#### NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS

# 4. Estimates (continued)

There were no material changes in the estimates of amounts reported in the prior financial year that have a material effect in the current period.

# 5. Debt and equity securities

There were no issuances, cancellations, repurchases, resale and repayments of debt and equity securities for the current period under review.

# 7. Changes in the composition of the Group

# i) Additional investments arising from new shares issued by an existing subsidiary

In January 2015, Bina Hartamas Sdn. Bhd. ("BHSB") which was previously a 100% owned subsidiary, issued 999,998 new ordinary shares of RM1.00 each respectively to Naim Land Sdn. Bhd. ("NLSB") and third parties where 599,998 shares of RM1.00 each was subscribed by NLSB in cash. The resultant equity interest held by NLSB in BHSB decreased from 100% to 60%.

This change in the ownership interest was accounted for as an equity transaction between the Group and non-controlling interests. The change in the Group's share of net assets, which was immaterial, was adjusted against the Group's reserves.

# ii) Disposal of foreign subsidiaries

In January and March 2015 respectively, two foreign subsidiaries, namely Naimcendera Engineering & Construction Sendirian Berhad and Naim Vanua Levu (Fiji) Limited, had been struck off from the respective Registrar of Companies. The strike off of these subsidiaries (deemed as disposal to the Group) has no material impact to the Group due to their dormancy.

### 11. Operating segments

The Group has three reportable segments, which are the Group's strategic business units. For each of the strategic business unit, the Group Managing Director (being the Chief Operating Decision Maker), reviews internal management reports for resource allocation and decision making at least on a quarterly basis.

The following summary describes the operations in each of the Group's existing reporting segments.

reporting deginerits.	
Property development	- Development and construction of residential and commercial properties (including sale of vacant land).
Construction	<ul> <li>Construction of buildings, roads, bridges and other infrastructure and engineering works (including oil and gas related construction projects).</li> </ul>
Others	- Manufacture and sale of buildings and construction materials, provision of sand extraction and land filling services, property investment as well as quarry operation.

Performance is measured based on segment profit before tax as included in the internal management reports. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of the segments relative to other entities that operate within these industries.

There are varying levels of integration between the reportable segments. Intersegment pricing is determined on negotiated terms. Unallocated items mainly comprise corporate and headquarters expenses and other investment income, which are managed on a group basis and are not allocated to any operating segment.

### Segment assets and liabilities

The Group Managing Director reviews the statements of financial position of subsidiaries for resources allocation and decision making instead of a summary of consolidated assets and liabilities by segments. As such, information on segment assets and segment liabilities is not presented.

### 17. Review of Group performance

The Group recorded lower revenue of RM265.2 million for the 6 months period under review, as compared to RM312.2 million reported in the corresponding period of 2014. At the same time, Group profit before tax for the period was RM31.1 million against RM139.1 million achieved in the same period in 2014 under review. The decrease was contributed by lower units of properties sold as well as lower progress of construction works achieved for existing housing and construction projects during the quarter under review [see Note 17.1 for further details].

A substantial gain of RM61.7 million arising from the disposal of partial equity interest in an associate during 2014 had led to higher profit before tax of RM139.1 million reported in corresponding period of 2014.

Detailed review of the performance and prospects of each operating segment (as shown in Note 11) are discussed in Section 17.1.

### 17.1 Review of performance of operating segments and current year prospects

#### a) Property

Current 6-month vs corresponding preceding 6-month review (June 2015 vs June 2014) For the current 6 months period under review, Property segment achieved revenue of RM89.9 million, being 30% lower than the RM127.9 million achieved in the same period of 2014. At the same time, Property profit declined from RM35.4 million in June 2014 to RM13.9 million in June 2015. The decrease was partly due to lower contributions from the substantially completed projects. The Group also reported lower level of new sales about RM72 million, compared to that achieved in 2014 of about RM99 million, leading the drop in the segment revenue and profit.

