## **B.3** Commentary on prospects and outlook

The protracted trade war between USA and China, Brexit concerns, and the recent Covid-19 outbreak has resulted in moderation of both global and Malaysian economic growth due to continued inter-regional trade uncertainties as well as volatility in forex and commodities pricing.

Notwithstanding the above, the Group is cautiously optimistic that the overall demand for plastic packaging remains intact and sustained, and will continue to focus on product innovations and enhancing production efficiencies to mitigate against increase in operating costs.

In view of the above, the Group remains committed to deliver a profitable performance for the financial year ending 31 December 2020.

## **B.4** Variance of actual profit from profit forecast

This note is not applicable as the Group did not issue nor publish any profit forecast for the current year under review.

Income tax expense is recognised in each interim period based on the best estimate of the weighted average annual income tax rate expected for the full financial year.

The Group's effective tax rate for the 12 months period under review was 19.43%, which is lower than the statutory tax rate due mainly to the availability of green investment tax allowance claimed by a subsidiary.
