For 4Q 2021, the Group recorded a lower revenue of RM32.976 million, a decrease of RM13.240 million or 28.6% from RM46.216 million in 3Q 2021. This was mainly due to lower contribution from construction sector in 4Q 2021 as certain on-going projects have reached the tail end stages of their construction works.

Despite the decrease in revenue, the Group recorded a lower loss before tax of RM0.448 million as compared to RM0.916 million in 3Q 2021, mainly due to the higher contribution from interest income in 4Q 2021.

#### **B3** Prospects

Outlook for 2022 will continue to be cautious as Malaysia is migrating from a pandemic to an endemic approach but leans towards optimism due to positive economic signals including high vaccination rates, implementation of recovery policies by the government and the expected re-opening of international borders. Market confidence in 2022 will continue to be heavily influenced by positive or negative developments of containing Covid-19. Given the uncertain business environment coupled with the higher price of construction materials, we expect our financial performance for the financial year period ending 31 March 2022 to be adversely impacted.

Bearing in mind the challenges and economic uncertainties arising from the Covid-19 pandemic, the Group will continue to take all proactive measures to ensure the existing business remains sustainable, resilient and focused on delivering and completing all its projects in hand within the budgeted cost and on agreed time frame.

As at 31 December 2021, the Group has approximately RM446 million in unbilled construction works.

The Group's effective tax rate for the financial period ended 31 December 2021 was higher than the prima facie tax rate mainly due to the losses incurred by certain subsidiaries and disallowable expenses.

#### **B12** Fair value information

The carrying amounts of cash and cash equivalents, short term receivables and payables and short-term borrowings reasonably approximate their fair values due to the relatively short term nature of these financial instruments. Accordingly, the fair values and fair value hierarchy levels have not been presented for these instruments.

Fair value is categorised into different levels in a fair value hierarchy based on the input used in the valuation technique as follows:

Level 1 – Quoted prices (unadjusted) in active markets for identical financial assets or liabilities.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the financial asset or liabilities, either directly or indirectly.

Level 3 – Inputs for the financial asset or liabilities that are not based on observable market data.

The table below analyses financial instruments not carried at fair value for which fair value is disclosed, together with their carrying amounts shown in the statements of financial position.
