28 Prospects

The Sugar Industry continues to face prolonged high input cost with global freight and natural gas prices remain elevated. Moreover, raw sugar price is volatile mainly due to fluctuating Global production volume.

The Group continues to reinforce our domestic and export markets amidst steady demand and explore other regional market opportunities.

The Group remains cautious on the risks of heightening geopolitical tension which may further affect the prices of our input cost and impede financial performance.

The Joint Sugar Industry continues to engage with the Government to finalize a sustainable pricing mechanism for the domestic retail segment and the control of imported refined sugar in ensuring food security and long-term sustainability of the industry.
