Group performance review

For the first quarter of 2020, the Group recorded total revenue of RM1.07 billion, 8% lower as compared to 1Q2019 of RM1.16 billion. Pre-tax profit was at RM201 million, 28% lower as compared to RM280 million recorded in 1Q2019, core group profit was lower by 59%, whilst contribution from Wilmar International Limited ("Wilmar") was also lower by 14% at RM165 million.

Grains and agribusiness

Segment revenue was lower by 2% at RM809 million (1Q2019: RM826 million) mainly due to lower flour sales in Indonesia and Malaysia as well as lower selling prices of livestock. Segment profit decreased by 9% to RM54 million (1Q2019: RM60 million) as a result of weaker contribution from the Indonesia flour mills, and lower selling prices for livestock, partially offset by higher profits from feed division as well as contribution from the China associates.

Consumer products

Segment revenue for 1Q2020 was lower by 3% at RM160 million (1Q2019: RM164 million). For 1Q2020, the segment reported a loss of RM26,000 (1Q2019: profit of RM1.7 million) due mainly to lower sales of in-house products.

Film exhibition and distribution

Segment revenue for 1Q2020 declined by 39% to RM78 million from RM127 million a year ago. The Covid-19 pandemic has lead to a deferment of movie title releases by major distributors and closure of cinemas which resulted in a 42% decline in cinema admissions. The segment recorded a loss of RM19 million for 1Q2020, as compared to a profit of RM18 million recorded in 1Q2019, mainly due to lower contribution from box office collection and cinema admissions.

Environmental engineering and utilities

Segment revenue and profit for 1Q2020 were lower at RM32 million (1Q2019: RM35 million) and RM2 million (1Q2019: RM4 million) respectively. The decrease was mainly due to lower contribution from on-going projects as recognition of project revenue was affected by the Movement Control Order ("MCO") and reduced operational capacity.

Property

For 1Q2020, segment revenue remained relatively unchanged at RM13 million. The segment recorded a loss of RM2.5 million for 1Q2020 (1Q2019: profit of RM2.8 million), mainly attributable to lower rental income and lower contributions from associates.

Other operations

The segment recorded a profit of RM172 million in 1Q2020 (1Q2019: RM204 million). Profit contribution from Wilmar for 1Q2020 was RM165 million, 14% lower as compared to 1Q2019 of RM193 million.

B2. Material changes in the quarterly results compared to the results of the preceding quarter

Group pre-tax profit was lower at RM201 million in 1Q2020 (4Q2019: RM389 million) mainly due to lower contribution from Wilmar at RM165 million (4Q2019: RM308 million) and the *Film exhibition and distribution* segment which recorded a loss of RM19 million (4Q2019: profit of RM12 million).

B3. Prospects

The Malaysia economy moderated sharply to 0.7% in the first quarter of 2020. The moderation reflected the impact of measures taken both globally and domestically to contain the spread of the Covid-19 pandemic. The global and Malaysian economic outlook for 2020 will be significantly impacted by the Covid-19 pandemic as strict measures to contain the spread of the pandemic, will weigh considerably on both external demand and domestic growth.

The Malaysian economy is expected to contract in the second quarter. This reflects the longer duration of containment measures both globally and domestically. As these containment measures are eased and the domestic Movement Control Order ("MCO") is lifted, economic activity is expected to gradually improve in 2H2020. The sizable fiscal, monetary and financial measures and progress in transport-related public infrastructure projects will provide further support for growth in 2H2020. In line with the projected improvement in global growth, the Malaysian economy is expected to register a positive recovery in 2021.

Whilst the Grains & agribusiness segment is in the production of essential food products, and it was allowed to operate during the MCO with conditions; there were, however, demand challenges as well as supply chain disruptions that it needs to deal with during this period. In addition, the on-going foreign exchange market volatility may affect production costs and margins. The business segment will remain vigilant and react swiftly to changing consumer demand and operating landscape and aims to deliver a satisfactory set of results.

The Consumer products segment, likewise, is facing consumer demand and supply challenges since the outbreak of the pandemic, particularly evolving changes in consumer buying preferences and behaviours. The business segment will remain agile and adaptive whilst maximising its extensive delivery footprint. Performance of the Consumer products segment is expected to be satisfactory.

The Film exhibition and distribution segment is expected to be significantly impacted by the prolonged MCO and disruptions from the Covid-19 pandemic. As a result, most blockbuster movies have been postponed to the later part of 2020 and 2021. Various cost-reduction and stringent cash flow management measures have been put in place to meet operational requirements. New promotions and initiatives are planned to bring customers back to the cinemas for the second half of the year.

The Environmental engineering and utilities segment will continue to focus on replenishing its order book and exploring new project opportunities.

Performance of the *Property* segment is expected to be challenging, both in investment properties and property development. Various measures are being put in place to address the reduced footfall in our malls as well as slower sales of properties brought about by the Covid-19 pandemic.

On the back of a challenging operating environment which will affect the Film exhibition and distribution and Property segments, the Group's other main business segments are expected to perform satisfactorily. Wilmar's performance will continue to contribute substantially to the overall profitability of the Group.

Futures and options contracts

The Group is exposed to market risk mainly from fluctuations in the prices of agricultural commodities, namely wheat and corn which are the key raw materials used in the Group's *Grains and agribusiness* segment. Commodity futures and options contracts are entered into with the objective to mitigate and hedge against the volatility of commodity prices. It is the policy of the Group to hedge only in contracts with corresponding underlying commodities that are used in its grains and agribusiness activities.

Forward foreign currency contracts

The Group enters into foreign currency forward contracts to minimise its exposure to foreign currency risks as a result of transactions denominated in currencies other than its functional currency. Under the Group's policy, foreign currency hedging is only considered for committed transactions and shall not exceed 100% of the committed amount.

There have been no significant changes since the end of the previous financial year ended 31 December 2019 in respect of the following:

- (i) the credit risk, market risk and liquidity risk associated with the derivatives;
- (ii) the cash requirements of the derivatives;
- (iii) the policies in place for mitigating or controlling the risks associated with the derivatives; and
- (iv) the related accounting policies.

(b) Fair value changes of financial instruments

The derivative financial instruments are recognised at fair value on contract dates and subsequently remeasured at fair value through profit or loss. The resulting gain or loss from the re-measurement is recognised in the income statement. Fair value changes are dependent on the market prices of derivatives as at liquidation date and end of reporting period.

For 1Q2020, net fair value loss on derivative financial instruments amounted to RM4.1 million (1Q2019: RM2.4 million gain).

B10. Material litigation
