# 3. Significant Accounting Estimates And Judgements

#### (a) Critical Judgements Made in Applying Accounting Policies

There are no critical judgements made by management in the process of applying the Group's accounting policies that have significant effect on the amounts recognised in the financial statements.

# (b) Key Sources of Estimation Uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the operating date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(Company No. 384662-U) (Incorporated in Malaysia)

# INTERIM FINANCIAL REPORT FOR THE FINANCIAL PERIOD ENDED 30 APRIL 2018

#### NOTES TO THE INTERIM FINANCIAL REPORT

#### (i) Deferred tax assets

Deferred tax assets are recognised for all unused tax losses, unabsorbed capital allowances and unused reinvestment allowance to the extent that it is probable that taxable profit will be available against which the losses, capital allowances and reinvestment allowance can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies. The total carrying value of unrecognised tax losses and capital allowances of the Group was RM65.6 million (30.4.2017: RM71.9 million).

# (ii) Depreciation of plant and equipment

The cost of paper making machinery is depreciated on a straight-line basis over the assets' useful lives. Management estimates the useful lives of these plant and machinery to be within ten years. These are common life expectancies applied in the industry. Changes in the expected level of usage and technological developments could impact the economic useful lives and the residual values of these assets, therefore future depreciation charges could be revised.

# (iii) Impairment of property, plant and equipment

The Group assesses whether there are any indicators of impairment for all non-financial assets at each reporting date. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. Impairment exists when the carrying amount of an asset or cash generating unit exceeds its recoverable amount, which is the higher of its value in use and its fair value less cost of disposal.

Where there is objective evidence of impairment, the amount and timing of future cash flows are estimated based on historical loss experience for assets with similar credit risk characteristics.

#### (iv) Customer rebates

The Group had recognised provision for sales rebate according to the contractual arrangements entered into with its customers. Estimating the provision for sales rebate requires the Group to make an estimate based on historical experiences, contractual arrangement and on the claims expected to be made by customers. The Group assessed the provisions at each reporting date and adjusted to reflect the current best estimate. Where it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision for sales rebate is reversed.

#### 17. Prospects

In general, Malaysia's economy recorded a growth of 5.4% in March quarter of 2018, compared to a 5.9 percent growth in December 2017. Most economists expect growth would remain subdued with household consumption expected to be ease, relative to 2016. This is despite the fact that the previous quarter of 2017 saw a better export performance, partly attributable to seasonality and the weak ringgit effect, and a healthy pace of industrial production growth. The economy is expected to face headwinds this year, arising from the higher cost driven inflation, spillover effects of the ringgit's depreciation on imported goods and services and weak consumer sentiment.

In light of these challenges, the Group has strategic plans and control measures put in place to mitigate the impact from these adverse conditions. In addition to the price increase to its products, several cost-savings projects have been identified and approved to improve the Group's operational efficiency and keep a tight rein on costs to drive down waste and inefficiencies across the group's business units. We are looking into ways to strengthen our

The Group is also looking at developing new products and opportunity to venture into new business segments if the expansion synergizes with the Group's current business model. With this in place, the Board is cautiously optimistic about its prospect.
