**UNAUDITED INTERIM FINANCIAL REPORT
FOR THE PERIOD ENDED 30 JUNE 2015**

PART A: EXPLANATORY NOTES PURSUANT TO MFRS 134

A1. BASIS OF PREPARATION

The unaudited interim financial report has been prepared in accordance with the reporting requirements as set out in Malaysian Financial Reporting Standards No.134 – “Interim Financial Reporting” and paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad.

The unaudited interim financial report should be read in conjunction with the audited financial statements for the financial year ended 31 December 2014 and the attached explanatory notes. These explanatory notes provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Group since the financial year ended 31 December 2014 except as described below.

Joint venture

The Group’s interest in the joint venture is accounted for in the financial statements by the equity method of accounting. Under the equity method of accounting, interest in joint venture is initially recognised at cost and adjusted thereafter to recognise the Group’s share of the post-acquisition profits or losses and movements in other comprehensive income.

Share-based payment transactions

The Group operates an equity settled share-based compensation plan under which the Group receives services from employees as consideration for equity instruments of the Company. The fair value of the employee services received in exchange for the grant of the share awards is recognised as an expense with a corresponding increase to equity. The total amount to be expensed over the vesting period is determined by reference to the fair value of the share awards granted, excluding the impact of any service and non-market performance vesting conditions.

Associates

The results of the associates are based on unaudited management accounts. The power generating facility operated by Cambodia Utilities Pte. Ltd. (“CUPL”) under a build, operate and transfer agreement with Electricite Du Cambodge expired on 8 May 2015.

PART A: EXPLANATORY NOTES PURSUANT TO MFRS 134 (Cont'd)

A1. BASIS OF PREPARATION (Cont'd)

The initial application of the abovementioned accounting standards and amendments to published standards are not expected to have any material impacts to the financial statements of the Group except as mentioned below:

MFRS 15 Revenue from Contracts with Customers

MFRS 15 deals with revenue recognition and establishes principles for reporting useful information to users of financial statements about the nature, amount, timing and uncertainty of revenue and cash flows arising from an entity's contracts with customers. Revenue is recognised when a customer obtains control of a good or service and thus has the ability to direct the use and obtain the benefits from the good or service. The standard replaces MFRS 118 Revenue and MFRS 111 Construction Contracts and related interpretations.

The adoption of MFRS 15 will result in a change in accounting policy. The Group is currently assessing the financial impact of adopting MFRS 15.

A2. COMMENTS ABOUT SEASONAL OR CYCLICAL FACTORS

The Group's operations are not affected by any significant seasonal or cyclical factors in the financial year under review. It should be noted that the Group operates predominantly in the oil and gas sector in Malaysia. Accordingly, the level of the Group's business activities is closely correlated with that of the oil and gas operators and contractors in Malaysia. Any significant change in their level of activities will likewise have an impact on the Group.

A3. UNUSUAL ITEMS DUE TO THEIR NATURE, SIZE, OR INCIDENCE

Other than the expiration of CUPL's build, operate and transfer agreement as disclosed in Note B10, there were no significant unusual items affecting the assets, liabilities, equity, net income or cash flows during the financial year-to-date.

A4. SIGNIFICANT ESTIMATES AND CHANGES IN ESTIMATES

There were no material changes to estimates that have had any material effect on the financial year-to-date results.

A5. EQUITY AND DEBT SECURITIES

B3. PROSPECTS

Global oil prices continued to come under downward pressure and are expected to stay low mainly on account of the imbalance between supply and demand. In Malaysia, crude oil production rose from 613,000 barrels per day in October 2014 to 697,000 barrels in March 2015. The continued increase in production had ensured a steady stream of production related activities that the Group was able to participate in. Against this backdrop, the Group reported improved revenue in the quarter across all segments albeit at reduced margins. Moving forward, the remaining half of the financial year and the operating environment is even more challenging as oil prices continue to move downwards and is currently trading at less than USD50 per barrel and oil prices are not expected to recover anytime soon. Management continues to monitor the situation and had adopted measures to address the impact of lower oil prices through cost containment and moderating capital expenditure.

B4. PROFIT FORECAST

The Group has not issued any profit forecast for the current financial year and therefore no comparison is available.
