### Other information required by Bursa Malaysia Securities Berhad Main Market Listing Requirements

# 14. Review of performance of operating segments for the current quarter and financial year ended 31 December 2020

### Oil & Gas Segment

The Oil & Gas Segment's external revenue for the fourth quarter and the financial year ended 31 December 2020 were RM160.8 million and RM577.0 million respectively, compared with RM168.7 million and RM1.5 billion in the corresponding periods in 2019. The segment registered a profit before tax of RM12.2 million and a loss before tax of RM286.8 million respectively, compared with loss before tax of RM57.7 million and profit before tax of RM10.9 million in the corresponding periods in 2019.

The reduction in revenue in the current year was due to completion of the Nord Stream 2 project in the previous year as well as lack of new projects resulting from deferment of Capital Expenditure by Oil and Gas companies due to the on-going pandemic in the world. This lack of projects and one-off adjustments disclosed in the previous quarter directly impacted the results of the segment for the current year. However, in the current quarter, in line with the recovery taking place in the market, the segment delivered a profit before taxation of RM12.2 million.

### Renewable Energy Segment

The Renewable Energy Segment's external revenue for the fourth quarter and financial year ended 31 December 2020 were RM98.7 million and RM357.4 million respectively, compared with RM112.6 million and RM399.6 million in the corresponding periods in 2019. In the same period, profit before tax were RM9.5 million and RM27.7 million, compared with profit before tax of RM4.8 million and RM25.5 million in the corresponding periods in 2019.

Investment activities in the palm oil sector slowed down during the pandemic and resulted in lower external revenue in current quarter and financial year. However, the process equipment fabrication businesses performed better with higher revenue, and activities in the current quarter and financial year.

Profit before tax for the current quarter and financial year ended 31 December 2020 was higher compared with last year's corresponding quarter and financial year, due mainly to higher contribution from the process equipment fabrication business and lower losses in the boiler business.

## **Industrial Trading & Services Segment**

The Industrial Trading & Services Segment's external revenue for the fourth quarter and financial year ended 31 December 2020 were RM88.3 million and RM301.1 million respectively, compared with RM99.2 million and RM426.1 million in the corresponding periods in 2019. In the same period, the segment recorded a profit before tax of RM21.7 million and RM20.1 million, compared with a loss before tax of RM4.3 million and RM2.1 million in the corresponding periods in 2019.

Slowdown in the construction industry had resulted in lower external revenue in the current quarter and financial year ended 31 December 2020.

The segment's high profit before tax for the current quarter and financial year ended 31 December 2020 was due mainly to gain on disposal of a subsidiary during the period and overall operating costs rationalisation.

The Group recorded a profit before taxation of RM41.2 million in the current quarter, compared with a loss before taxation of RM235.4 million in the previous quarter. The improvement in the current quarter is due to improving operational conditions in the market and recognition of RM19 million on disposal of investments.

### 16. Prospects

The Group's current order book of RM1.2 billion comprises RM870.2 million in the Oil & Gas segment, RM251.8 million in the Renewable Energy segment and RM28.8 million in the Industrial Trading & Services segment.
