3. Significant Accounting Estimates And Judgements

(a) Critical Judgements Made in Applying Accounting Policies

There are no critical judgements made by management in the process of applying the Group's accounting policies that have significant effect on the amounts recognised in the financial statements.

(b) Key Sources of Estimation Uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(i) Deferred tax assets

Deferred tax assets are recognised for all unused tax losses, unabsorbed capital allowances and unused reinvestment allowance to the extent that it is probable that taxable profit will be available against which the losses, capital allowances and reinvestment allowance can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax

planning strategies. The total carrying value of unrecognised tax losses and capital allowances of the Group was RM54.3 million (30.4.2016: RM48.8 million).

(ii) Depreciation of plant and equipment

The cost of paper making machinery is depreciated on a straight-line basis over the assets' useful lives. Management estimates the useful lives of these plant and machinery to be within ten years. These are common life expectancies applied in the industry. Changes in the expected level of usage and technological developments could impact the economic useful lives and the residual values of these assets, therefore future depreciation charges could be revised.

Group

Group revenue for the period ended 31 July 2016 was RM151.4 million compared with RM143.4 million for the period ended 31 July 2015, an increase of 5.6%. The increase in revenue was mainly due to the increase in sales of tissue products. The Group's profit before taxation for the period ended 31 July 2016 was RM14.0 million, a decrease of 21.3% over RM17.8 million registered in the previous financial period ended 31 July 2015. The decrease in profit before taxation was mainly due to higher losses incurred in the post commencement of Vietnam's initial tissue operation and margin deterioration as a result of higher energy and labour costs recorded in the current financial period.

17. Prospects

In general, the Malaysian economy expanded 4.0 percent year-on-year in the June quarter of 2016, moderating from a 4.2 percent growth in the previous period. It was the fifth straight quarter of decelerating growth as a surge in investment and a faster increase in private consumption and government spending were unable to offset a decline in net exports. On a quarter-on-quarter seasonally-adjusted basis, the economy grew by 0.7 percent, slowing from a 1.0 percent expansion in the previous three months and marking the weakest growth in three quarters.

Based on these prevailing trends as described above, there are also various key challenges facing the Group in the coming financial year ending 30 April 2017 ("FY2017"). For a start, we would have felt the full impact on the increased in electricity and natural gas tariffs effective 1 January 2016 by approximately 4.6% and 17.2% respectively in FY2017. Apart from increasing cost arising from the raise the minimum wage for employees in Peninsular Malaysia by RM100 to RM1,000 per month, and to RM920 from RM800 for employees in

NOTES TO THE INTERIM FINANCIAL REPORT

East Malaysia starting from 1 July 2016, the recent increased volatility in the foreign currency exchange rate, pose a challenge for the Group to contain and monitor its manufacturing cost. Malaysia's consumer sentiment is expected to remain low attributed to inflationary pressures, higher cost of living, cooling property market and prices of goods and services that have cut into buying power.

In light of these challenges, the Group has strategic plans and control measures put in place to mitigate the impact from these adverse conditions. Several cost-savings projects have been identified and approved to improve the Group's operational efficiency and keep a tight rein on costs to drive down waste and inefficiencies across the group's business units. We are looking into ways to strengthen our customer base and improve our distribution channel. The Group is also looking at developing new products and opportunity to venture into new business segments if the expansion synergizes with the Group's current business model. With this in place, the Board is cautiously optimistic about its prospect.

18. Variance of actual profit from profit forecast

Not applicable.
