Detailed Analysis for current guarter and cumulative period

The Group recorded a revenue of RM227.0 million and RM774.4 million for the reporting quarter and cumulative period respectively, these represent an increase of 6.4% in the reporting quarter and a reduction of 0.5% for the cumulative period compared to previous year's corresponding periods. The higher revenue in the reporting quarter compared to previous year corresponding period was due mainly to favourable exchange rates and better product mix, despite lower shipment quantity as a result of the Movements Control Order (MCO) imposed by Malaysian Government to fight COVID-19 that limited the production output levels of the Group during the reporting quarter.

The Group recorded a net profit of RM3.4 million and RM11.5 million for the reporting quarter and cumulative period respectively, compared to net loss of RM26.4 million and RM52.0 million recorded in the previous year corresponding periods. The improved net results were due mainly to the improvement in gross margin as a result of cost rationalisation efforts and better exchange gain. In April 2020, the Group's production facilities in Malaysia were ordered to operate at a reduced capacity as a result of the MCO imposed by Malaysian Government and this had caused a significant burden to the cost of sales for the particular month and impacted the pace of the Group's financial recovery.

As our segmental report is based on geographical performance with similar business activities, the factors affecting the earnings and revenue for Malaysia and Thailand segments are similar to those affecting the Group as discussed above, except that, during the quarter under review, the Thailand segment recorded exchange gains while the Malaysia segment recorded losses due to the weakening of US Dollar against Thai Baht and Malaysian Ringgit respectively as at the end of the period. The Thailand segment was facing the similar constraint of lower production level and higher cost of sales as a result of the Malaysian MCO as the Thailand segment sourced its key materials from Malaysia.

B2. COMPARISON WITH PRECEDING QUARTER'S RESULTS

The Group recorded a revenue of approximately RM227.0 million for the reporting quarter or 15.8% lower compared to RM269.5 million of revenue recorded in the immediate preceding quarter ended 31 March 2020. The reduction on revenue was due mainly to lower overall quantities shipped during the reporting period as a result of the Movements Control Order (MCO) imposed in Malaysia.

The Group recorded a profit before tax of RM3.3 million for the reporting quarter, compared to profit before tax of RM4.6 million reported in the immediate preceding quarter ended 31 March 2020. The deterioration of the result before tax was due mainly to higher cost of sales in the month of April 2020 following the reduced production level during the MCO period in Malaysia.

B3. FUTURE PROSPECT

The COVID-19 pandemic continues to exert broad and wide ranging impacts on economic supply and demand worldwide.

The IT industry in general has derived benefits from the continuing and increasing incidence of working and learning from home. Market forecasts from various sources indicate that demand for PCs, notebooks, and peripherals will increase in 2020, but the picture will become clearer as these new work patterns set in.

In the storage space SSDs and HDDs continue to play complementary roles, the former mainly in domestic and mobile appliances, and the latter mainly in centralised network-based systems. This trend is likely to continue.

For the HDD industry, in the near future, traditional supply chains could experience significant realignments, and JCY is monitoring developments carefully in order to ensure that we can benefit from potential market shifts.

At the same time our diversification programme into the automotive industry is proceeding apace and it is expected that these other lines of business will contribute in due course.

B4. VARIANCE FROM PROFIT FORECAST

Tenaga Nasional Berhad ("TNB") vs JCY HDD Technology Sdn Bhd ("JCY HDD")

A subsidiary of the Company, JCY HDD Technology Sdn. Bhd. ("JCY HDD"), has received letters dated 14 December 2010 from Tenaga Nasional Berhad ("TNB" or the "Plaintiff") claiming for additional electricity charges of approximately RM8.36 million. JCY HDD had disputed the claims and had discussed with TNB as to their basis and quantification of the additional electricity charges.

On 15 December 2011, the Judge fixed for decision for the case after a preliminary question of law that TNB's claim is only restricted to 3 months backcharges and JCY HDD is only required to pay to TNB for an amount of approximately RM1.05 million. However, TNB had filed an appeal to the Court of Appeal against the decision of the High Court made on 15 December 2011.

On 19 July 2018, the Court decided that the Plaintiff's claim for a balance sum of RM6.97 million is allowed and the cost of RM25,000 is awarded to the Plaintiff, and that interest at the rate of 5% per annum is payable on the judgment sum calculated from the date of judgment until date of full settlement. The principal sum of the claim had been paid by a major shareholder of the Company.
