and Negative Goodwill on consolidation and has reduced the total amortisation charges by RM236,000 in the current quarter ended 31 March 2006.

(b) FRS 5: Non-current Assets Held for Sale and Discontinued Operations

The non-current assets held for sale comprise the Group's investment in an associated company, Konsortium Abass Sdn Bhd ("ABASS"), and certain landed properties, including leasehold properties. In accordance with FRS 5, the Group has ceased to equity account for its share of profit in ABASS, and ceased to amortise the leasehold properties.

The effect of adopting FRS 5 has resulted in a reduction in the Group's share of results in associated companies by RM1.79 million for the current quarter. The effect of ceasing to amortise the abovementioned leasehold properties is insignificant.

(c) FRS 101 : Presentation of Financial Statements

The adoption of the revised FRS 101 has affected the presentation of the minority interests and other disclosures in the income statement, balance sheet and statement of changes in equity.

In the consolidated income statement, minority interests are presented as an allocation of the total profit or loss for the period as oppose to as a deduction before arriving at profit attributable to shareholders.

While in the consolidated balance sheet, minority interests are now presented within total equity. Similarly the movement of the minority interests for the reported period is presented in the consolidated statement of changes in equity.

Share of associated results is now reported net of tax as a single line item above the Group profit before taxation.

The revised FRS 101 has also give rise to new classes of assets and liabilities which are required to be reported on the face of the consolidated balance sheet. The comparatives are restated to conform with the new presentation as follows :-

	As previously reported RM'000	Effect RM'000	As restated RM'000

B. BMSB Listing Requirements (Part A of Appendix 9B)

B1. Review of Performance for the current quarter and financial year-to-date

The Group revenue of RM2.681 billion for the period ended 31 March 2006 is 4% higher when compared with RM2.584 billion in the corresponding period last year mainly due to an increase in sales volume of edible oils and higher refined palm product prices realised.

Group profit before tax of RM139 million was 6% lower compared with RM149 million in the same quarter last year. The sugar refining division recorded lower profits due to higher raw material prices whilst profits from the edible oils refining division also declined due to lower refining margins and higher fuel costs. The plantation division registered higher profits mainly due to a translation gain of USD loans arising from the strengthening of the Indonesian Rupiah. The grains trading, flour and feed milling division and the associated company engaged in commodity trading achieved higher profits for the current period under review.

B2. Material changes in the quarterly results compared to the results of the preceding quarter

The Group profit before tax for the quarter under review of RM139 million was 12% lower compared with RM158 million for the preceding quarter mainly due to lower profits from the oil palm plantation and edible oils refining divisions. The film exhibition and distribution, property investment and development, chemicals trading and manufacturing divisions also recorded lower profits in this quarter.

B3. Prospects for current financial year

Crop production from the oil palm plantation division is projected to be higher for the current financial year whilst operating and financing costs are expected to increase. Assuming CPO prices and the Indonesian Rupiah/USD exchange rates remain at current levels, profit contribution from the oil palm plantation division is expected to be satisfactory. Sugar refining operations are likely to record lower profits in 2006 due to high raw sugar prices. The Group's other business operations are expected to maintain their profits as in the previous year. Overall, it is envisaged that the Group performance for the year will remain satisfactory.

B4. Variance of actual profit from forecast profit Not applicable.

B10. Off Balance Sheet Financial Instruments

Foreign Currency Contracts

The Group enters into forward foreign exchange contracts as a hedge for its confirmed sales and purchases in foreign currencies. The purpose of hedging is to protect the Group against unfavourable movement in exchange rate. Gains or losses from changes in the fair value of foreign currency contracts offset the corresponding losses or gains on the receivables and payables covered by the instrument.

As at 17 May 2006, the Group has hedged outstanding foreign currency contracts of USD164.032 million equivalent to RM593.067 million. These contracts are short term and majority are due to mature within the next two months.

There is minimal credit risk because these contracts are entered into with licensed financial institutions.

Besides a small fee, there is no cash requirement for these instruments.

Commodities Futures Contracts

The Group enters into commodity future contracts to hedge its exposure to price volatility in palm oil commodities. Gains and losses on contracts which are no longer designated as hedges are included in the income statement.

There is minimal credit risk because these contracts are entered into through the Bursa Malaysia Derivatives.

Besides a small fee, the Group is required to place margin deposit for these outstanding contracts.

As at 17 May 2006, the Group's outstanding CPO futures contracts that were entered into as hedges on sales amounted to RM0.73 million in notional value. The outstanding CPO futures contracts matures in July 2006.
