Part B: Additional Information Required By Bursa Malaysia Listing Requirements (continued)

## **B3** Current Year Prospects

The improved profitability of your Company for the year was due to stockholding gains and stronger refining margins as a result of weak crude prices and short term product availability. The outlook for refining margins is uncertain for the remaining months of 2015 as margins will be influenced by international supply and demand for petroleum products, as well as seasonal and cyclical factors.

A major maintenance turnaround in compliance to local regulatory requirement is planned to commence in mid-August and scheduled to require a period of seven weeks to complete. There will be no production during this period which will affect profitability.

The structured review of long term options for your Company that was announced on 9<sup>th</sup> January 2015 remains in progress.
