2. Changes in Accounting Policies (Cont'd)

FRSs, Amendments to FRSs and Interpretations (Cont'd)

Other than disclosed below, the application of the above FRSs, Amendments to FRSs and Interpretations did not result in any significant changes in the accounting policies and the presentation of the financial results of the Group.

a) FRS 3: Business Combinations (Revised)

FRS 3 (Revised) introduces significant changes to the accounting for business combinations, both at the acquisition date and post-acquisition, and requires greater use of fair values. In addition, all transaction costs, other than share and debt issue costs, will be expensed as incurred. This revised standard will be applied prospectively and therefore there will not have any financial impact on the financial statements of the Group for the current financial year but may impact the accounting for future transactions or arrangements.

b) FRS 127: Consolidated and Separate Financial Statements (Revised)

FRS 127 (Revised) requires accounting for changes in ownership interests by the Group in a subsidiary, while maintaining control, to be recognised as an equity transaction. When the Group losses control of a subsidiary, any interest retained in the former subsidiary will be measured at fair value with the gain or loss recognised in profit or loss. The revised standard also requires all losses attributable to the minority interest to be absorbed by the minority interest instead of by the parent. The Group will apply the major changes to FRS 127 (Revised) prospectively and therefore, there will not have any financial impact on the financial statements of the Group for the current financial year but may impact the accounting for its future transactions or arrangements.

3. Auditors' Report on Preceding Annual Financial Statements

15. Review of Results

For the quarter under review, the Group turnover was RM156.7 million as compared to RM177.7 million in the 1Q2010, representing a decrease of RM21.0 million (11.8%). However, the Group pre-tax profits increased by 1851.6% to RM16.6 million as compared to 1Q2010 loss of RM0.947 million. This is mainly attributed to the timber division.

Quarter 1, 2011

Timber

For the current quarter, the Group stimber division registered a turnover of RM121.1 million, representing a decrease of 18.2% or RM26.9 million as compared with RM147.9 million in the 1Q2010. The decrease in revenue is due to the drop in log production by approximately 34.0% caused by the bad weather condition experienced in Sarawak since the second half of 2010. This gave rise to a shortage of log supply in the industry which also resulted to lower production volume in the plywood mills. Plywood volumes were 22.1% lower than 1Q2010.

15. Review of Results (Cont'd)

Quarter 1, 2011 (Cont'd)

Timber (Cont'd)

During this quarter, cost of production increased by approximately 20% which saw a similar increase in average selling prices of the Group timber products. The main cost component that caused the increase in cost of production were royalty rate for logs and costs directly related to rise in oil prices, mainly; fuel, transportation and glue costs. The prolonged shortage of logs and the sudden surge of demand in timber products from Japan after the March 2011 earthquake and tsunami also caused the rise in average selling prices of timber products. The average selling prices for both logs and plywood increased by approximately 58% and 20.5% respectively compared to 1Q2010. Accordingly, the division recorded pretax profits of RM12.9 million as compared to pre-tax loss of RM1.2 million recorded in 1Q2010, an increase of 1175.0%. The Group key export markets for round logs were India (84%), China (13%) and the remaining 4% to Asian countries. The Group key plywood markets for the quarter in review were Japan (88%), and Taiwan (12%).

Non-Timber Manufacturing and Trading

The non-timber manufacturing and trading division recorded a turnover of RM34.9 million for the quarter under review when compared to 4Q2010¢s turnover of RM30.8 million, an increase of RM4.1 million. It recorded a pre-tax profit of RM3.4 million as compared to pre-tax profit of RM0.8 million registered in 4Q2010. The increase in both turnover and pre-tax profit was mainly due to improvement in both local and overseas demand and a more favourable product mix.

16. Material Changes for the Quarter Reported on as Compared with the Preceding Quarter

Quarter 1, 2011

Timber

The timber division turnover for 1Q2011 was RM121.1 million as compared to RM149.6 million in 4Q2010, representing a decrease of 19.1% or RM28.6 million. Despite the decrease in revenue, the division still recorded pre-tax profits of RM12.9 million, a 4.4% drop in profits compared to 4Q2010 of RM13.5 million pre-tax profits. This is mainly due to overall increase in cost of production for the division caused by the recent increase in oil prices and royalty rate for logs.

16. Material Changes for the Quarter Reported on as Compared with the Preceding Quarter (Cont'd)

Quarter 1, 2011 (Cont'd)

Non-Timber Manufacturing and Trading

The non-timber manufacturing and trading division recorded a turnover of RM34.9 million in 1Q2011 as compared with RM29.0 million in 1Q2010, representing an increase of 20%.

Despite the rising raw materials costs and strengthening of Malaysian Ringgit, this quarter under review still registered a higher pre-tax profit of RM3.4 million as compared with RM0.6 million in 1Q2010, this was mainly due to better margins in product mix and in tandem with an increase in turnover.

17. Current Year Prospects

Quarter 1, 2011

Timber

Demand for new homes in Japan showed signs of recovery before the nation strongest earthquake on March 11, with housing starts gaining for nine straight months, the longest streak since 1996. However, the economy took a bigger hit than anticipated, with a trade deficit in April as exports tumbled at the fastest pace in 18 months on supply chain disruptions. Factory output dropped by 15.3 percent from February and household spending plunged 8.5 percent from a year earlier. Housing starts dropped for the first time in 10 months to 63,419 units and are expected to continue to fall as developers withhold sales of some of its projects. Despite the above, increased demand for certain plywood products is expected to remain strong as temporary homes are being built to house the more than 100,000 peopleø displaced from their homes arising from the earthquake and tsunami. The Japanese government is also expected to announce its second budget for reconstruction after the approval of its first 4 trillion yen (USD 49 billion) budget this month which the Group believes would further strengthen the demand for timber products.

The quarter in review saw continued bad weather condition which hampered log production and consequently reduced plywood production. In the last few weeks, Sarawakøs weather condition has improved which makes log harvesting activities a lot of more conducive. Accordingly, barring unforeseen circumstances, the Group expects production volume in its plywood millsøto increase in the coming quarters.

17. Current Year Prospects (Cont'd)

Quarter 1, 2011 (Cont'd)

Timber (Cont'd)

The recent renewed concerns over the state of economies of Greece, Ireland and Portugal coupled with the geopolitical tension in the Middle East have reignited worries of yet another slowdown in the worldøs major economies. There are also concerns that Greece will probably default on its debt with Ireland and Portugal following suit. In light of the current events, the Group will remain cautious of the prospect of the timber industry and shall continue to strive to maintain the quality of its premium plywood products and maintain a formidable presence in the industry.

Non-Timber Manufacturing and Trading

The performance of non-timber division continued to show recovery with improved results in 1Q2011 as a result of better product mix and increased demand in overseas markets despite the several uncertainties in global financial and economic crises.

The Group anticipated the remaining year of 2011 continued to be challenging amid the fears about Greece finances and Europe spreading debt crisis. These events may add further pressure to the ongoing global economy recovery.

Barring unforeseen circumstances, the Group will continue to maintain its competitive advantage by streamlining its supply chain, focusing on its core products and strengthening branding, provide quality assurance and service to deliver differentiation to the customers.
