#### Detailed Analysis for current quarter and cumulative period

The Group recorded a revenue of RM147.1 million for the reporting period, this represents an increment of 40.7% in revenue for the reporting quarter compared to previous year's corresponding period. The Group recorded a net profit of RM5.3 million for the reporting quarter, compared to net loss of RM25.3 million recorded in the previous year's corresponding period. The improvement in results is driven by two main factors:

a) Revenue increasing driven by increasing demand for storage products, both Hard Disk Drives (HDD) and Solid State Drives (SSD). Our customers have started seeing some recovery in HDD demand and that is translating to more demand for the Groups offerings. We are seeing this sustained increasing factory capacity utilisation throughout the whole quarter.

b) An improved Group cost structure allowing the Group to turn to profitability even at a much lower factory capacity utilization rate. This improved cost structure is a result of a continuous effort by the Group to drive factory yields and productivity. This process is evident as we have reduced our Gross Loss consecutively Quarter on Quarter for the last 4 quarters.

The improved cost structure and higher customer demand driving higher factory capacity utilization resulted in our first Net Profit quarter since Dec 2021. This result is even more significant given that the Group's capacity utilisation is still less than 50% in the reported quarter.

#### B2. COMPARISON WITH PRECEDING QUARTER'S RESULTS

The Group recorded a revenue of RM147.1 million for the reporting period, this represents an increment of 16% compared to RM126.7 million revenue recorded in the immediate preceding quarter ended 31 December 2023. The higher revenue is in line with improved demand from our key customers.

The Group recorded a net profit of RM5.3 million for the reporting quarter, compared to net loss of RM2.6 million recorded in the immediate preceding quarter ended 31 December 2023. As mentioned in B1 above, the company continued to improve its cost structure and enjoy economies of scale for some of the products. Foreign exchange gain accounted for RM3 million profit in the reporting quarter.

#### **B3.** FUTURE PROSPECT

The reported quarter total HDD storage market showed a 3% increase Quarter on Quarter (QoQ) in units shipped and 22% QoQ total Storage Capacity shipped, increasing to 262 Exabytes(EB). This is the 2nd straight quarter that the industry is seeing unit HDD shipment increase. The industry has also reported that inventory levels in the supply chain are back to normal levels. Based on current market trends and barring any unforeseen circumstances, the Group expects the performance of the second half year to be better than the first half. The group is projecting that our factory capacity utilisation rate will increase as our customers improve their units shipped.

Our short to medium term strategy remains to strengthen our core in the storage industry while diversifying into other industries. We aim to be recognized as a Quality focused, engineering-based precision casting, machining, and assembly company.

We remain focused in growing our portfolio. We strongly believe that being vertically integrated in Mold making, Casting, Machining and Coating gives us a strategic advantage in the industry to capitalise on the disruption in supply chain driven by the world's geopolitical tensions. We are working with new customers in product qualifications. We do recognise that this is a slow and laborious, part by part qualification, process and will take 2-4 years to reach some maturity. The group remains invested in the long-term partnerships to grow together with our customers.

#### B4. VARIANCE FROM PROFIT FORECAST
