B3. Prospects for the remaining financial year

Our FY2023 performance showcases our resilience in navigating a turbulent market landscape, particularly subdued chemical demand faced earlier in the year. However, the pick-up in demand and stabilising prices across key markets in recent months offer optimism for further improvements in the market.

Over the past year, we have expanded our warehousing capacity in both Malaysia and Vietnam, a strategic initiative poised to unlock new opportunities for growth. This expansion is pivotal to facilitate our penetration into new client's segment and to broaden our product portfolio offering. In addition, we aim to capitalise on the potential opportunities arising from both the shifting trends of Chinese manufacturers' supply chain, as well as the relocation of global chemical plants to this region.

While we acknowledge the potential challenge of rising inflation in 2024, we remain cautiously optimistic on a more favourable overall operating environment, particularly in the second half of the year. This outlook is bolstered by anticipated improvements in the economic landscape and heightened demand driven by increased construction and infrastructure activities within our key markets. Barring unforeseen circumstances, the Board of Directors are cautiously optimistic of the Group's performance for the remaining financial year.
