Notes

#### **1.** Basis of Preparation

The interim financial statements are unaudited and have been prepared in accordance with the requirements of Financial Reporting Standards ("FRS") 134: Interim Financial Reporting and Chapter 9, Part K of the Listing Requirements of the Bursa Malaysia Securities Berhad ("Bursa Securities").

The interim financial statements should be read in conjunction with the audited financial statements for the year ended 31 December 2010. These explanatory notes attached to the interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the financial year ended 31 December 2010.

#### 2. Changes in Accounting Policies

The significant accounting policies adopted in the unaudited interim financial statements are consistent with those adopted in the Group's audited financial statements for the year ended 31 December 2010, except that the Group has adopted the new / revised standards mandatory for annual periods beginning on or after 1 January 2011 that have an impact on the Group, detailed below:

### 2. Changes in Accounting Policies (Cont'd)

#### FRSs, Amendments to FRSs and Interpretations (Cont'd)

Other than disclosed below, the application of the above FRSs, Amendments to FRSs and

Interpretations did not result in any significant changes in the accounting policies and the presentation of the financial results of the Group.

#### a) FRS 3: Business Combinations (Revised)

FRS 3 (Revised) introduces significant changes to the accounting for business combinations, both at the acquisition date and post-acquisition, and requires greater use of fair values. In addition, all transaction costs, other than share and debt issue costs, will be expensed as incurred. This revised standard will be applied prospectively and therefore there will not have any financial impact on the financial statements of the Group for the current financial year.

#### b) FRS 127: Consolidated and Separate Financial Statements (Revised)

FRS 127 (Revised) requires accounting for changes in ownership interests by the Group in a subsidiary, while maintaining control, to be recognised as an equity transaction. When the Group losses control of a subsidiary, any interest retained in the former subsidiary will be measured at fair value with the gain or loss recognised in profit or loss. The revised standard also requires all losses attributable to the non-controlling interests to be absorbed by the non-controlling interests instead of by the parent. The Group will apply the major changes to FRS 127 (Revised) prospectively and therefore, there will not have any financial impact on the financial statements of the Group for the current financial year.

#### 3. Malaysian Financial Reporting Standards

On 19 November 2011, the Malaysian Accounting Standards Board (MASB) issued a new MASB approved accounting framework, the Malaysian Financial Reporting Standards (MFRS Framework).

The MFRS Framework is to be applied by all Entities Other Than Private Entities for annual periods beginning on or after 1 January 2012, with the exception of entities that are within the scope of MFRS 141 Agriculture (MFRS 141) and IC Interpretation 15 Agreements for Construction of Real Estate (IC 15), including its parent, significant investor and venturer.

#### 3. Malaysian Financial Reporting Standards (Cont'd)

The Group will be required to prepare financial statements using the MFRS Framework in its first MFRS financial statements for the year ending 31 December 2012. In presenting its first MFRS financial statements, the Group will be required to restate the comparative financial statements to amounts reflecting the application of MFRS Framework. The majority of the adjustments required on transition will be made, retrospectively, against opening retained profits.

The Group has established a project team to plan and manage the adoption of the MFRS Framework.

The Group has not completed its assessment of the financial effects of the differences between Financial Reporting Standards and accounting standards under the MFRS Framework. Accordingly, the financial performance and financial position as disclosed in these financial statements for the year ended 31 December 2011 could be different if prepared under the MFRS Framework.

The Group considers that it is achieving its scheduled milestones and expects to be in a position to fully comply with the requirements of the MFRS Framework for the financial year ending 31 December 2012.

#### 4. Auditors' Report on Preceding Annual Financial Statements

The auditors' report on the financial statements for the year ended 31 December 2010 was not qualified.

#### 5. Comments about Seasonal or Cyclical Factors

#### 16. Review of Results

For the quarter under review, the Group's turnover was RM210.6 million as compared to RM180.2 million in the 4Q2010, representing an increase of RM30.4 million (16.8%). The Group's pre-tax profit was RM20.5 million as compared to RM13.7 million in the 4Q2010, representing an increase of RM6.8 million (49.6%). This is mainly attributed to the timber division.

#### Quarter 4, 2011

#### Timber

For the current quarter, the Group's timber division registered a turnover of RM173.3 million, representing an increase of 16.6% or RM24.7 million as compared with RM148.6 million in the 4Q2010. Its pre-tax profit stood at RM17.3 million in the current quarter, reflecting an increase of 28.1% or RM3.8 million when compared to RM13.5 million registered in the 4Q2010. This is mainly due to the better weather condition experienced during this quarter as compared to 4Q2010.

