The Group recorded a revenue of RM258.43 million for the current quarter under review, compared to RM259.63 million for the corresponding quarter in the preceding year, which represents a slight decrease of 0.46%. The decrease is due to combination of factors including the negative impact of the global pandemic as well as lower average selling price in the current quarter under review.

The Group recorded a lower profit before tax for the current quarter under review of RM6.46 million, representing a decrease of RM0.98 million compared to the profit before tax for the corresponding quarter in the preceding year of RM7.44 million. This is mainly due to the unrealised foreign exchange losses caused by the steep depreciation of IDR against the USD towards the end of the current quarter under review.

B3. Prospects for the current financial year

The Group has implemented business continuity measures to manage COVID-19 related issues, including safeguards for occupational health and safety, compliance with governmental regulations, directives and standard operating procedures. The management does not expect the impact on the Group's business operations, liquidity and financial position because of COVID-19 to be material.

However, the market condition is envisaged to be volatile and challenging in the current year due to concerns over global economic and other uncertainties. Nervertheless, the management is optimistic on the business growth and will continue to focus on the expansion of business and operational efficiency to improve the Group's performance.
