Group	297,109	276,852	6,375	(17,727)

Detailed Analysis for current quarter and cumulative period

The Group recorded a revenue of RM297.1 million reporting quarter, this represents an improvement of 7.3% in revenue for the reporting quarter compared to previous year's corresponding period. The improvement in revenue recorded in the reporting period was due mainly to the completion of realignment of customer base.

The Group recorded a net profit of RM6.4 million for the reporting quarter, compared to net loss of RM17.7 million recorded in the previous year's corresponding period. The improvement of the net results for the financial year were due mainly to the increased revenue as explained above and improved utilisation of the operation facilities.

As our segmental report is based on geographical performance with similar business activities, the factors affecting the earnings and revenue for Malaysia and Thailand segments are similar to those affecting the Group as discussed above.

B2. COMPARISON WITH PRECEDING QUARTER'S RESULTS

The Group recorded a revenue of approximately RM297.1 million for the reporting quarter or 14.2% higher compared to RM260.2 million recorded in the immediate preceding quarter ended 30 September 2021. The higher revenue was due mainly to the completion of re-alignment of customer base.

The Group recorded a profit before tax of RM8.5 million for the reporting quarter, compared to profit before tax of RM25.0 million reported in the immediate preceding quarter ended 30 September 2021. The profit before tax recorded in the immediate preceding quarter included one-time gain of RM36.7 million arising from liquidation of a foreign subsidiary. Without the one-time gain, the reported result before tax would have been a loss of RM11.7 million in the immediate preceding quarter, compared to profit before tax of RM8.5 million recorded in the reporting quarter, the improvement in result before tax was due mainly to better contribution of gross profit as a result of the increased revenue in the reporting quarter as explained above.

B3. FUTURE PROSPECT

HDDs continue to maintain a significant cost advantage over SSDs, particularly in hyperscale and cloud applications. Recently, the persistent shortage of chip supplies appears to have adversely affected cost and availability of SSDs, and this has benefited HDD pricing.

The total addressable market (TAM) for HDD remains stable and is expected to amount to around 60 million per quarter for the year 2022. Market demand for mobile HDD and Desktop HDD while declining in line with historical patterns, is expected to pick up later in the financial year. Enterprise HDD demand experienced single digit percentage decline quarter to quarter; it is understood that this is due to system OEM and cloud vendors facing difficulties in securing components for system deployment, and is expected to firm up once bottlenecks in the supply chain are resolved.

Operationally, our vaccination programmes and other measures to ensure safe working environment for our employees in the face of the continuing COVID-19 pandemic in Malaysia and Thailand appear to have been effective in minimising workforce disruption.

B4. VARIANCE FROM PROFIT FORECAST

Not applicable as the Group has not issued any profit forecast for the period under review.

B5. TAXATION

Domestic current income tax is calculated at the statutory tax rate of 24% (2019: 24%) of the estimated assessable profit for the year. Taxation for other jurisdictions is calculated at the rates prevailing in the respective jurisdictions.