Current 3-month vs immediate preceding 3-month review (June 2015 vs March 2015) Compared to the immediate preceding quarter (January to March 2015), Property revenue decreased from RM51.3 million to RM38.6 million. The segment profit also declined from RM11.8 million to RM2.0 million during the current 3 months period. The decrease was due to lower progress of development works achieved during the period.

Proposed Kuching Paragon – future contributor to Naim

Property market continues to experience some slowdown, coupled with weaker buyers' sentiment and the effect of the various property cooling measures initiated by the government since 2013.

We have adopted a cautious attitude/approach especially on product launches and product types, to be more selective depending much on the buyers' demand and market conditions. Product planning and pricing as well as tightening of costs control are amongst the key measures to be implemented in order to sustain the performance in our Property segment in near term.

### b) Construction

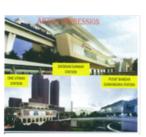

Current 6-month vs corresponding preceding 6-month review (June 2015 vs June 2014) Construction segment recorded lower revenue of RM157.0 million for the current 6 months period, against RM164.3 million achieved in the corresponding period of 2014. The Segment profit for the 6 months period also declined from RM8.9 million in June 2014 to a loss of RM0.7 million in June 2015. The drop was partly due to lower contributions from certain construction projects being substantially completed during 2014. Revision in the contract sum of certain construction projects due to variation orders/provisional sums has also led to the drop in the segment revenue and profit.

Current 3-month vs immediate preceding 3-month review (June 2015 vs March 2015) Higher Construction revenue of RM92.0 million was achieved, representing an increase of 42% from RM65.0 million achieved in the immediate preceding quarter, mainly due to increased progress of works achieved during the current 3 months period.

**Prospects** 

Various proactive efforts and measures have been put in place to tighten cost and improve efficiency to closely monitor operational costs and improve construction margin. At the same time, strict monitoring on the progress of projects is implemented to ensure they are on schedule. We are also in the process of improving risk management and tightening internal controls for the construction segment.

A number of sizeable construction tenders has been submitted and we are cautiously optimistic to secure some to replenish our order book which currently stands above RM1 billion.

#### c) Other segment

Current 6-month vs corresponding preceding 6-month review (June 2015 vs June 2014) During the current 6 months period, Other segment reported a revenue of RM18.4 million (January to June 2014: RM19.9 million). At the same time, the Segment registered a loss of RM1.6 million in the current period, against a profit of RM0.3 million in corresponding period in 2014. The decrease was mainly due to higher operational costs from the premix and quarry operations which are running below capacity.

Current 3-month vs immediate preceding 3-month review (June 2015 vs March 2015) Other segment recorded a decline in revenue from RM10.4 million in the immediate preceding quarter to RM8.0 million in the current quarter. The Segment also reported an additional loss of RM0.7 million (January to March 2015: RM0.9 million), mainly contributed by the premix and quarry operations as explained above.

## **Prospects**

Permy Mall, Miri – recurring income

In the near term, we expect the property investment and trading operations to continue to contribute positively to the income of the Group.

We will continue to improve the quarry and premix operations by putting various measures to market and sell the products to achieve economies of scale and improve their performance.

# 17.2 Review of performance of major associate

DEHB – major contributor to group profit

Our associate, Dayang Enterprise Holdings Bhd. ("DEHB"), registered a profit after tax of about RM69.7 million for the six months ended 30 June 2015, a decrease of 22% over the RM89.4 million achieved in the corresponding period in 2014.

Based on the share price of DEHB of RM1.48 as at 25 August 2015 (closing price), the estimated market value of the Group's investment in DEHB, based on current shareholding of 29.06%, is approximately RM377 million.

The Group's effective tax rate for the current period under review is higher than the prima facie tax rate of 25%, mainly due to higher non-deductible expenses.

On the other hand, the Group's effective tax rate for the corresponding period of 2014 was lower than prima facie tax rate, mainly due to substantial capital gain (non-taxable) arising from the disposal of partial interest in an associate.