On a year-to-date (YTD) basis, the timber division registered a turnover of RM537.0 million, representing a decrease of 11.5%, as compared to the previous corresponding period of RM606.9 million. The division recorded pre-tax profit of RM65.1 million compared to a pre-tax profit of RM33.5 million registered in the previous corresponding period. The continued abnormal wet weather condition experienced in the first half 2011 and Japan earthquake and tsunami in March 2011 contributed to the increase in timber prices.

## **16.** Review of Results (Cont'd)

Quarter 4, 2011 (Cont'd)

## Timber (Cont'd)

On a year-on-year (YOY) basis, average round log prices decreased 3.5% compared to prices registered in 4Q2010, whilst sales volume increased by 29.1%. The increase in sales volume was due to better weather condition experienced during the fourth quarter 2011 as compared to fourth quarter 2010. On a YTD basis, average round log prices increased 24.2% whilst volume decreased by 13.5%. The prolonged bad weather condition which started during the third quarter 2010 has caused log production volume to drop significantly in the first half 2011. The Group's key export markets for round logs were India (75%), China (12%) and the remaining 13% exported to other Asean countries.

As for the Group's plywood division, sales volume for the quarter in review decreased by 4.2% compared to 4Q2010 whilst average selling prices increased by 10.8%. On a YTD basis, average plywood prices were higher by 20.6%, whilst sales volume decreased by 24.8%. As with log sales volume, the bad weather condition experienced during the first half 2011 has resulted in log shortage for the production of plywood. The Group's key plywood markets for the quarter in review were Japan (81%) and Taiwan (19%).

## Non-Timber Manufacturing and Trading

The non-timber manufacturing and trading division recorded a turnover of RM36.5 million as compared with RM30.8 million in 4Q2010, representing an increase of 18.5% or RM5.7 million. This is mainly due to continued surge in overseas demand in foil products.

The pre-tax profit recorded an increase of RM2.7 million or 337.5% when compared to RM0.8 million registered in 4Q2010 as a result of increase mainly in export sales in foil products.

### 17. Material Changes for the Quarter Reported on as Compared with the Preceding Quarter

#### Quarter 4, 2011

#### Timber

The material changes for the quarter reported on as compared with the preceding quarter arose from both timber and non-timber manufacturing and trading division. The timber division recorded an increase in turnover of RM173.3 million as compared to 4Q2010's turnover of RM148.6 million, with pre-tax profit of RM17.3 million when compared to 4Q2010's pre-tax profit of RM13.5 million. This is mainly attributed by increase in sales of plywood products.

#### Non-Timber Manufacturing and Trading

The turnover for non-timber manufacturing and trading division remains unchanged at RM36.5 million as compared to that of 3Q2011, however the pre-tax profit improved marginally from RM3.4 million to RM3.5 million, representing an increase of 2.9%. This is mainly attributed to an increase in sales of better margin products.

#### **18.** Current Year Prospects

#### Quarter 4, 2011

#### Timber

Total housing starts in Japan in 2011 were up by 2.6% to 834,117. The recovery in housing starts was concentrated in populated areas like the Tokyo metropolitan area where housing starts jumped 30% over the previous year. With the continued measures taken by the Japanese government to stimulate the housing sector in the country, 2012 housing starts is estimated to be about 850,000 units to 900,000 units. Demand for timber products in the coming quarters is expected to be firm as restoration and reconstruction works in the quake hit areas gathers momentum.

Japan's economy shrank on an annualized 2.3% in the fourth quarter 2011, contracting for the fourth in five as exports and manufacturing faltered amid weak overseas demand, the strong yen and flooding in Thailand which caused disruption in supply chain for some Japanese factories which rely on Thai-made parts. The contraction in the fourth quarter 2011 GDP may prove to be a temporary setback to the economy as overseas demand revives production. With the increase in exports and production in December 2011 and prospect for greater demand related to continuing disaster reconstruction and signs of strength in the US economy, Japan's economy is expected to recover and expand from the first quarter of 2012.

## **18.** Current Year Prospects (Cont'd)

Quarter 4, 2011 (Cont'd)

#### Timber (Cont'd)

The Group also expects to grow its round logs market share and dominance in India as the country continues to grow its economy and its infrastructure requirements. With the expected continuing growth in Japan and India economy, being the Group's major importing countries for his timber products, timber prices should stay firm in the following quarters.

Despite the recent approval of a second bailout of 130 billion euros in aid to the debtstricken Greece which is expected to help prevent a contagion and spur optimism that the Eurozone debt crisis will be contained, the Group remain cautious of the prospect of the timber industry and shall continue to strive to maintain the quality of its premium plywood products and its formidable presence in the industry.

#### Non-Timber Manufacturing and Trading

Non-timber division continued showing good results in 4Q2011. This was mainly driven by both tapes and foil products with better product mix giving improved margins.

The global economic outlook has improved but it remains fragile, the Group foresees and expects a slower growth during the first half of 2012.
