(b) Amendment to FRS 117, Leases

The Group has adopted the amendment to FRS 117. The Group has changed the classification of long leasehold lands to property, plant and equipment. This change in classification has no effect to the profit or loss of the current quarter 30 June 2010 or the comparative of prior periods.

(c) FRS 139: Financial Instruments: Recognition and Measurement, FRS 7: Financial Instrument: Disclosures and Amendments to FRS 139: Financial Instruments: Recognition and Measurement, Amendments to FRS 7: Financial Instruments: Disclosures

FRS 139 sets out new requirements for the recognition and measurement of the Group's financial instruments. Financial instruments are recorded initially at fair value. Subsequent measurement of the financial instruments at the balance sheet date reflects the designation of the financial instruments.

FRS 7 deals with new disclosure in relation to the financial instruments. These FRSs entail increased disclosures both quantitative and qualitative of the Group's exposure to risks, enhanced disclosure on components of the Group's financial position and performance, and possible changes to the manner of which certain items are to be presented in the financial statements.

Financial assets

(i) Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss comprise financial assets that are held for trading, including derivatives (except for a derivative that is a designated and effective hedging instrument) and financial assets that are specifically designated into this category upon initial recognition. Financial assets acquired principally for the purpose of selling in the near term.

Derivative that are linked to and must be settled by delivery of unquoted equity instruments whose fair values cannot be reliably measured are measured at cost.

Financial assets at fair value through profit or loss are carried in the balance sheet at fair value with gains or losses recognised in the income statement.

(ii) Held-to-maturity

Held-to-maturity investments category comprises debt instruments that are quoted in an active market and the Group or the Company has the positive intention and ability to hold to maturity.

Financial assets categorised as held-to-maturity investments are subsequently measured at amortised cost using the effective interest method. Gains and losses are recognised in profit or loss.

(iii) Available-for-sale

Available-for-sale category comprises investment in equity and debt securities instruments that are not held for trading.

Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost less impairment loss. Other financial assets categorised as available-for-sale subsequently measured at their fair values with the gain or loss recognised in other comprehensive income, except for impairment losses, foreign exchange gains or losses arising from a monetary items and gains or losses of hedged items attributable to hedge risks of fair value hedges which are recognised in profit or loss. On derecognition, the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity into profit or loss. Interest calculated for a debt instrument using effective interest method is recognised in profit or loss.

QUARTERLY REPORT – FOURTH FINANCIAL QUARTER ENDED 31 DECEMBER 2010

B. ADDITIONAL INFORMATION REQUIRED BY BURSA MALAYSIA SECURITIES LISTING REQUIREMENTS

B1. Review of performance

The revenue of the Group for the current quarter ended 31 December 2010 was RM101.67 million, an increase of RM8.08 million or 9% as compared with the corresponding quarter in 2009. For the twelve months ended 31 December 2010, the Group achieved total revenue of RM363.14 million as compared with RM327.42 million in 2009, an increase of RM35.72 million or 11% attributed mainly to the improved particleboard sales and the increased production units achieved in the RTA furniture sector, in spite of sales proceeds being affected by the Malaysian Ringgit strengthening against the US Dollar by over 10% during the year.

The profit before taxation (“PBT”) of the Group for the reporting quarter was RM10.48 million, an increase of RM 2.77 million or 36% as compared with the corresponding quarter in 2009. For the year ended 31 December 2010, the Group achieved a PBT of RM28.74 million as compared with a PBT of RM18.93 million in 2009. This is due mainly to the improved profit contribution and unrealized exchange gain from the translation of the USD loan from particleboard sector, although the significantly lower profit contribution was from the RTA sector despite achieving higher sales / production volumes but its profit was marred by the weakened US Dollar exchange rates.

B2. Material change in profit before taxation for the quarter against the immediate preceding quarter

The Group reported a PBT of RM10.48 million for the current quarter as compared to a PBT of RM5.27 million for the immediate preceding quarter ended 30 September 2010. The higher PBT was attributed to the increased particleboard and RTA furniture production output for the reporting quarter coupled with the unrealized exchange gain from the USD loan.

B3. Prospect for the current financial year

The demand for particleboard and RTA furniture is expected to be stable and selling prices are expected to improve over time adjusting to the weakening US Dollars which had affected the profit margin significantly.

B4. Variances from Profit Forecasts and Profit Guarantee

Not applicable.
