B3. Commentary on prospects

In spite of the economic turmoil in the Eurozone which affects the steady recovery of the global economy, the demand for crude oil remains strong. With the crude oil price hovering around US\$100 per barrel, it is still economically viable for the oil majors to carry out oil exploration and production activities in the deep seas where most of the world oil reserves are located. High oil prices also attract increase exploration activities in previously uneconomic areas including the deep waters of the US Gulf. We maintain our outlook of more building contracts will surface for the offshore support vessels.

The demand for tugboats from Indonesia caused by the growth in mining activities is still very encouraging.

Barring any drastiic adverse development in the world economies, we are on track to a better financial year for 2012.

B4. Variance between actual profit from forecast profit

The Group did not issue any profit forecast for the current financial period or in the prior financial period and therefore no comparison is available.
