	Individual	Quarter	<b>Cumulative Quarter</b>		
	Current year quarter	Preceding year corresponding quarter	Three months to	Three months to	
Group	31/3/2015	31/3/2014	31/3/2015	31/3/2014

Total	1,660	2,492	1,660	2,492	

The effective tax rate of the Group for the current and preceding year corresponding quarter is lower than the statutory tax rate of 25% principally due to utilisation of unabsorbed capital allowances and tax losses available to the Group. The lower effective tax rate is also due to the lower tax rates prevailing in some of the jurisdictions/countries in which the Group operates.

The Company and its subsidiaries have no outstanding material litigation as at 20 May 2015, being the latest practicable date.

# 21. Comparison between the current quarter ("Q1 2015") and the immediate preceding quarter ("Q4 2014")

The Group posted a consolidated revenue in the current quarter of RM171.7 million representing an increase of RM13.6 million or 8.6% against the consolidated revenue of RM158.1 million registered in Q4 2014. The higher Group consolidated revenue can mainly be attributed to an increase in data revenue coming from non-recurring contracts and stronger global bandwidth sales coupled with a 1.8% growth in data centre revenue. Voice revenue in Q1 2015, however, declined 2.1% from the RM17.9 million recorded in Q4 2014 due to lower voice usage.

The Group's pre-tax profit in the current quarter of RM57.5 million was RM6.6 million or 13.0% higher than the pre-tax profit recognised in the immediate preceding quarter of RM50.9 million due to the higher contribution from data revenue coming from non-recurring contracts and higher global bandwidth sales, higher dividend income from quoted securities, lower write-offs and/or allowances made for property, plant and equipment, construction and other deposits despite higher depreciation charges and allowances for doubtful debts recorded in Q1 2015 when compared to Q4 2014.

# 22. Review of performance for the current quarter ("Q1 2015") versus preceding year corresponding quarter ("Q1 2014")

The Group's consolidated revenue in Q1 2015 increased 30.2% when compared to Q1 2014. The increase in revenue can be attributed to higher revenue contributions from all major product segments with the highest growth rates recorded in data and data centre sales of 38.0% and 15.4% respectively. The higher data revenue was supported by increased global bandwidth sales and non-recurring contracts. In contrast, there were no global bandwidth sales nor any non-recurring contract revenue recorded in Q1 2014.

The Group posted a profit before tax of RM57.5 million in the current quarter, which is an increase of RM25.7 million or 80.8% against the profit before tax of RM31.8 million reported in Q1 2014. The increase is primarily due to higher global bandwidth sales and non-recurring contract revenues, net foreign exchange gain of RM9.0 million in Q1 2015 as compared to a net exchange loss in Q1 2014 of RM0.4 million, higher investment income and lower interest expense offset by the higher depreciation charges in Q1 2015.

## 24. Prospects

The Group continues to look for expansion and growth opportunities on both the domestic and regional fronts. The Group is looking to grow inorganically by exploring opportunities within the telecommunications and related sectors in Malaysia and the ASEAN region. The above may include strategic acquisitions, partnerships and/or joint ventures with other parties, with particular emphasis on regional wholesale bandwidth, international submarine cable and data centre businesses.

At home, the Group will continue to intensify its efforts to gain market share domestically and to deliver its customers a good and uninterrupted network experience, improve its product and solution offerings and enhance operational and cost efficiencies throughout the Group, while further expanding and strengthening its underlying fibre network and coverage footprints. Demand for higher speed bandwidth services and fibre connectivity requirements by local mobile operators for their network modernization and LTE network rollout is expected to continue and this demand from the mobile operators is expected to provide an avenue for additional data revenue to the Group.

The Group has several investments in submarine cable systems that are currently being constructed including a stake in Asia-Pacific Gateway Cable System (APG) (connecting Malaysia to Korea and Japan and expected to be completed in 2016), Asia-Africa-Europe 1 Cable System (AAE-1) (connecting Asia, Africa, Europe and the Middle East via Malaysia and expected to be completed in 2017) and FASTER Cable System (connecting Japan to the United States and expected to be completed in 2016). These cable systems, combined with the Group's existing and operational Unity Cable System (connecting Japan to the United States) will further enhance the Group's global network footprint and connectivity.

Some of the abovementioned initiatives are capital intensive and may result in some margin compression for the Group in 2015. The said initiatives are, however, necessary to ensure continued revenue growth in the future and are expected to benefit the Group in the longer term. Pre-completion sales for some of the Group's submarine cable investments should also help the Group monetise and accelerate returns on its investments.

The results of the Group for remainder of 2015 are expected to remain satisfactory.

#### 25. Profit Forecast and Profit Guarantee

The Group has not provided any profit forecast or profit guarantee in any public document.
