Timber

Tapes

24. Commentary on prospects

a) Timber

The timber sector continues to face strong headwinds in the geopolitical tension and economic downturn of the key buyer's countries. The Group envisages a protracted slowdown in the timber sector for year 2023. Nevertheless, we are putting in concerted and ongoing efforts to control costs and improve production efficiency.

b) Plantation

Notwithstanding the challenges faced by the palm oil industry in the year 2023 (i.e. lower CPO prices and rising production costs due to labour shortages and increased fertiliser expenses), the Group is actively pursuing ongoing initiatives to foster greater mechanisation and yield improvements to enhance operational efficiency, optimising costs, and ultimately boosting profitability. With the increasing number of palms entering the high yielding age group and the successful completion of the BHB acquisition in May 2023, the Group is confident that the plantation business will contribute towards improved performance for the financial year ending 31 December 2023.

c) Tapes

The tapes business remains challenging due to market uncertainties, rising raw material costs and higher labour cost. In anticipation of the challenges, the Group is upgrading the plants and machineries to expand the product range and to improve operational efficiency and cost competitive advantage. With the effective marketing strategy and strong supply chain management, the tapes business is still able to sustain a healthy profit margin and is expecting to perform satisfactorily for the financial year ending 31 December 2023.

d) Food

The newly acquired frozen food business is expected to provide the Group with a consistent and more diversified revenue stream to complement the Group's core business of timber, plantation and tapes. The outbreak of COVID-19 pandemic across the globe has significantly increased the demand for frozen food owing to its property of keeping nutrition for a longer time and higher shelf life as compared to fresh vegetables, fruits and meat. Anticipating increasing demand for frozen foods, the Group is expanding the capacity of the cold room and the scope of the frozen products. The food business is expecting to perform satisfactorily for the financial year ending 31 December 2023.

Barring any unforeseen circumstances, the Group expects a satisfactory financial performance for the financial year ending 31 December 2023. Moreover, the Group is consistently on the lookout for growth opportunities to further enhance shareholders' value.
