During the quarter under review, the Group reported an increase in revenue of RM5.60 million as compared to the preceding year corresponding quarter ("corresponding quarter").

The total revenue of the current year-to-date ("current period") increased by RM7.01 million as compared to the preceding year corresponding period ("corresponding period").

The Group reported a loss before tax of RM15.14 million in the current quarter as compared to a profit before tax of RM3.67 million in the preceding year corresponding quarter, a drop of RM18.81 million. The result for the current period decreased by RM17.44 million as compared to the profit brfore tax of RM7.47 million in the corresponding period.

#### (a) Shipping

Despite the slight improvement in the shipping revenue, the shipping industry is still facing an over-supply of freight spaces, thus depressed freight rates, amidst the sluggish global economy.

In view of the general slowdown in global trades that have affected shipping industry adversely, the Board felt that it is prudent to make an impairment for the Group's vessels amounting to RM17.70 million.

The profit before tax of the Shipping segment for the current quarter/period before the impairment was RM0.18/RM0.39 million respectively. With this impairment, the results become a loss of RM17.52/RM17.31 respectively. The impairment of the vessels represents the write-down of the vessels to the recoverable amount based on their fair value less cost to sell. The impairment was recognised in "other expenses" line item of the statement of comprehensive income for the current financial period ended 31 December 2011.

# (b) Logistics

The revenue of the Logistics segment has improved by RM5.53/RM11.03 million from the corresponding quarter/period respectively. The increase in revenue was contributed by growth in volume from existing customers as well as new customers.

The profit before tax of the Logistics segment increased in line with the increase in revenue growth.

#### (c) Trading

The main market for our Trading segment is in the Island Nations of the South West Indian Ocean which are affected by the global financial crisis. With the downturn of tourism at these regions, the development of resorts and construction activities declined sharply leading to low demand for construction materials, thus affecting our Trading segment adversely. As a result the total Trading revenue decreased by RM6.01 million in the current period as compared to the corresponding period. Furthermore, the rising costs of Malaysian made products plus the strengthening of the Malaysian Ringgit relative to the United States Dollars (the trade currency) made us less competitive compared to other suppliers around the regions.

#### (d) Others

The main contributor to the revenue and profit before tax of the Others segment in the corresponding quarter/period was from the leasing of a passenger ferry which ceased during the corresponding quarter. The ferry was leased to an associated company and operated in the Seychelles and business was badly affected by the global financial crisis. With the frequent mechanical problems encountered with the engines of the ferry boat resulting in lengthy downtime as well as the high overheads and costs of such maintenance/repairs, the associated company had ceased the operation of the ferry. With this, the Group had recognized an impairment loss of RM0.90 million on the ferry during the quarter under review.

The Group reported a total revenue of RM27.96 million as compared to RM23.76 million in the immediate preceding quarter. The increase in revenue of RM4.20 million in the current quarter was mainly contributed from the improved performance of all segments.

The profit before tax for the current quarter before impairment loss of RM18.60 million is RM3.46 million which compare favourably against the RM1.94 million achieved in the preceding quarter. However with the inclusion of the impairment loss, the Group reported a loss before tax of RM15.14 million for the current quarter, a decrease of RM17.09 million against the preceding quarter (refer to Note 15 a and 15 d).

#### 17. Prospects

The Eurozone debt crisis and the geopolitical tension in Iran could dampen economic growth and further fuel volatility of crude oil prices for the rest of the financial year.

Management expects the Logistics segment to perform satisfactorily on account of volume growth and penetration into new customers.

Due to the poor commercial environment in the South West Indian Ocean market, the Group has decided to refocus its shipping business on sustainable routes in the South East Asian market.

On the Trading segment, Management will concentrate on supplying to existing customers where value added can be obtained.

With the on-going resource optimization initiatives to enhance services deliveries, the Group will continue to be focused to optimize its Logistics business segment. Strategic measures are also being implemented to focus on sustainable shipping routes for the shipping segment and to continue with existing profitable trading activities. The Board is optimistic that with its robust logistics business, the overall performance for the next financial quarter will be satisfactory.

- (a) the 70% exemption from tax on the statutory income from the operations of sea going Malaysian registered vessels pursuant to Section 54A of the Income Tax Act 1967 of certain subsidiaries of the Company;
