OTHER NOTES PURSUANT TO BURSA MALAYSIA'S MAIN MARKET LISTING REQUIREMENTS: CHAPTER 9, APPENDIX 9B, PART A

B1. Review of performance

The Integrated Manufacturing Services ("IMS") segment comprises the following divisions:

- i) precision machining, stamping and tooling ("PMST");
- ii) semiconductor; and
- iii) automotive components design and manufacturing ("Automotive").

The Resources segment is principally involved in the harvesting and selling of fresh fruit bunches of oil palm ("FFB") whereas the Energy segment is principally involved in the exploration and production of oil and gas but has not commenced commercial production yet.

The Group's revenue from continuing operations for the current quarter decreased from RM81.3 million for the preceding year corresponding quarter to RM61.4 million for the current quarter. This was due to a drop in the revenue from the IMS and Resources segments. Except for the PMST division, all the IMS divisions registered a decline in their respective revenue due to an overall weak demand. Revenue from the Resources segment fell by RM0.3 million as a result of lower FFB production.

The Group registered a net loss from continuing operations of RM1.3 million for the current quarter versus a net profit of RM0.5 million in the preceding year corresponding quarter. In tandem with the decline in revenue, both the IMS and Resources segments registered a decline in their net results. The Energy segment continued to incur pre-commercial production losses of RM1.3 million for the current quarter.

B2. Material changes from the preceding quarter

Comparing quarter on quarter, the Group's revenue from continuing operations decreased from RM75.5 million to RM61.4 million. This decline was attributable mainly a decrease in the revenue of the IMS and Resources segment. The IMS's revenue decreased from RM73.7 million to RM59.9 million quarter on quarter, due to all the IMS divisions, except for PMST division recording a decrease in their revenue as a result of overall weak demand. The revenue from the Resources segment decreased from RM1.8 million to RM1.0 million revenue due to lower FFB production.

The Group recorded a net loss of RM1.3 million for the current quarter versus a net profit of RM0.7 million in the previous quarter due mainly to a gain on bargain purchase of RM1.2 million being recognised in the previous quarter.

B3. Prospects

The slowing global growth and lacklustre local business environment continues to pose a challenging outlook for the Group's businesses, particularly in the IMS segment.

In view of the above, the Board is hopeful with the new venture into the oil and gas exploration, production and services (Energy Segment), the Group is able to diversify its risks and reduce its reliance on the IMS and Resources segment and also improve the long term revenue, profits and cash flows to the Group.

The Energy segment has completed drilling two pilot wells during the quarter with very encouraging results and will further drill the remaining three pilot wells to complete the Tanjung Enim Pilot Production Program with the aim of upgrading resources and proving reserves. This will be an important milestone for the Energy segment leading up to the preparation and approval for the Plan of Development.

Nevertheless, the Energy Segment will take time before the Group can reap the returns from it.
