B3. Commentary on prospects

The Indonesia barge fleet market is expected to grow in the forecast period of 2024-2032 at a Compound Annual Growth Rate (CAGR) of 5.1% due to the growing transportation industry along with the rising import and export activities in the country (Source : Expert Market Research). Demand for bulk material transportation between islands in Indonesia is significant, particularly for the movement of coal, sand, nickel, oil, aggregates and agricultural goods. Due to the benefits related to barge transportation like efficiency, cost-effectiveness, and security and safety of cargo, it is expected to propel the market growth of barges and tugboats.

The Board remains optimistic about our prospects as the encouraging developments in the mining and transportation industry in Indonesia augur well for the Group.

B4. Variance between actual profit from forecast profit

The Group did not issue any profit forecast for the current financial period or in the prior financial period and therefore no comparison is available.
