The Group has recorded higher revenue of RM4.3 million for the current quarter as compared to RM3.6 million in the immediate preceding quarter.

The Group recorded lower loss before tax of RM14.9 million as compared to profit before tax of RM15.6 million in the immediate preceding quarter.

23 REVIEW OF PERFORMANCE OF THE GROUP

For current quarter under review, the Group recorded lower revenue of RM4.3 million for the financial period ended 31 December 2020 as compared to RM29.5 million in the same cumulative quarter for the financial period ended 31 December 2019. Significant reduction in revenue was mainly due to the impact of Movement Control Order ('MCO') enforced by the government with restricted inter state crossing to control Covid-19 outbreak which has resulted total shutdown of our Express Division. Due to very low demand for interstate travelling and the risk on Covid-19, the Group's Stage Division was running at minimum level during the period resulted further reduction in the Group revenue during the period as compared to the same cumulative quarter for the period ended 31 December 2020.

The Group recorded a loss before tax of RM14.9 million for the financial period ended 31 December 2020 as compared to loss before tax of RM75.6 million in the financial year period 31 December 2019. The loss recorded during the quarter under review was mainly due to operation loss caused by significant drop in revenue from both Express and State Divisions resulted from long MCO and CMCO enforced by the Government and impairment on property, plant & equipment and receivables.

24 PROSPECTS FOR THE CURRENT FINANCIAL YEAR

The economy registered a negative growth of 3.4% in the fourth quarter (3Q 2020: -2.6%), largely attributable to the imposition of the Conditional Movement Control Order (CMCO) on a number of states since mid-October. For 2020 as a whole, the economy contracted by 5.6%. The restrictions on mobility, especially on inter-district and inter-state travel, weighed on economic activity during the fourth quarter. Nevertheless, the continued improvement in external demand provided support for growth. Consequently, except for manufacturing, all economic sectors continued to record negative growth. On the expenditure side, moderating private consumption and public investment activities weighed on domestic demand. On a quarter-on-quarter seasonally-adjusted basis, the economy registered a decline of 0.3% (3Q 2020: 18.2%).

For the quarter, headline inflation declined to -1.5% in part reflecting the larger decline in retail fuel prices as compared to the corresponding period last year. Core inflation moderated to 0.8% due mainly to lower inflation for communication services and rental.

In terms of sectoral performance, all economic sectors, except manufacturing, registered negative growth in the fourth quarter. The services sector registered a larger contraction of 4.9% in the fourth quarter of 2020 (3Q 2020: -4.0%), as tighter restrictions on mobility and stricter standard operating procedures (SOPs) affected domestic-oriented activities. The restrictions (e.g. shorter operating hours) and weak sentiments adversely impacted spending, particularly on recreational activity and non-essential retail goods, which in turn weighed on activity in the wholesale and retail trade subsector. This was partially offset by continued growth in the motor vehicle segment. In addition, the weakness in tourism activity amid continued closure of international borders weighed on key sub-sectors, such as food and beverage, accommodation as well as transport and storage. Meanwhile, finance and insurance continued to grow amid sustained loan and deposit growth. Growth in the information and communication sub-sector also improved, amid higher demand for data communication services, particularly broadband.

Domestic demand recorded a decline of 4.4% in the fourth quarter of 2020 (3Q 2020: -3.3%), mainly due to the subdued private consumption and public investment activities. Net exports grew by 12.4% (3Q 2020: 21.9%), with continued expansion in manufactured exports. Private consumption contracted by 3.4% (3Q 2020: -2.1%). Household spending was subdued amid continued weaknesses in income and employment conditions during the quarter. Spending was also affected by tighter movement restrictions in selected states. Nevertheless, the decline in physical spending was partly mitigated by the continued acceleration in online spending. During the quarter, consumer expenditure also remained supported by various stimulus measures including the EPF i-Lestari withdrawals, the continued support to affected borrowers under the Targeted Repayment Assistance (TRA) and lower passenger car sales tax.

Meanwhile, public consumption continued to expand, albeit at a more moderate pace of 2.7% in the fourth quarter of 2020 (3Q 2020: 6.9%), supported by spending in emoluments.

Transportation industry has been severely affected by the COVID-19 pandemic. Travels have been restricted and the public is still highly concerned about the pandemic 3rd wave. Coupled with challenging economic forecast for 2020 and 2021, the Group anticipate difficult business environment until the second half of 2021.
