16 Review of Performance

(a) For the quarter under review, the Group reported a revenue of RM385.17 million as compared to RM654.15 million in the corresponding quarter in 2022. The Group's profit before tax stood at RM59.18 million for the quarter under review as compared to RM175.46 million of the corresponding quarter in 2022.

The performance was impaired due to lower average selling price achieved for the crude palm oil ("CPO"), fresh fruit bunches ("FFB") and plywood product by 43%, 45% and 21% respectively which coupled with lower sales volume for FFB and plywood product by 11% and 42%.

The Group had recognised a gain of RM10.70 million from the changes in the fair value of the biological assets during the current quarter under review as compared to a loss of RM20.30 million in the preceding corresponding quarter.

(b) For the first half year of 2023, the Group's revenue and net profit were RM735.82 million and RM97.37 million compared to RM1.14 billion and RM235.23 million of the corresponding period in year 2022.

The lower profit performance was principally due to drop in the commodity average selling price for CPO, FFB and plywood product by 39%, 43% and 13% respectively .

The Group had recognised a gain from the changes in the fair value of the biological assets amounting to RM11.40 million during the current period under review as compared to a gain of RM8.23 million in the preceding corresponding period.

17 Variation of Results compared to the Preceding Quarter

The Group recorded a revenue and profit before tax of RM385.17 million and RM59.18 million respectively in the quarter under review as compared to RM350.65 million and RM55.80 million respectively in the preceding quarter.

Higher revenue and profit were mainly derived from the increased sales volume for CPO and FFB by 18% and 14% respectively.

18 Current Year Prospects

With reducing supply base from the natural forest, the Group continues to maintain its focus in sustainable management of timber resources in the FMU area. The timber product outlook is anticipated to remain positive with stable demand against the stringent environmental control on supplies. The price trend will move in tandem with the overall economic growth in the purchasing countries such as India, China, Japan and Taiwan.

Japan's plywood inventory level is reported relatively low as the buyers have been restrained by weak yen currency in their purchases over the past months. However, plywood overall demand remain stable and the market is expected to improve in the 2H'23.

For Palm Oil sector, with the continued Russia-Ulkarine conflict, impacting the export routes and corridor closures in the Black Sea, have adversely affected the distribution of vegetable oils and caused a rising concern of food security issue worldwide. The present CPO price is therefore unfavourably discounted against other competing vegetable oils. Given the higher proportional price differential between the palm oil and other temperate vegetable oils, the gap should help to stimulate the CPO demand and prices in the 2H'23.

In addition to that, the non-new planting policy after 2016 will stabilise the CPO production within Malaysia and Indonesia. As such, positive Crude palm oil (CPO) price is expected to remain stable and firm with an uptrend.

With the upcoming peak crop production in 2H'23, the Group's operating strategy is to ensure full harvesting of FFB on the field.

Barring any unforeseen circumstances, the Board of Directors anticipates a satisfactory financial performance for the financial year 2023.
