NOTES TO THE UNAUDITED INTERIM FINANCIAL REPORT FOR THE FORTH QUARTER ENDED 31 DECEMBER 2011

PART B ADDITIONAL INFORMATION AS REQUIRED BY LISTING REQUIREMENT OF BURSA MALAYSIA SERCURITIES BERHAD (PART A OF APPENDIX 9B)

B1. Review of performance of the Group

The Group recorded a revenue of RM35.31 million (which consists of RM35.28 million from the manufacturing segment and RM0.03 million from the electricity segment respectively) during the current quarter under review, an increase of RM8.12 million (29.86%) as compared to the group revenue of RM27.19 million (which consists of RM27.15 million from the manufacturing segment and RM0.04 million from the electricity segment respectively) registered in the corresponding quarter last year. The increase in revenue was mainly contributed by the manufacturing segment since the electricity segment is operated mainly for the supply of electricity to its holding company which delivered approximately 98% of its output to the holding company.

The global property market condition remained slowdown during the current quarter under review, which affected the demand of plywood and was decreasing thereof. However, the property market and RV (Recreational Vehicle) market in US started to improve during the current quarter under review. As a result of this, the overall selling price was 27.7% higher than the preceding year corresponding quarter.

The Group recorded a profit before taxation of RM4.98 million as compared with a loss of RM1.31 million in the corresponding quarter of the preceding year. The increase in profit before tax is mainly due to higher selling price.

During the FYE 31 December 2011, the manufacturing segment was operating less than 50% of its capacity, which was mainly due to the shortage of labour and it is still the main problem for this segment. The logs supply of 148,000 cubic meters FYE 31 December 2011 at an average price of RM357 per cubic meter was considerably stable as compared to the preceding year which was approximately 130,000 cubic meters at an average price of RM365 per cubic meter.

B2. Comparison with immediate preceding quarter's results

The Group's revenue for the current quarter was RM35.31 million which is 4.14% higher than the immediate preceding quarter mainly due to high selling prices in the current quarter under review.

The profit before tax of RM4.98 million for the current quarter has decreased by RM0.79 million as compared to the profit before tax of RM5.77 million in the immediate preceding quarter mainly due to the effect of the loss on foreign exchange in the current quarter under review.

B3. Prospects for current year

In view of the issue on the shortage of labour, the Directors of the Group will continue the efforts through several measures to recruit more manpower. A focus on investment in additional automated machineries will also be considered from time to time to overcome the manpower problem. The Group targets an average monthly production of about 6,500 cubic meters this year, i.e. an increase of 7% in its production as compared to last year.

B3. Prospects for current year (cont'd)

The logs supply is expected to remain stable as the Group is purchasing from more than 20 logs suppliers within Sabah and some of them are supplying regularly to the Group. The logs prices will be fluctuated due to changes in demand and supply conditions. The Group will also purchase veneer on a need-be basis to meet the plywood orders when the logs supply is insufficient.

Majority of the Group's products are traded in US currency. Hence the Group is exposed to foreign exchange risks. In spite of this regard, the Group may adjust the pricing of sales quotations within a certain period of time with certain degree of flexibility which may in turn reduce the impact of foreign currency movement accordingly. Therefore, the impact of the fluctuation of US currency is considered minimal to the Group as commented by the Directors. The Directors also suggest that a certain level of hedging will be considered as well.

The Group also expects a challenging environment this year mainly due to the effect of the euro debt crisis commencing since October last year, which has continued into the beginning of this year. The plywood market is expected to be sluggish in the first half year of 2012. However, the Directors are confident that the Group will continue to perform due to its established and diversified customers, based mainly in the US market, India and other emerging Asia markets. The Directors remain positive and that the Group's businesses will be expected to be resilient.
