3. Prospects for the Financial Year Ending 31 December 2024

Economic Outlook

Malaysia's economy grew by 3.7% in 2023, down from 8.7% in 2022, due to challenging external environment. However, the growth rate is expected to improve in 2024, driven by resilient domestic expenditure and an increase in external demand. The growth would be supported by greater spillover from the tech upcycle, tourism activity and faster implementation of existing and new projects by both private and public sectors. Downside risk for Malaysia's growth would stem from weaker-than-expected external demand and larger declines in commodity production¹.

Business Outlook

Following the success and completion of TM's transformation phase (2021-2023), we are now embarking on our journey to become a Digital Powerhouse by 2030 (PWR2030).

In 2024, TM will focus on core connectivity while exploring new ventures, including platform and ecosystem, leveraging on cloud platforms and utilising emerging technologies like Artificial Intelligence (AI). Each Line of Business (LOB) in TM is well synergised with our PWR2030's aspiration to execute its strategic role:

- Unifi offers converged solutions with improved mobile coverage, content, digital lifestyle, and solutions for consumers and MSME segments.
- TM One focuses on managed services with next-gen connectivity, sovereign cloud, Private 5G, Smart Services, Platform and Cybersecurity solutions for industrial digital growth.
- TM Global is expanding its domestic fibre network and international wholesale platform ecosystem with new strategic submarine cables, data centres, media delivery, and edge computing.
