16. Material changes in the profit before tax for the current quarter as compared with the immediate preceding quarter

There were no material changes in the profit before tax for the current quarter as compared with the immediate preceding quarter.

17. Prospects

For 2017, International Data Corporation has reported that the Desktop PC and Notebook's consumer segment continued to slow down due to weak consumer spending. Similarly, the enterprise segment posted a significant drop with the subdued spending on ICT projects in the public and commercial sectors.

With the growth of our mobility devices, we shall continue to work closely with our resellers in the telecommunication sector and to expand our mobility channel.

For our Enterprise Systems segment, we are focusing on high value-added products for the networking, cyber-security and hyper-converged projects to improve on our gross profit margin.

In view of the challenging market conditions, we are cautious on the outlook for the second half of FY 2017.
