## PART B – EXPLANATORY NOTES PURSUANT TO PART A OF APPENDIX 9B OF THE LISTING REQUIREMENTS

#### **B1.** Performance Review

#### Current quarter against corresponding quarter in prior year

The Group achieved revenue of RM43.63 million and recorded a loss before tax of RM2.26 million for the current quarter as compared to revenue of RM33.80 million and loss before tax of RM7.30 million for the corresponding quarter in prior year.

### **B2.** Comment on Material Change in Loss/Profit before Tax Against Immediate Preceding Ouarter

The Group achieved revenue of RM43.63 million and loss before tax of RM2.26 million for the current quarter as compared to revenue of RM41.03 million and profit before tax of RM0.92 million for immediate preceding quarter.

With better economies of scale in production and increasing staffs' expertise in running the machinaries of the Group's new battery manufacturing plant, the Group has seen light in generating a gross profit in the group level which mainly due to reduction in operational loss made by the new battery manufacturing plant. However, in the 3<sup>rd</sup> quarter, the Group faces shortages of raw materials due to delay in shipment, increasing finance costs, which results in the group making a cummulative loss before tax of RM7.86 million

#### **B3.** Commentary on Prospects

The Malaysian economy expanded by 5.3% in the third quarter of 2024 (2Q 2024: 5.9%), driven by strong investment activity and continued improvement in exports. Investment activity was underpinned by strong spending on structures and machinery and equipment (M&E), while household spending sustained its expansion amid positive labour market conditions and policy support. In the external sector, exports continued to strengthen on the back of recovering external demand and positive spillovers from the global tech upcycle. Meanwhile, imports also grew at a faster pace, following strong demand for capital and intermediate goods to support rising investments and trade. On the supply side, most sectors remained supportive of growth. In particular, the improvement in the manufacturing sector was driven by export-oriented clusters. However, growth was partly offset by maintenance activities in the mining sector. On a quarter-on-quarter, seasonally-adjusted basis, growth momentum moderated to 1.8% (2Q 2024: 2.9%). Overall, the Malaysian economy expanded by 5.2% in the first three quarters of 2024. Source: Economic and Financial Developments in Malaysia in the Third Quarter of 2024 released by Bank Negara Malaysia)

The Group has completed three production lines for its new battery manufacturing plant and the fourth line has started its trial run and is expected to run in full capacity in the 4<sup>th</sup> quarter of 2024. These batteries will be sold in local and international markets which will gradually boost overall Group's performance.
