### 3. Seasonality or cyclicality of operations

The business operations of the Group are not materially affected by any seasonal or cyclical fluctuations during the period under review.

### 4. Estimates

The preparation of the condensed consolidated interim financial statements in conformity with MFRSs requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Although these estimates and judgements are based on the management's best knowledge of current events and actions, actual results may differ from these estimates.

The significant judgements made by management in applying the Group's accounting policies and the areas of estimation uncertainty comprise those disclosed in the annual financial statements as at and for the year ended 31 December 2022.

### 5. Debt and equity securities

There were no issuances, cancellations, repurchases, resales and repayments of debt and equity securities for the period under review.

There was no share buy-back during the period under review. The total number of ordinary shares repurchased in earlier periods retained as treasury shares as of 31 March 2023 remains at 13,056,000 shares.

# 6. Acquisitions and/or disposals of property, plant and equipment and investment properties

During the current period, the Group incurred about RM3.7 million (31.3.2022: RM0.5 million) for the acquisition of property, plant and equipment and investment properties (including assets under construction), which were satisfied in cash. ### 10. Dividend

No dividend was declared/paid by the Board during the current quarter under review.

### 11. Operating segments

The Group has three reportable segments, which are the Group's strategic business units. For each of the strategic business units, the Group Managing Director (GMD) (being the Chief Operating Decision Maker), reviews internal management reports for resource allocation and decision making at least on a quarterly basis.

The following summary describes the operations in each of the Group's existing reporting segments.

Property development - Development and construction of residential and commercial

properties (including sale of vacant land and vacant lot with

infrastructure).

Construction - Construction of buildings, roads, bridges and other

infrastructure and engineering works (including oil and gas

related construction projects).

Others - All other business segments with profit contributions less than

10%. This includes trading of building and construction materials, provision of sand extraction and land filling services, property investment and management, hotel

operation as well as quarry operation.

Performance is measured based on segment profit before tax, as included in the internal management reports that are reviewed by the GMD. Segment profit is used to measure performance as management believes that such information is the most relevant in evaluating the results of the segments relative to other entities that operate within these industries.

There are varying levels of integration between the reportable segments. Inter-segment pricing is determined on negotiated terms. Unallocated items mainly comprise corporate and headquarters expenses and other investment income, which are managed on a group basis and are not allocated to any operating segment.

### Segment assets and liabilities

The GMD reviews the statements of financial position of subsidiaries for resource allocation and decision making, instead of a summary of consolidated assets and liabilities by segments. As such, information on segment assets and segment liabilities is not presented.

### 17. Review of Group performance

# Current 3-month vs corresponding preceding 3-month review (March 2023 vs March 2022)

	Cumulative	e quarters				
	3 month	3 months ended				
	31 March 2023	31 March 2022				
	RM'000	RM'000				
Revenue	68,521	99,167				
(Loss)/Profit before tax	(6,770)	9,626				

When compared to March 2022, lower group revenue of RM68.5 million was recorded during the period under review, mainly contributed by lower property sales secured as well as lower work progress achieved at project sites.

At the same time, the Group reported a net loss before tax of RM6.8 million, compared against a net profit before tax of RM9.6 million reported in the corresponding period of 2022. The fluctuation in net results was analysed as follows:

- a segment loss of about RM1.0 million recorded by our core businesses, against a segment profit of about RM3.2 million reported in March 2022 [see Notes 11 and 17.1 for details].
- share of loss from our major associates, Dayang Enterprise Holdings Bhd. ("DEHB")
  and its subsidiary, Perdana Petroleum Berhad. The share of results (after tax) of
  the DEHB Group had declined, from a profit of RM3.3 million in March 2022 to a loss
  of RM5.5 million in the current period under review.

# Current 3-month vs immediate preceding 3-month review (March 2023 vs December 2022)

	Current	Immediate preceding
	3 months ended	3 months ended
	31 March 2023	31 December 2022
	RM'000	RM'000
Revenue	68,521	73,216
(Loss)/Profit before tax	(6,770)	7,712

When compared to the immediate preceding quarter (October to December 2022), group revenue and performance had declined mainly attributable to lower work progress achieved from the ongoing projects during the 3-month period. A net share of loss of RM5.5 million (October to December 2022: a net share of profit of RM4.5 million) of the DEHB Group had also led to the decline in the group performance during the quarter under review.

Property Development showed a decline in its revenue and performance during the current period under review, mainly attributable to lower property sales secured as well as the incurrence of some fixed overheads and interest expenses. New property sales of about RM18.7 million were secured during the period, approximately 19% lower than that achieved in March 2022 of about RM23.1 million.

# Current 3-month vs immediate preceding 3-month review (March 2023 vs December 2022)

Both Property Development revenue and profit had improved, mainly contributed by higher property sales of about RM18.7 million (October to December 2022: RM3.6 million) as well as some cost savings arising from project completion.

- 17. Review of Group performance (continued)
  - 17.1 Review of performance of operating segments and current year's prospects (continued)
  - a) Property development (continued)

### **Prospects**

The property market remains soft but is expected to gradually recover in the short to medium term. Property overhang issues, declining customers' purchasing power, interest rate hikes and rising inflationary pressure are among the key concerns and challenges faced by the property market, leading to a continuing weakening of overall market sentiment. Most developers primarily focus to clear their existing stocks (completed and/or under construction) as much as possible while new launches are either deferred and/or introduced to the market in small phases with competitive prices. The developers are also facing various challenges in completing their projects, coupled with rising building materials costs, labour shortages and rising financing costs.

In the years to come and depending on the market, the Group expects sales activities to improve gradually. Our primary emphasis and focus in the near term will be continuous understanding and meeting customers' needs by building and delivering properties that are value-for-money in terms of quality and service. A more cautious approach has been adopted towards new product launches in terms of timing, project size and product types, including product re-design to accommodate new living trends and environmental social and governance (ESG) elements.

