3 Current Year Prospects

The Malaysian economy posted growth of 5.8% in the fourth quarter of 2014 while the annual economic growth forecast for 2015 by Bank Negara Malaysia is between 4.5% to 5.5%.

The Company expects to be able to maintain its current performance in the financial year ending 29 February 2016 based on implementation of its business plan. However, lower retail spending by consumers is projected from April 2015 resulting from GST implementation, due to expected price increases of some goods and services and impact from weakening of the Ringgit vis-à-vis the major currencies, which may affect the Company's business performance for the current fiscal year.
