The Group is currently assessing the financial impact to the finacial statements upon the adoption.

The adoption of IC Interpretation 12 Service Concession Arrangements ("IC Interpretation 12"), gives rise to significant changes in accounting policies of the Group. The principal changes and effects are appended below.

NOTES TO OUARTERLY FINANCIAL STATEMENTS

(A) Changes in Accounting Policies and Effects of Adoption of IC Interpretation 12

This interpretation applies to both:

- (a) infrastructure that the operator constructs or acquires from a third party for the purpose of the service arrangement; and
- (b) existing infrastructure to which the grantor gives the operator access for the purpose of the service arrangement. Infrastructure within the scope of this Interpretation shall not be recognised as property, plant and equipment of the operator because the contractual service arrangement does not convey the right to control the use of the public service infrastructure to the operator. The operator has access to operate the infrastructure to provide the public service on behalf of the grantor in accordance with the terms specified in the contract.

The operator shall recognise and measure revenue in accordance with FRS111 Construction Contracts and FRS118 Revenue, for the services it performs. If the operator performs more than one service under a single contract or arrangement, consideration received or receivable shall be allocated by reference to the relative fair value of the services delivered, when the amounts are separately identifiable. The nature of the consideration determines its subsequent accounting treatment. The subsequent accounting for consideration received as a financial asset and intangible assets are accounted for in accordance with FRS139 Financial Instruments:Recognition and Measurement and FRS138 Intangible Assets respectively.

The interpretation has an impact on the Group since some of the subsidiaries have signed a Power Transmission Agreement ("PTA") for 25 years and a Power Purchase Agreement ("PPA") for 18 years respectively with Electricite Du Cambodge ("EDC") to build, operate and maintain substations and a power transmission line as well as installing, operating and maintaining a power plant. The substations, transmission line and power plant will be transferred to EDC at the end of the term of the PTA and PPA respectively. Adoption of this interpretation has resulted in a change in accounting policy for concession consideration components of construction services ("FRS111") and operation services ("FRS118") generated from Service Concession Agreements. Construction in progress and generators were derecognised as property, plant and equipment and such expenditure have been recognised as financial assets receivable. The Group has adopted this interpretation with effect from 01 January 2011.

Prior to the adoption of this IC Interpretation 12, no construction revenue and cost were recognised from the PTA and the infrastructure assets were recognised as property, plant and equipment of the Group. This change in accounting policy requires that the fair value of construction revenue be recognised as financial assets and the effect has been accounted for retrospectively in accordance with requirements of FRS 108 – Accounting policies, Changes in Accounting Estimates and Errors. However, a subsidiary of the Group has concluded that it is impracticable to apply this Interpretation to its PPA restrospectively at the start of earliest period presented, it has thus, in accordance with the transitional provision of IC Interpretation 12, recognised the financial assets that existed at the earliest period presented and used the pervious carrying amounts of of these financial assets as their carrying amounts as at that date.

NOTES TO OUARTERLY FINANCIAL STATEMENTS

1. Review of Performance

The Group registered a revenue of RM875.13 million for the current reporting quarter ended 30 September 2011, an increase of 35.67% as compared to RM645.02 million for the corresponding quarter ended 30 September 2010. The Cable and Wire division marked a higher revenue mainly due to the increase of sale volume coupled with the surge in metal prices in the current reporting quarter. And with the adoption of IC Interpretation 12, a subsidiary in the Power - Under Construction division has also recognised higher Construction Revenue.

The Group recorded a lower profit before taxation of RM18.41 million in the current reporting quarter as compared to RM19.32 million for the corresponding quarter ended 30 September 2010.

2. Material Change in Profit Before Taxation

The Group's profit before taxation for the current reporting quarter ended 30 September 2011 was lower at RM18.41 million as compared to RM24.56 million for the preceding quarter mainly due to the product sale mix and lower profit margin.

3. Prospects for Financial Year Ending 31 December 2011

The directors expect the financial year ending 31 December 2011 to remain profitable.

4. Variance of Actual Profit from Forecast Profit and Shortfall in Profit Guarantee

5. Taxation

The Group's tax charge comprises:

		Interim
	Current	Period
	Quarter	To Date
	30/09/2011	30/09/2011
	RM'000	RM'000
Income tax	(3,225)	(9,378)
Deferred tax	1,199	273
	(2,026)	(9,105)

The difference between the effective tax rate and the statutory tax rate of the Group for the current reporting quarter ended 30 September 2011 is primarily due to the lower tax rate of an overseas subsidiary company and availability of tax incentives which have been used to offset against statutory income of the subsidiary companies. Some of the non-taxable income and the utilisation of unabsorbed losses of the subsidiary companies, have also contributed to lowering the effective tax rate of the Group for the current financial quarter under review.

6. Profits/(Losses) on Sale of Unquoted Investments and/or Properties for the Current Quarter and Financial Year to date

There was no sale of unquoted investments in the current reporting quarter.

7. Purchase or Disposal of Quoted Securities