Continuous sales and marketing initiatives such as digital marketing, various enhanced and value-added service packages have been introduced along the way to sell off our property stocks to improve the performance of this segment and reduce associated holding costs. In addition to continuously targeting the local market, we are also looking into potential opportunities to promote our products outside Sarawak.

At the same time, we have also closely managed and monitored the development progress and development costs to ensure that the properties are completed within the planned budget and handed over to buyers on a timely schedule.

As part of our medium-term plans to sustain the performance of this Segment, we are also looking into various possible business opportunities to acquire new land in strategic locations within Sarawak and/or Malaysia, particularly for mass affordable housing development equipped with various facilities and amenities.

Revenue	42,098	69,319		
Segment profit	973	759		

Construction revenue had declined by about 39% during the period under review, mainly contributed by a decrease in work progress at the site for its existing ongoing construction projects. Nevertheless, this Segment recorded a marginal profit as a result of lower interest costs and fixed overheads incurred.

### 17. Review of Group performance (continued)

# 17.1 Review of performance of operating segments and current year's prospects (continued)

### b) Construction (continued)

### **Prospects**

We continuously manage and monitor the project execution closely as they progress, to make sure that the construction projects are completed within the planned schedule and achieve the expected margin.

At the same time, we also continuously build up and replenish our order book to sustain the performance of this Segment. Nonetheless, we are cautious and selective in project tendering and focus particularly on those projects where we have proven track records and experiences, supported by current project management resources.

### c) Other Segment

# Current 3-month vs corresponding preceding 3-month review (March 2023 vs March 2022)

	Cumulative quarters 3 months ended			
	31 March 2023 31 March 2022			
	RM'000	RM'000		
Revenue	4,628	4,328		
Segment loss	(2,753)	(1,458)		

When compared to the corresponding period of 2022, higher revenue was reported by Other Segment mainly due to increased trading and quarry sales during the period under review. A decline in the hotel occupancy rates had also adversely impacted the overall revenue performance for this Segment.

Other Segment continued to register a loss due to the incurrence of some fixed overheads and interest expenses.

	RM'000	RM'000	
Revenue	4,628	4,198	
Segment loss	(2,753)	(2,717)	

When compared to the immediate preceding quarter, the Other Segment showed a slight improvement in its revenue during the current 3 months, mainly due to higher trading sales and quarry sales recorded in the period.

Nevertheless, this segment continued to register a loss due to the incurrence of fixed overheads and interest expenses, particularly from its low-performing operations.

### **Prospects**

The Group expects contributions from this segment to gradually improve in the near term, particularly in the retail leasing and hotel businesses in Bintulu and Miri. Various revamping activities commenced last financial year, aiming to improve the current occupancy rates and investment yield, which we believe may take some time to yield fruitful results.

Meanwhile, we will keep our rental rates competitive to achieve a fair yield as well as to cater to the changing working culture (i.e. work-from-home culture) and rising e-commerce businesses. We will continuously implement various cost control measures to bring down overheads, particularly when the operations level is low. At the same time, we have also monitored and managed the collection of debts from the retail leasing business closely while providing necessary support and assistance to our tenants.

### 17. Review of Group performance (continued)

### 17.2 Review of performance of major associates

For the period under review, our associate, Dayang Enterprise Holdings Bhd. ("DEHB"), reported an unaudited net loss after tax attributable to owners of about RM15.9 million, against a net profit after tax of RM13.8 million in the corresponding period of 2022. The decline in DEHB's performance during the current period was mainly due to lower work orders/contracts as a result of the monsoon season, higher operating costs and vessel maintenance costs incurred during the first quarter of the year.

### 18. Tax expense

The Group reported higher tax expense of about RM1.2 million, when compared to the net loss excluding tax and shares of results from associates and joint ventures, mainly due to the effect of non-recognition of additional deferred tax assets arising from certain loss-making and low-performing operations.

### 20. Profit guarantee

The Group did not issue any profit guarantee.

### 21. Derivative financial instruments

The Group does not have any outstanding financial derivatives as at 31 March 2023.

### 22. Update of material litigation

### **Contract litigation**

On 12 November 2020, Naim Engineering Sdn. Bhd. ("NESB") received a Writ of Summons together with a Statement of Claim from a subcontractor in respect of two completed work packages. The claims against NESB were for damages and/or compensation in the sum of about RM32.93 million, or alternatively a sum of about RM29.60 million, costs of engaging an expert and/or the continuous costs until the completion of the suit, judgement interest and costs.

Following the stay of proceedings in favour of arbitration as agreed by both parties, a Notice of Arbitration dated 16 July 2021 was received on 19 July 2021. On 11 April 2022, both NESB and the subcontractor agreed and confirmed the appointment of the arbitrator. A preliminary meeting with the arbitrator was held on 23 May 2022. On 18 July 2022, the subcontractor filed their statement of claim whereas NESB filed its statement of defence and counterclaim on 11 October 2022. The subcontractor then submitted a reply and their defence to NESB's counterclaim on 20 December 2022. NESB further replied to the subcontractor's defence to counterclaim on 24 February 2023. Both parties exchanged their respective lists of documents on 18 April 2023, of which NESB is currently performing an internal assessment and review.

Based on our records, the Group is of the view that the claim by the subcontractor is frivolous. As such, the Group does not expect the claim to succeed and is of the view that the claim does not have material financial and/or operational impact to the Group. Notwithstanding, in the event that the claim is allowed by the Arbitrator, the financial impact is limited to what is claimed by the subcontractor in the Statement of Claim. The Group has instructed its solicitor to vigorously contest the claim.
