These represent:

- (a) an increase of 239% in loss before tax and an increase of 23% in revenue as compared to the profit before tax and revenue in the preceding year corresponding quarter ended 31 December 2015 respectively;
- (b) an increase of 719% in profit before tax and a decrease of 10% in revenue as compared to the loss before tax and revenue in the preceding year corresponding period ended 31 December 2015 respectively.

The increase in loss before tax for the current quarter compared to preceding corresponding quarter was mainly due to due lower milling margin and progressively recognition of newly-matured plantation operating costs from the Group's plantation operations in Indonesia. However, the increase in profit before tax for the financial year-to-date compared to preceding corresponding period was mainly due to one-off net gain on disposal of 18 parcels of agricultural lands of RM53.019 million.

The increase in revenue for the current quarter compared to preceding year corresponding quarter mainly due higher CPO and PK prices from the plantation segment.

The detailed analysis of the respective operating segments of the Group with reference to the segmental information as disclosed in note 9 are discussed below:-

Plantation segment

The external revenue of the plantation segment increased by 24% for the current quarter and decrease of 9% for the current financial year-to-date as compared to previous year corresponding quarter and period respectively. The increase for the current quarter was mainly due to higher CPO & PK prices. However, the decrease for the current financial year-to-date was mainly due to lower sales of CPO and PK. The plantation segment registered a decrease in segment profit of 33% for the current quarter compared to previous year corresponding quarter due to recognition of newly-matured plantation operating costs from the Group's plantation operations in Indonesia. However, segment profit for current financial year-to-date increased by 183% compared to previous year corresponding period mainly due to one-off net gain on disposal of 18 parcels of agricultural lands of RM53.019 million.

Hotel segment

The external revenue of the hotel segment decreased by 4% for the current quarter and increased by 4% for the current financial year-to-date compared to previous year corresponding quarter and period respectively. The hotel segment registered an improved segment result of 5900% for the current quarter and 168% for the current financial year-to-date compared to previous year corresponding quarter and period. The improvement was mainly due to higher occupancy rate in the current quarter and period.

The figures have not been audited

17. Variance of the results against the immediate preceding quarter

The Group recorded a loss before tax of RM6.805 million for the current quarter, which represents a decrease of 227% over the profit before tax of RM5.354 million for the immediate preceding quarter ended 30 September 2016. Management attributes the increase in loss before tax mainly due to recognition of newly-matured plantation operating costs from the Group's plantation operations in Indonesia and lower milling margin in the current quarter.

18. Prospects

Plantation segment

Given the current level of CPO and PK prices, the Group's plantation segment will become profitable for the current financial year and its performance will be in line with the industry norm. There is yet to be any significant revenue and profit contribution from the Group's plantation operation in Indonesia for the current financial year as majority of the plantation areas are still in the preliminary development and planting stage.

Hotel segment

The prospect of the hotel segment is expected to be improving for the next financial year.
